**Convenience Translation of the Independent Auditors' Review Report  
Originally Prepared and Issued in Turkish**

To the Board of Directors of  
Türkiye Sınai Kalkınma Bankası A.Ş.

We have reviewed the unconsolidated balance sheet of Türkiye Sınai Kalkınma Bankası A.Ş. ("the Bank") as of 31 March 2014 and the related unconsolidated income statement, unconsolidated statement of cash flows and unconsolidated statement of changes in shareholders' equity for the three-month interim period then ended. These financial statements are the responsibility of the Bank's management. Our responsibility as independent auditors is to issue a review report on these financial statements based on our review.

We conducted our review in accordance with the regulations related with the "Accounting and Recording Rules" and "Independent Auditing Standards" of the (Turkish) Banking Law No 5411. These regulations require that we plan and perform the review to obtain limited assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of the personnel of the Bank and analytical procedures applied to financial data and thus provide less assurance than an audit. We have not performed an audit, and accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unconsolidated financial statements do not present fairly the financial position of the Bank as of 31 March 2014 and the results of its operations and its cash flows for the three-month interim period then ended in accordance with the prevailing accounting principles and standards set out as per the Article No: 37 of the Banking Act No: 5411 and other regulations, explanations and circulars on accounting and financial reporting principles announced by BRSA.

Istanbul,  
30 April 2014

Akis Bağımsız Denetim ve  
Serbest Muhasebeci Mali Müşavirlik  
Anonim Şirketi

Orhan Akova  
Partner

**Additional paragraph for convenience translation to English:**

As explained in Section 3 Note I, the accompanying financial statements are not intended to present the financial position and results of operations in accordance with the accounting principles and practices generally accepted in countries and jurisdictions other than Turkey.

**THE UNCONSOLIDATED FINANCIAL REPORT OF

**V. Summary on the Bank's functions and areas of activity**

Türkiye Sınai Kalkınma Bankası A.Ş. ("the Bank") is the first private investment and development bank which was established by the Council of Ministers resolution number of 3/11203 established in 1950 with the support of World Bank, T.R. Government, T.R. Central Bank and commercial banks. As per the articles of association published in the Official Gazette on 2 June 1950, the aim of the Bank is to support all private sector investments but mostly industrial sectors, to help domestic and foreign capital owners to finance the new firms and to help the improvement of Turkish capital markets. The Bank is succeeding its aims by financing, consulting, giving technical support and financial intermediary services. The Bank, which operates as a non-deposit accepting bank, played a major role on manufacturing and finance sectors in every phase of the economic development of Turkey. The Bank started its journey in 1950 financing the private sector investments in Turkey and today it provides loans and project finance with the goal of sustainable development to corporations in different fields. As a leader in meeting the long term finance needs of the private sector, the Bank also continues to offer solutions with respect to the newest needs and client demands.

The Bank has opened two branches in Izmir and Ankara in April 2006 to enhance marketing and valuation operations.

### **SECTION THREE**

#### **ACCOUNTING POLICIES**

##### **I. Basis of Presentation**

##### **I.a Presentation of financial statements:**

As prescribed in the Article 37 of the Banking Act No. 5411, the Bank prepares its financial statements and underlying documents in accordance with the “Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks” and Turkish Accounting Standards (“TAS”) published by Public Oversight Accounting and Auditing Standards Authority , Turkish Financial Reporting Standards and other regulations, explanations and circulars on accounting and financial reporting principles announced by the Banking Regulation and Supervision Agency.

Amounts in the unconsolidated financial statements, the underlying explanations and disclosures are expressed in Thousands of Turkish Lira unless otherwise stated.

##### **Additional paragraph for convenience translation to English**

The differences between accounting principles, as described in the preceding paragraphs, and the accounting principles generally accepted in countries, in which the accompanying financial statements are to be distributed, and International Financial Reporting Standards (“IFRS”), may have significant influence on the accompanying unconsolidated financial statements. Accordingly, the accompanying unconsolidated financial statements are not intended to present the unconsolidated financial position and unconsolidated results of operations in accordance with the accounting principles generally accepted in such countries and IFRS.

##### **I.b The valuation principles used in the preparation of the financial statements**

The accounting rules and the valuation principles used in the preparation of the financial statements were implemented as stated in the Turkish Accounting Standards and related regulations, explanations and circulars on accounting and financial reporting principles announced by the BRSA. These accounting policies and valuation principles are explained in the below notes through II to XXII.

##### **I.c The accounting policies for the correct understanding of the financial statements**

The following accounting policies that applied according to BRSA regulations and TAS for the correct understanding of the financial statements and valuation principles used in preparation of the financial statements are presented in more detail below.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**II. Explanations on usage strategy of financial assets and foreign currency transactions**

The main sources of the funds of the Bank have variable interest rates. The financial balances are monitored frequently and constant and variable interest rate placements are undertaken according to the return on the alternative financial instruments. The macro goals related to balance sheet amounts are set during budgeting process and positions are taken accordingly.

Due to the fact that the great majority of the loans extended by the Bank have the flexibility of reflecting the changes in market interest rates to customers, the interest rate risk is kept at minimum level. Moreover, the highly profitable Eurobond and the foreign currency government indebtness securities portfolio have the attribute of eliminating the risks of interest rate volatility.

The Bank liquidity is regularly monitored. Moreover, the need of liquidity in foreign currencies is safeguarded by currency swaps.

Commercial placements are managed with high return and low risk assets considering the international and domestic economic expectations, market conditions, creditors' expectations and their tendencies, interest-liquidity and other similar factors. Prudence principle is adopted in the placement decisions. The long term placements are made under project finance. A credit policy is implemented such a way that harmonizing the profitability of the projects, the collateral and the value add introduced by the Bank.

The movements of foreign exchange rates in the market, interest rates and prices are monitored instantaneously. When taking positions, the Bank's unique operating and control limits are watched effectively besides statutory limits. Limit overs are not allowed.

The Bank's strategy of hedging interest rate and foreign currency risks arising from fixed and variable interest rate funds and foreign currency available for sale securities:

A great majority of foreign currency available for sale securities are financed with foreign currency resources. Accordingly, the expected depreciation of local currency against other currencies is eliminated. A foreign currency basket is formulated in terms of the indicated foreign currency to eliminate the risk exposure of cross currency rates.

To mitigate the interest rate risk, a balanced asset composition is established in compliance with the structure of fixed and variable rate funding resources.

The hedging strategies for other foreign exchange risk exposures:

A stable foreign exchange position strategy is implemented: To be secured from cross currency risk, the current foreign exchange position is taken by considering a specific basket of foreign currencies.

The foreign exchange gains and losses on foreign currency transactions are accounted for in the period of the transaction. Foreign exchange assets and liabilities are translated to Turkish Lira using foreign exchange bid rate as of the reporting date, and the resulting gains and losses are recorded in foreign exchange gains or losses.

**TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**III. Explanations on forward and option contracts and derivative instruments**

Türkiye Sınai Kalkınma Bankası A.Ş. is exposed to financial risk which depend on changes in foreign exchange rates and interest rates due to activities and as part of banking activities uses derivative instruments to manage financial risk that especially associated with fluctuations in foreign exchange and interest rate.

Mainly derivative instruments used by the Bank are foreign currency forwards, swaps, futures trading, futures and option agreements.

The derivative instruments are accounted for at their fair values as of the date of the agreements entered into and subsequently valued at fair value. Some of the derivative instruments, although economic hedges, are accounted for as trading transactions since they are not qualified to be hedging instruments as per "Financial Instruments: Recognition and Measurement" ("TAS 39"). Realized gains or losses are reflected in the income statement on these derivative instruments.

According to Capital Markets Board (CMB) legislation, Intermediary Institution warrants are capital market instruments that give the holder the right, but not the obligation, to buy or to sell an underlying asset at a specified price on or before a predetermined date where such right is exercised by registered deliver or cash settlement and these warrants are called securitized derivative transactions. In this context, the Bank that issued warrants on foreign currencies, has accounted the costs of issued warrant on liabilities. Warrants are valued on a daily basis over the market value created by the market maker and valuation differences are recorded in the income statement. On withdrawal of the issued warrants, the balance is netted-off with the cost on the liabilities and gain/losses are associated with the income statement. On the other hand, issued warrant is recorded on the statement of off-balance sheet with its nominal value.

**IV. Explanations on interest income and expenses**

Interest income and expenses are recognized in the income statement for all interest bearing instruments on an accrual basis using the effective interest method (the rate that equalizes the future cash flows of financial assets and liabilities to the current net book value).

In accordance with the related regulation, realized and unrealized interest accruals of the non-performing loans are reversed and interest income related to these loans are recorded as interest income only when collected.

**V. Explanations on fees and commission income and expenses**

Fees and commissions received from cash loans, that are not an integral part of the effective interest rate, and fees for various banking services are recorded as income when collected. Fees and commissions paid for the funds borrowed, which are not integral parts of the effective interest rate of the funds borrowed, are recorded as expense on the date of the payment. As of 31 March 2014, all other income and expenses, fee and commission income and expenses, including commissions received from non-cash loans are recorded on an accrual basis.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VI. Explanations on financial assets**

Financial instruments comprise financial assets, financial liabilities and derivative instruments. Financial instruments constitute the both of the Bank's trading activities and operations. Risks related with these instruments constitutes majority of total risks. Financial instruments affect liquidity, market, and credit risks on the Bank's balance sheet in all respects. The Bank trades these instruments on behalf of its customers and on its own behalf.

Basically, financial assets create the majority of the commercial activities and operations of the Bank. These instruments expose, affect and diminish the liquidity, credit and interest risks in the financial statements.

All regular way purchases and sales of financial assets are recognized on the settlement date i.e. the date that the asset is delivered to or by the Bank. Settlement date accounting requires (a) accounting of the asset when acquired by the institution, and (b) disposing of the asset out of the balance sheet on the date settled by the institution; and accounting of gain or loss on disposal. In case of application of settlement date accounting, the entity accounts for the changes that occur in the fair value of the asset in the period between commercial transaction date and settlement date as in the assets that the entity settles.

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Changes in fair value of assets to be received during the period between the trade date and the settlement date are accounted for in the same way as the acquired assets.

Fair value differences are not accounted for assets presented at cost or amortized cost; gain or loss of financial assets at fair value through profit and loss are reflected in the income statement, gain or loss of available for sale assets are accounted for under the shareholders' equity.

The methods and assumptions used in determining the reasonable estimated values of all of the financial instruments are explained below.

**Cash, Banks and Other Financial Institutions:**

Cash and cash equivalents comprise cash in vault and foreign currency cash. Foreign currency cash and foreign currency deposits are reflected to balance sheet in TL which is translated in accordance with prevalent exchange rate on reporting date. The book values of these assets approximate their fair values.

**Marketable Securities:**

The Bank classifies its marketable securities in 3 groups:

Financial assets at fair value through profit and loss: These transactions are classified in two categories. (i) Trading securities for the purposes of short term profit taking through sale or buying back in a near future. (ii) The financial assets classified at inception as financial assets at fair value through profit or loss by the Bank. The Bank uses such classification above when permitted or for the purposes of providing a more proper disclosure.

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VI. Explanations on financial assets (continued)**

In this category, trading securities are initially recognized at cost and measured at fair value on the financial statements. Fair values of securities that are traded in an active market are determined based on quoted prices or current market prices.

Any gains or losses resulting from such valuation are recorded in the profit and loss accounts. As per the explanations of the Uniform Code of Accounts (UCA), any positive difference between the historical cost and amortized cost of financial assets are booked under the "Interest Income" account, and in case the fair value of the asset is over the amortized cost, the positive difference is booked under the "Gains on Securities Trading" account. If the fair value is under the amortized cost, the negative difference is booked under the "Losses on Securities Trading" account. Any profit or loss resulting from the disposal of those assets before their maturity date is recognized within the framework of the same principles.

Available for sale financial assets are initially recognized at cost including the transaction costs. The interest income related to securities with fixed and variable interest under available for sale financial assets are recorded in interest income. After the initial recognition, available for sale securities are measured at fair value and the unrealized gain/loss originating from the difference between the amortized cost and the fair value is recorded in "Marketable Securities Value Increase Fund" under the equity. All unquoted available for sale stocks are recorded by considering impairment, since respective fair values cannot be reliably measured. At the disposal of available for sale financial assets, value increases/decreases that are recorded in the securities value increase fund under equity are transferred to income statement.

Investments held to maturity include securities with fixed or determinable payments and fixed maturity where there is an intention of holding till maturity and the relevant conditions for fulfilment of such intention, including the funding ability. This portfolio excludes loans and receivables. After initial recognition held to maturity investments are measured at amortized cost by using effective interest rate less impairment losses, if any. Interest income earned from held-to-maturity investments is recognized as interest income on income statement.

As of the reporting date, the Bank has begun to calculate internal rate of return of the CPI indexed marketable securities considering expected inflation index of future cash flows. The effect of this application is accounted as interest received from marketable securities in the unconsolidated financial statements.

Explanations on investments in associates and subsidiaries:

Investments in associates and subsidiaries are recorded within the scope of the "Turkish Accounting Standard No.39: Financial Instruments: Recognition and Measurement" (TAS 39). Investments in subsidiaries, whose shares are traded in an active market (stock market), are shown in the financial statements with their fair values by taking into account their prices recorded in the related market (stock market). Investments in subsidiaries and associates, whose shares are not traded in an active market (stock market) are followed at their cost of acquisition and these assets are shown in the financial statements with their cost values after the deduction of, if any, impairment provisions.

**TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**  
*(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)*

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VI. Explanations on financial assets (continued)**

**Loans:**

Loans are financial assets which have fixed payment terms and are not traded.

Loans are initially recognized at cost and measured at amortized cost by using effective interest rate. The duties, charges and other expenses paid for the collaterals obtained against loans are accepted as transaction costs and reflected to customers.

Turkish Lira ("TL") cash loans are composed of foreign currency indexed loans and working capital loans; foreign currency ("FC") cash loans are composed of investment loans, export financing loans and working capital loans.

Foreign currency indexed loans are converted into TL from the foreign currency rate as of the opening date and followed in TL accounts. Repayments are measured with the foreign currency rate at the payment date, the foreign currency gains and losses are reflected to the income statement.

Provision is set for the loans that may be doubtful and the amount is charged in the current period income statement as well as their classification to non-performing loans as per the related regulations. The collections made related to loans including those on non-performing loans for which provision is made in the current period are recorded in "Provision for Loans and Other Receivables (including received from Loans and receivables with doubtful collectability)" and "Interest Received from Non-performing Loans" account.

Releases of loan loss provisions are recorded by reversing the provisions booked during the year and the collections made related to loan losses previously accounted for are recorded to collections related to the prior period expenses.

**VII. Explanations on impairment on financial assets**

At each reporting date, the Bank evaluates the carrying amounts of its financial asset or a group of financial assets to determine whether there is an objective indication that those assets have suffered an impairment loss. If any such indication exists, the Bank determines the related impairment.

A financial asset or a financial asset group incurs impairment loss only if there is an objective evidence related to the occurrence of one or more than one event ("loss event") after the first recognition of that asset; and such loss event (or events) causes, an impairment as a result of the effect on the reliable estimate of the expected future cash flows of the related financial asset and asset group. Irrespective of high probability the expected losses for future events are not recognized.

Loans are classified and followed in line with the provisions of the "Regulation on Identification of Loans and Other Receivables and Provisioning against Them", published on the Official Gazette No: 26333 dated 1 November 2006. Specific provision is allocated for the total amount of loans and other receivables, which is deemed non-performing, without being restricted by the minimum legal requirements stated in the related regulation, and such specific provisions are recognized in the income statement. The provisions, which are released within the same year, are credited to the "Provision Expenses" account and the released parts of the provisions from the previous years are transferred to and recognized in the "Other Operating Income" account.

Other than specific provisions, the Bank provides "general provision" for loans and other receivables classified in accordance with the Regulation on Identification of and Provision against Non-Performing Loans and Other Receivables.

**TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VII. Explanations on impairment on financial assets (continued)**

Subsequent to the change in the regulation on “Change in the Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves” published in the Official Gazette No. 27947 dated 28 May 2011; in case of the extension of the payment plan of the loans which are followed under loans and receivables, the general loan loss provision ratio for standard and for the first group loans and receivables should not be less than 5 times of the general provision ratio and for the second group loans and receivables should not be less than 2,5 times of the general provision ratio.

As a consequence of the regulation published in Official Gazette No. 28789 dated 8 October 2013 amending the “Change in the Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves”, for the banks, of which the consumer loans exceed twenty five percent of total loans, general provision ratio is four percent for consumer loans which are followed under standard loans and receivables except housing loans; and is eight percent for the loans under close monitoring except housing loans. Since the consumer loans of the Bank are composed of personnel loans as of 31 March 2014 and do not exceed the ratios mentioned above, additional general loan loss provision has not been calculated. As mentioned in the regulations on the same date, Banks could apply general loan loss provision ratios is zero percent for cash and non-cash export loans which are followed standard loans; and is five per mille and one per mille for cash and non-cahs loans respectively which is used to small and medium size enterprise. The Bank has started to calculate general loan loss provision thereby using in question ratios after published date of the regulations.

**VIII. Explanations on offsetting of financial assets and liabilities**

Financial assets and liabilities are offset when the Bank has a legally enforceable right to set off, and when the Bank has the intention of collecting or paying the net amount of related assets and liabilities or when the Bank has the right to offset the assets and liabilities simultaneously. Otherwise, there is not any offsetting transaction about financial assets and liabilities.

**IX. Explanations on sales and repurchase agreements and lending of securities**

Funds provided under repurchase agreements are accounted under “Funds Provided under Repurchase Agreements-TL” and “Funds Provided under Repurchase Agreements-FC” accounts.

The repurchase agreements of the Bank are based on the Eurobonds issued by Republic of Turkey Undersecretariat of Treasury and government bonds. In the financial statements, the government bonds and treasury bills sold to customers under repurchase agreements are classified under securities held for trading, available for sale and held to maturity depending on the portfolio they are originally included in and are valued according to the valuation principles of the related portfolios. The income and expenses from these transactions are reflected to the interest income and interest expense accounts in the income statement. Receivables from reverse repurchase agreements are recorded in “Receivables from Reverse Repurchase Agreements” account in the balance sheet.

**TÜRKİYE SINAI KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (continued)**

**X. Explanations on assets held for sale and discontinued operations**

Assets held for sale are measured at the lower of the assets' carrying amount and fair value less costs to sell. Held for sale assets are not amortized and presented separately in the financial statements. In order to classify an asset as held for sale, only when the sale is highly probable, experienced quite often and the asset (or disposal group) is available for immediate sale in its present condition. Assets held for sale are measured at the lower of the assets' carrying amount and fair value less costs to sell. Held for sale assets are not amortized and presented separately in the financial statements. In order to classify an asset as held for sale, only when the sale is highly probable, experienced quite often and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale. Highly saleable condition requires a plan by the management regarding the sale of the asset to be disposed (or else the group of assets), together with an active program for determination of buyers as well as for the completion of the plan. Also the asset (or else the group of assets) shall be actively marketed in conformity with its fair value. On the other hand, the sale is expected to be journalized as a completed sale within one year after the classification date; and the necessary transactions and procedures to complete the plan should demonstrate the fact that the possibility of making significant changes or cancelling the plan is low. Various circumstances and conditions could extend the completion period of the sale more than one year. If such delay arises from any events and conditions beyond the control of the entity and if there is sufficient evidence that the entity has an ongoing disposal plan for these assets, such assets (or else group of assets) are continued to be classified as assets held for sale (or else group of assets).

A discontinued operation is a division that is either disposed or held for sale. Results of discontinued operations are included separately in the income statement.

**XI. Explanations on goodwill and other intangible assets**

Goodwill arising on the acquisition of a subsidiary or a jointly controlled entity represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the subsidiary or jointly controlled entity recognized at the date of acquisition. Goodwill is initially recognized as an asset at cost and is subsequently measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in a subsequent period. On disposal of a subsidiary or a jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

As of reporting date, The Bank has no goodwill on the unconsolidated financial statements.

Intangible assets that are acquired prior to 1 January 2005 are carried at restated historical cost as of 31 December 2004; and those acquired subsequently are carried at cost less accumulated amortization, and any impairment. Intangible assets are depreciated over their expected useful lives. Depreciation method and period are reviewed periodically at the end of each year. Intangible assets are mainly composed of rights and they are depreciated principally on a straight-line basis between 1-15 years.

**TÜRKİYE SINAI KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XII. Explanations on tangible assets**

Tangible assets, purchased before 1 January 2005, are accounted for at their restated costs as of 31 December 2004 and the assets purchased in the following periods are accounted for at acquisition cost less accumulated depreciation and reserve for impairment.

Gain or loss resulting from disposals of the tangible assets is reflected to the income statement as the difference between the net proceeds and net book value. Normal maintenance and repair expenditures are expensed.

There is no pledge, mortgage or any other lien on tangible assets.

Tangible assets are depreciated with straight-line method and their useful lives are determined in accordance with the Turkish Accounting Standards.

Depreciation rates and estimated useful lives of tangible assets are as follows.

<b>Tangible Assets</b>	<b>Expected Useful Lives (Years)</b>	<b>Depreciation Rate (%)</b>
Cashboxes	4-25	4-25
Vehicles	5	20
Other Tangible Assets	1-50	2-100

**XIII. Explanations on leasing transactions**

***The Bank as Lessor***

Amounts due from lessees under finance leases are recorded as receivables at the amount of the Bank's net investment in the leases. The lease payments are allocated as principle and interest. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Bank's net investment outstanding in respect of the leases.

***The Bank as Lessee***

Assets held under finance leases are recognized as assets of the Bank at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are included in profit or loss in accordance with the Bank's general policy on borrowing costs. Tangible assets acquired by financial leases are amortized based on the useful lives of the assets.

**XIV. Explanations on provisions and contingent liabilities**

Provisions are recognized when there is a present obligation due to a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If aforesaid criterias did not compose, the Bank has disclosed mentioned issues in note to financial statements. Provisions are determined by using the Bank's best expectation of expenses in fulfilling the obligation, and discounted to present value if material.

**TÜRKİYE SINAI KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XIV. Explanations on provisions and contingent liabilities (continued)**

*Explanations on contingent assets*

Contingent assets consist of unplanned or other unexpected events that usually cause a possible inflow of economic benefits to the Bank. Since recognition of the contingent assets in the financial statements would result in the accounting of an income, which may never be generated, the related assets are not included in the financial statements; on the other hand, if the inflow of the economic benefits of these assets to the Bank is probable, an explanation is made thereon in the footnotes of the financial statements. Nevertheless, the developments related to the contingent assets are constantly evaluated and in case the inflow of the economic benefit to the Bank is almost certain, the related asset and the respective income are recognised in the financial statements of the period in which the change occurred.

**XV. Explanations on liabilities regarding employee benefits**

Under Turkish law and union agreements, lump sum payments are made to employees retiring or involuntarily leaving the Bank. In retirement and involuntarily leaving, the Bank records the present value of the defined benefit obligation. There is no indemnity obligations related to the employees who are employed with contract of limited duration exceeding 12 month period. Actuarial gains and losses are accounted under Shareholder's Equity since 1 January 2013 in accordance with the Revised TAS 19.

Employees of the Bank are members of "Türkiye Sınai Kalkınma Bankası Anonim Şirketi Memur ve Müstahdemleri Yardım ve Emekli Vakfı" and "Türkiye Sınai Kalkınma Bankası A.Ş. Mensupları Munzam Sosyal Güvenlik ve Yardımlaşma Vakfı" ("the Pension Fund"). Technical financial statements of those funds are subject to audit in accordance with the Insurance Law and provisions of "Regulations on Actuaries" issued based on the related law by an actuary registered in the Actuarial Registry.

Paragraph 1 of the provisional Article 23 of the Banking Act ("Banking Act") No: 5411 published in the Official Gazette No: 25983 on 1 November 2005 requires the transfer of banking funds to the Social Security Institution within 3 years as of the enactment date of the Banking Act. Under the Banking Act, in order to account for obligations, actuarial calculations will be made considering the income and expenses of those funds by a commission consisting of representatives from various institutions. Such calculated obligation shall be settled in equal instalments in maximum 15 years. Nonetheless, the related Article of the Banking Law was annulled by the Constitutional Court's decision No: E. 2005/39 and K. 2007/33 dated 22 March 2007 that were published in the Official Gazette No: 26479 on 31 March 2007 as of the release of the related decision, and the execution of this article was cancelled as of its publication of the decision and the underlying reasoning for the cancellation of the related article was published in the Official Gazette No: 26731 on 15 December 2007.

After the publication of the reasoning of the cancellation decision of the Constitutional Court, articles related with the transfer of banks pension fund participants to Social Security Institution based on Social Security Law numbered 5754 were accepted by the Grand National Assembly of Turkey on 17 April 2008 and published in the Official Gazette No: 26870 on 8 May 2008.

Present value for the liabilities of the transferees as of the transfer date would be calculated by a commission that involves representatives of Social Security Institution, Ministry of Finance, Turkish Treasury, State Planning Organization, BRSA, SDIF, banks and banks' pension fund institutions and technical interest rate, used in actuarial account, would be 9,80%. If salaries and benefits paid by the pension fund of banks and income and expenses of the pension funds in respect of the insurance branches, stated in the Law, exceeds the salaries and benefits paid under the regulations of Social Security Institution, such differences would be considered while calculating the present value for the liabilities of the transferees and the transfers are completed within 3 years beginning from 1 January 2008.

**TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XV. Explanations on liabilities regarding employee benefits (continued)**

According to the provisional Article 20 of 73th article of Law No. 5754 dated 17 April 2008, has become effective on 8 May 2008 and was published in the Official Gazette No: 26870, transfer of Pension Funds to Social Security Institution in three years has been anticipated. Related resolution of the Council of Ministers related to four-year extension was published in the Official Gazette No: 28277 dated 8 March 2012. It has been resolved that the transfer process has been extended two year with Council of Ministers' Decree, has become effective on 9 April 2011 and was published in the Official Gazette No: 27900. The transfer had to be completed until 8 May 2013. Accordingly, it has been resolved that, one more year extension with Council of Minister Decree No:2013/467, has become effective on 3 May 2013 and was published in the Official Gazette No:28636 and transfer need to be completed until 8 May 2014. However, it has been decided to extend the time related to transfer by the decision of Council of Minister published in the Official Gazette No. 29987 dated 30 April 2014 for one more year due to not to realize the transfer process.

However, the Main Opposition Party has appealed to the Constitutional Court on 19 June 2008 for cancellation of some articles, including the first paragraph of 20. Temporary article of the Law, and requested them to be ineffective until the case of revocatory action is finalized. The application of the Main Opposition Party was rejected by the Higher Court with the resolution dated 30 March 2011.

Unmet social benefits and payments of the pension fund participants and other employees that receive monthly income although they are within the scope of the related settlement deeds would be met by pension funds and the institutions employ these participants after the transfer of pension funds to the Social Security Institution.

The present value of the liabilities, subject to the transfer to the Social Security Institution, of the Pension Fund as of 31 December 2013 has been calculated by an independent actuary in accordance with the actuarial assumptions in the Law and as per actuarial report dated 24 January 2014, as of 31 December 2013, there is no technical or actual shortage requiring provision.

In addition, the Bank's management anticipates that any liability that may come out during the transfer period and after, in the context expressed above, would be financed by the assets of the Pension Fund and would not cause any extra burden on the Bank.

**XVI. Explanations on taxation**

The income tax charge is composed of the sum of current tax and deferred tax.

The current tax liability is calculated over taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible and it further excludes items that are never taxable or deductible. Liability for current tax is calculated using tax rates that have been enacted by the reporting date.

Deferred tax asset or liability is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and currently enacted tax rates are used to determine deferred tax on income.

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

**TÜRKİYE SINAI KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XVI. Explanations on taxation (continued)**

The carrying amount of deferred tax assets is reviewed at each reporting date. Deferred tax is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized and reflected in the income statement as expense or income. Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is also associated directly with equity. Deferred tax assets and liabilities are also offset.

According to the second paragraph of the Article 53 of the Banking Act No 5411 dated 19 October 2005, all specific reserves for loans and other receivables are considered as deductible expense for determining corporate tax base.

***Transfer pricing***

Transfer pricing is regulated through article 13 of Corporate Tax Law titled “Transfer Pricing through camouflage of earnings”. Detailed information for the practice regarding the subject is found in the “General Communiqué Regarding Camouflage of Earnings Through Transfer Pricing”. According to the aforementioned regulations, in the case of making purchase or sales of goods or services with relevant persons/corporations at a price that is determined against “arm’s length principle”, the gain is considered to be distributed implicitly through transfer pricing and such distribution of gains is not subject to deductions in means of corporate tax.

**XVII. Additional explanations on borrowings**

Borrowings are recognized at initial cost on transaction date and carried at amortized cost using effective interest method. In the accompanying financial statements, foreign currency debt instruments are valued using foreign exchange rates of the Bank as of the period end and interest expense amounts of related period arising from borrowings are reflected in the financial statements.

All other borrowing costs are recorded to the income statement at the period they are incurred.

**XVIII. Explanations on share certificates issued**

In the current period, in the meeting of the General Assembly held on 27 March 2014, it has been resolved that, paid-in capital of the Bank will be increased from TL 1.300.000 to TL 1.500.000 by TL 200.000. In respect of the resolution of the General Assembly, this increase will be incorporated from the profit of the year 2013. The increase in paid-in capital was approved by the BRSA on 16 April 2014.

In the prior period, , in the meeting of the General Assembly held on 26 March 2013, it has been resolved that, paid-in capital of the Bank will be increased from TL 1.100.000 to TL 1.300.000 by TL 200.000. In respect of the resolution of the General Assembly, TL 168.000 of this increase will be incorporated from the profit of the year 2012, TL 32.000 of this increase will be incorporated from extraordinary reserves. The increase in paid-in capital was approved by the BRSA on 3 May 2013, has been published in the Turkish Trade Registry Gazette No: 8351 on 27 June 2013.

**SECTION FOUR**

**INFORMATION ON UNCONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT**

**I. Explanations related to the unconsolidated capital adequacy standard ratio**

Since 1 July 2012, capital adequacy standard ratio is calculated in accordance with the Communiqué on “Measurement and Assessment of Capital Adequacy of Banks”, which was published on 28 June 2012 in the Official Gazette numbered 28337. In this context, credit and market risk are calculated based on the Standardised Approach and the operational risk is calculated based on the Basic Indicator Approach. In the calculation process of credit risk, loans are classified in the related risk weight by taking into account the risk portfolio types, ratings and credit risk mitigation techniques. The Bank uses “comprehensive approach” for trading book items in the credit mitigation process.

As of 31 March 2014, the Bank’s capital adequacy ratio in accordance with the Communiqué on “Measurement and Assessment of Capital Adequacy of Banks” is 17,17%.

**II. Explanations related to credit risk**

Not prepared in accordance with the Article No.25 of the Communiqué on the Financial Statements and Related Disclosures and Footnotes to be Announced to Public by Banks.

**III. Explanations related to the market risk**

In order to avoid the market risk and restrict the risks carried, the Board of Directors determines the limits on market risk. Risk, notional and proportional basis limitation systems are used and the informative reports regarding market risk position of the bank are presented to Board of Directors, relevant committees and top management.

The guidelines prepared by Risk Management regarding organization, responsibility and fields of activity were approved by the Board of Directors. Risk management policies are determined and announced throughout the Bank.

Legally, the standard method is used to calculate the consolidated and unconsolidated market risk. In addition to the standard method, the Bank applies Monte Carlo simulation which is internal model to securities portfolio, foreign currency position on a daily or monthly basis to detect the market risks. The success of these models is tested retrospectively. The Bank also makes VaR calculations, scenario analyses and stress tests to detect the risks not caught by using internal models. Market risk is measured on a daily basis and reported to top management, Audit Committee and the Board of Directors weekly and monthly.

The market risk table is as follows:

**1.a Information related to the market risk**

	Current	Prior Period
(I) Capital Requirement to be Employed for General Market Risk - Standard Method	8.558	7.213
(II) Capital Requirement to be Employed for Specific Risk - Standard Method	3	3
Capital Requirement for Specific Risk Relating to Securitization Positions – Standard Method	-	-
(III) Capital Requirement to be Employed for Currency Risk - Standard Method	2.959	4.589
(IV) Capital Requirement to be Employed for Commodity Risk - Standard Method	-	-
(V) Capital Requirement to be Employed for Settlement Risk - Standard Method	-	-
(VI) Total Capital Requirement to be Employed for Market Risk Resulting From Options – Standard Method	323	-
(VII) Counterparty credit risk capital requirement - Standard method	4.920	4.111
(VIII) Total Capital Requirement to be Employed for Market Risk in Banks Using Risk Measurement Model	-	-
(IX) Total Capital Requirement to be Employed for Market	16.763	15.916
(X) Amount Subject to Market Risk (12,5 x VIII) or (12,5 x VII)	209.538	198.950

**3. Required disclosures in case the capital requirement of the Bank is calculated by a risk measurement model permitted by BRSA**

Not prepared in accordance with the Article No.25 of the Communiqué on the Financial Statements and Related Disclosures and Footnotes to be Announced to Public by Banks.

**IV. Explanations related to operational risk**

Not prepared in accordance with the Article No.25 of the Communiqué on the Financial Statements and Related Disclosures and Footnotes to be Announced to Public by Banks.

**V. Explanations related to currency risk**

No long or short position is taken due to the uncertainties and changes in the markets therefore; no exposure to foreign currency risk is expected. However, possible foreign currency risks are calculated on a monthly basis under the standard method in the foreign currency risk table and their results are reported to the official authorities and the Bank's top management. Thus, foreign currency risk is closely monitored. Foreign currency risk, as a part of general market risk, is also taken into consideration in the calculation of Capital Adequacy Standard Ratio.

No short position is taken regarding foreign currency risk, whereas, counter position is taken for any foreign currency risks arising from customer transactions as to avoid foreign currency risk.

The Bank has no hedging transactions through derivative instruments for its foreign currency borrowings and net foreign currency investments.

Announced current foreign exchange buying rates of the Bank as at reporting date and the previous five working days in USD and EURO are as follows:

	<b>1 USD</b>	<b>1 Euro</b>
<b>A. Bank "Foreign Exchange Valuation Rate"</b>		
31 March 2014	2,1500	2,9571
<b><u>Prior Five Workdays:</u></b>		
28 March 2014	2,1700	2,9822
27 March 2014	2,1850	3,0118
26 March 2014	2,2000	3,0375
25 March 2014	2,2170	3,0659
24 March 2014	2,2200	3,0634

Simple arithmetic thirty-day averages of the USD and EURO buying rates of the Bank before the reporting date are TL 2,1966 and 3,0345; respectively.

**(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)**  
**SECTION FOUR (Continued)**

**INFORMATION ON UNCONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)**

**VI. Explanations related to interest rate risk**

Interest rate sensitivity of the assets, liabilities and off-balance sheet items are measured by the Bank. General and specific interest rate risk tables in the standard method, by including assets and liabilities, are taken into account in determination of Capital Adequacy Standard Ratio and to calculate the overall interest rate risk of the Bank.

Forecast results, which have been formed using estimation-simulation reports are prepared and then the effects of fluctuations in interest rates are evaluated with sensitivity and scenario analysis. Cash requirement for every maturity period are determined based on maturity distribution analysis (Gap). In addition, a positive spread between the yield on assets and the cost of liabilities is kept while determining interest rates.

The amount of local borrowings is very low considering the total liabilities of the Bank. As the Bank is a development and investment bank, it obtains most of the funding from abroad.

The fluctuations in interest rates are controlled with interest rate risk tables, gap analysis, scenario analysis and stress tests, its effect in assets and liabilities and the probable changes in cash flows are being screened. The Bank screens many risk control ratios including the markets risk ratio to the sum of risk weighted assets and the ratio of the value at risk calculated as per the internal model to the equity.

Under the scope of risk policies, continuous controls are made to prevent assets or shareholders' equity from adverse effects because of fluctuations in interest rates or liquidity difficulties and top management, the Board of Directors and the Audit Committee are informed of these risks.

**VII. Explanations related to stock position risk**

The Bank is exposed to equity shares risk arising from investments on firms traded in Borsa Istanbul (BIST). Share certificate investments are almost used for trading purpose. However, these investments are not actively bought/sold by the Bank. The Bank classified its share certificate investments both as available for sale and as trading securities and net profit/loss of the Bank is not affected unless the Bank sell share certificates in portfolio of available for sale.

Equity shares are recognized according to "TAS 39- Financial Instruments: Recognition and Measurement". Trading securities in an active market (in exchange market) are reflected to financial statements with fair value taking into account of quoted securities on exchange market. Non-trading securities in an active market (in exchange market) are followed up according to the acquisition cost and recorded by considering impairment.

*Equity shares risk due from banking book*

Below is the comparison table of the Bank's share certificate instruments' book value, fair value and market value.

Current Period	Comparison		
Share Certificate Investments	Book Value	Fair Value	Market Value

MANAGEMENT (Continued)**

**VIII. Explanations related to the liquidity risk**

The Bank's future cash flows and current positions are taken into consideration for managing the market and liquidity risks. The Bank does not invest into illiquid markets and instruments. The liquidity ratios are followed up and the maturity match and the coverage of liquidity need are targeted in the context of asset-liability management. Although the Bank started to perform tests to calculate liquidity risk with internal models, the risk is still followed up basically by arranging the risks with respect to (holding period) data.

For the purpose of meeting the liquidity requirement, the Bank chooses one of the three or more of the following; disposing liquid assets, increasing short-term borrowing, decreasing illiquid assets or increasing capital. The Bank's liquidity management is implemented by meeting all the obligations on time considering the Bank's reputation. The cash flow projections and the fund requirement predictions are made by using adverse scenarios to determine liquidity risk under urgent and unexpected circumstances. As seen on interest rate risk tables, the difference in interest rates of assets and liabilities is in favour of the assets. Such mismatch positively affects the profitability and is checked by the Bank Management with regular reports.

The difference in interest rates of assets and liabilities are on behalf of assets as can be seen from the table of interest rate risk. The inconsistency positively affects the profitability and is controlled by the management with regular reports.

The Bank meets its short term liquidity requirements with repurchase agreements and inter-bank money market operations. The Bank may also use its available for sale portfolio for urgent liquidity requirement. The Bank meets its long term liquidity needs from the international institutions through borrowings.

The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Bank. For the purposes of monitoring and assessing the liquidity position of the Bank's assets and liabilities, the liquidity rate is weekly calculated.

**IX. Explanations related to securitization positions**

None.

**X. Explanations related to credit risk mitigation techniques**

Offsetting is not used as a credit risk mitigation technique. In assessments within the scope of credit risk mitigation techniques, using methods in regard to valuation and management of collaterals are realized in parallel with communiqué relating to Credit Risk Mitigation Techniques. Financial collaterals are evaluated on a daily basis in the Bank. Depending on the comprehensive financial collateral approach, risk mitigating effects of the collaterals are considered through the standard volatility adjustments. Value of the real estates subject to the collateral is determined at least once a year for commercial real estates and determined at least triennially for residential real estates. In the cases that significant changes in market conditions appear, the review is carried out at more frequent intervals. Within the communiqué, as a matter of credit risk mitigation techniques, only residences and commercial real estates (Warehouse, School, Hospital, Office and Store) which are not used for production purposes and can provide rental income are taken into consideration. In addition, land, field and orchard lands are also considered within same concept. Value of the real estates is assessed by the real estate appraisal companies, which are included in the list to provide valuation service by the CMB. Within the credit risk mitigation techniques, major collaterals that can be used by the Bank are financial collaterals (Treasury Bills, Government Bonds, Cash, Deposit Pledges, Gold, Stock Pledges), guarantees and mortgages. As of 31 March 2014, while guarantees and mortgages are used as credit risk mitigation technique, credit derivatives are not used. As of 31 March 2014 and 31 December 2013, risk amounts which credit risk mitigation techniques are used are shown below the table according to risk types.

**XI. Explanations related to risk management objective and policies**

The purpose of the risk management system is to provide identifying, measuring, reporting, monitoring and controlling the risk exposure on both unconsolidated and consolidated basis, through the policies determined related to controlling the risk-return structure of future cash flows of the Bank and observing, controlling, changing if needed, application procedures, limits and policies of Bank and determine the objectives to be achieved through the internal capital adequacy assessment process. In this context, “TSKB Risk Management Policies” and “TSKB Capital Adequacy Policies” are prepared and has become effective following the approval of the Board of Directors.

The Board of Directors of the Bank determine and regularly review the risk level that the Bank is willing to bear to achieve its objectives, considering the risk capacity of Bank.

Risk management process organized within the framework of risk management regulations and served to create a common risk culture throughout the Bank, is in a structure that these risks are described in line with the international regulations and are measuring, analyzing, following, monitoring and reporting within this framework. Within the framework of the mentioned structure, the Bank’s Risk Management, continues to activities depending on the Audit Committee, which is established to help the audit and monitoring activities of the Board of Directors in accordance with Banking Law No: 5411 and “Regulation on Internal Systems of Banks” communiqué of Banking Regulation and Supervision Agency. Risk Management is responsible for preparing risk management strategies and policies followed by the Bank, implementation, identification, measurement, monitoring, analysis, evaluation and reporting of risk management system activities.

Risk Management monitors the compliance of the risks in line with the Bank’s policies and standards and limits, and determines violations, analyzes the size of the risk by developing various scenarios, develops and integrates systems providing measuring, monitoring and reporting the risks.

Within the scope of “TSKB Risk Management Policies” the Bank is mainly exposed to credit risk, market risk, operational risk, currency risk, interest rate risk and liquidity risk.

**SECTION FOUR (Continued)**

**INFORMATION ON UNCONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)**

**XI. Explanations related to risk management objective and policies (continued)**

***Credit risk management policy***

Credit risk is the possibility of incurring losses due to the credit customer or the counterparty, with whom the Bank has made an agreement with, does not fulfil its obligations appropriately or is not able to meet these obligations. At the Bank, the purpose of credit risk management is to maximize the risk adjusted return of the Bank by managing the risks that the Bank may expose in line with the right parameters in a proactive approach. Although the largest and most visible source for credit risk is the loans that the Bank grants, other banking services regarding the counterparty risk also bear credit risk. In this context, all of the banking activities are assessed within the scope of credit risk.

Credit risk is measured and managed considering the maturity structure of the credit, contractual provisions of the credit and financial conditions, the risk profile structure until the end of the maturity parallel with the possible market conditions, guarantees and collaterals, internal risk ratings and the possible changes in the process of risk exposure, the concentrations (a single company, associated group of companies, industry, country, etc.) and compliance with limits determined by the Board of Directors in order to prevent these concentrations. For measuring credit risk, Internal Rating Based Model is used in order to monitor, control and provide early warning for credit risk of the Bank.

Maximum effort is expended for the fact that the limits and policies of the external and internal agreements are not so far from the limits and policies of the Bank. The articles in the agreements are compelling even if they are different from existing the Bank policies.

In credit risk mitigation policies and procedures, it is considered whether the total amount of credit risk mitigation tool should be taken into account is appropriate or not, also it is controlled whether the protection provided by the credit risk mitigation instruments is in compliance with the capital adequacy level. The Bank's Risk Management actively involved in the measurement, analysis and monitoring process of credit risk and regular reporting is provided to the Board of Directors, Audit Committee, top management and other departments related with credit risk by the Bank's Risk Management.

***Market risk management policy and currency risk management policy***

Market risk is the possibility of loss that the Bank may face, in the trading book portfolio and in its on-and off-balance sheet positions arising from movements in market prices. Interest rates, foreign exchange rates, equity and commodity prices are the main market risk factors. The purpose of market risk management is to maximize the risk adjusted return of the Bank by managing the risks that the Bank may expose in line with the right parameters in a proactive approach. Market risk is managed by using consistent risk measurement criteria such as fluctuation level of interest rate and/or price fluctuations and Value-at-Risk (VaR) Methods calculations, by establishing proper procedures for performing such controls and observing compliance with determined risk limits, by investigating sources of risk, learning risk and providing consistent information related with market risk to level of organizations within organization structure.

Interest rates, foreign exchange rates, equity and commodity prices are the main market risk factors and in order to control these risks vigorously and it is essential that money and capital market transactions should be "well-diversified" considering the level of risk created in terms of parameters such as maturity, currency, interest rate and other similar parameters. In addition, credit worthiness of issuers of financial instruments creating market risk is strongly taken into account. In the calculation of the market risk, the Bank uses two basic approaches, BRSA Standard Method and Value at Risk (VaR) approach. The accuracy of the VaR model is sustained by applying the retrospective tests (back testing). The test mentioned is based on the comparison of calculated Value at Risk and actual losses. In addition stress tests are applied to determine the effects of the events whose probability of occurrence is low; however, loss level is high on Value at Risk. Currency risk management is measured and monitored by using the VaR model.

**TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**FOR THE INTERIM PERIOD 1 JANUARY-31 MARCH 2014**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION FOUR (Continued)**

**INFORMATION ON FINANCIAL STRUCTURE (Continued)**

**XI. Explanations related to risk management objective and policies (continued)**

***Market risk management policy and currency risk management policy (continued)***

The Bank's Risk Management actively involved in measurement, analysis and monitoring process of market risk and currency risk and regular reporting is provided to the Board of Directors, Audit Committee, top management and other departments related with market risk by the Bank's Risk Management.

***Operational risk management policy***

Operational risk is defined as the risk of loss due to the insufficiency of the processes, the people and the systems or defects or errors on them and external events, and compliance with laws and ethical standards are also included in this definition. These risks are managed by fulfilling special controls of the basic functional areas of the Bank's operations, establishing mechanism distributing appropriate internal audit system and authorization required by this system within the Bank and by applying detailed testing and control of the Bank's all operating systems and by providing full harmony between internal and external systems and opportunity of independent data backup facility.

The Bank applies the principles of separation of duties and distribution of functions in order to reduce the risk of deliberate actions, manipulations or errors. The minimum functions that have to be separated are identified as (i) starting the process (ii) authorisation and approving, (iii) recording the process (iv) confirming the process, (v) safe custody services, (vi) monitoring and auditing, (vii) developing IT systems and activities for daily operations. The transaction information has to be recorded to the system by using IT applications at once the transactions have been completed. Measurement of operational risks carried out by the implementation of Basel II "Basic Indicator Approach" methods. The Bank's Risk Management actively involved in the measurement, analysis and monitoring process of operational risk and regular reporting is provided to the Board of Directors, Audit Committee, top management and other departments related with operational risk by the Bank's Risk Management.

***Structural interest rate risk management policy***

Structural interest rate risk is the risk of possible changes in interest rates affecting the capital of bank due to re-pricing period of interest bearing assets and liabilities banking books of the Bank and the differences at interest structuring. Structural interest rate risk is managed by providing consistent information related to structural interest rate risk to all the organization stages by using the risk measurement and criteria like the level of fluctuation in interest rates, interest shock and stress test calculations. Maturity mismatches concerning the repricing in predetermined buckets and currency mismatches of asset and liabilities are monitored and measured. The Bank manages the interest rate risk by being aware of that it threatens the income, capital, liquidity and reputation of the Bank and it comprises of repricing risk, yield curve risk, basis risk, spread risk and option risk.

The Bank's Risk Management actively involved in the measurement, analysis and monitoring process of structural interest rate risk and regular reporting is provided to the Board of Directors, Audit Committee, top management and other departments related with interest rate risk by the Risk Management.

**SECTION FOUR (Continued)**

**INFORMATION ON UNCONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)**

**XI. Explanations related to risk management objective and policies (continued)**

***Liquidity risk management policy***

Liquidity risk is the risk of not meeting the balance sheet and off-balance sheet liabilities on time. Liquidity risk is also the possibility of loss that the Bank may face, when there is not sufficient cash or cash inflow to meet the cash outflow in full and in time. There are two risks as funding liquidity risk in capital markets and purchase/ sales operations and market liquidity risk in which funding liquidity risk is the risk that investment and funding requirements cannot be met on time or at a reasonable cost due to the incompatibilities in cash flows. The market liquidity risk is that no long position can be taken on time or at a reasonable cost due to the markets are not so deep, disruption and the bank cannot enter the markets easily.

It is essential to evaluate the diversification of opportunities on the basis of maturities with maximum extent in order to ensure the efficiency of liquidity management and maintain a sustainable situation. In liquidity risk management, a portfolio structure matched with the functions of generating profit from portfolio and market risk management and risk-return trade-off is constantly monitored without compromising of liquidity requirements. The Bank's Risk Management actively involved in the measurement, analysis and monitoring process of liquidity risk and regular reporting is provided to the Board of Directors, the Audit Committee, top management and other departments related with liquidity risk by the Risk Management.

**XII. Explanations related to presentation of financial assets and liabilities at fair value.**

Not prepared in accordance with the Article No.25 of the Communiqué on the Financial Statements and Related Disclosures and Footnotes to be Announced to Public by Banks.

**XIII. Explanations related to transactions made on behalf of others and fiduciary transactions**

The Bank performs trading transactions on behalf of its customers, and gives custody, administration and consultancy services. The Bank does not deal with fiduciary transactions.

Paid in capital has been indicated as Turkish Lira in articles of incorporation and registered in trade registry. Effect of inflation adjustments on paid in capital is the difference caused by the inflation adjustment on shareholders' equity items. Extraordinary reserves are the status reserves which have been transferred with the General Assembly decision after distributable profit have been transferred to legal reserves. Legal reserves are the status reserves which have been transferred from distributable profit in accordance with the Article 519 of the Turkish Commercial Code numbered 6102.

There is no internal capital adequacy assessment approach for the subsidiaries.
