

Türkiye Sınai Kalkınma Bankası Anonim Şirketi

Publicly announced unconsolidated financial statements and related disclosures at September 30, 2017 together with auditor's review report

(Convenience translation of publicly announced unconsolidated financial statements and independent auditor's review report originally issued in Turkish, See Note I. of Section three)

**(Convenience translation of the independent auditor’s review report originally issued in Turkish,
See Note I. of Section three)**

INTERIM REVIEW REPORT

To the Board of Directors of Türkiye Sınai Kalkınma Bankası A.Ş.

Introduction

We have reviewed the unconsolidated statement of financial position of Türkiye Sınai Kalkınma Bankası A.Ş.(“the Bank”) at 30 September 2017 and the related unconsolidated income statement, unconsolidated statement of income and expense items under shareholders’ equity, unconsolidated statement of changes in shareholders’ equity, unconsolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the unconsolidated financial statements for the nine-month-period then ended. The Bank Management is responsible for the preparation and fair presentation of interim financial statements in accordance with the “Regulation on Accounting Applications for Banks and Safeguarding of Documents” published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by Banking Regulation and Supervision Authority and Turkish Accounting Standard 34 “Interim Financial Reporting” for those matters not regulated by BRSA Legislation (together referred as “BRSA Accounting and Financial Reporting Legislation”). Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, “Limited Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unconsolidated financial statements do not give a true view of the financial position of Türkiye Sınai Kalkınma Bankası A.Ş. at 30 September 2017 and of the results of its operations and its cash flows for the nine-month-period then ended in all material aspects in accordance with the BRSA Accounting and Financial Reporting Legislation.

Report on other regulatory requirements arising from legislation

Based on our review, nothing has come to our attention that causes us to believe that the financial information provided in the accompanying interim activity report in Section Seven, are not consistent with the unconsolidated financial statements and disclosures in all material respects.

Other Matter

The financial statements of the Bank as of December 31, 2016 and September 30, 2016 were audited and reviewed by another independent audit firm, who expressed an unqualified opinion and conclusion in their audit and review reports dated February 1, 2017 and October 27, 2016 respectively.

Additional paragraph for convenience translation to English

As explained in detail in Note I. of Section Three, the effects of differences between accounting principles and standards set out by regulations in conformity with “BRSA Accounting and Reporting Legislation” and the accounting principles generally accepted in countries in which the accompanying unconsolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in the accompanying unconsolidated financial statements. Accordingly, the accompanying unconsolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

SECTION ONE (Continued)

GENERAL INFORMATION (Continued)

IV. Information about the persons and institutions that have qualified shares in the Bank

Explanation about the people and institutions that have qualified shares control the Parent Bank's capital directly or indirectly are described in General Information Section II.

V. Summary on the Bank's functions and areas of activity

Türkiye Sınai Kalkınma Bankası A.Ş. ("the Bank") is the first private development and investment bank which was established by the Council of Ministers resolution number of 3/11203 established in 1950 with the support of World Bank, T.R. Government, T.R. Central Bank and commercial banks. As per the articles of association published in the Official Gazette on 2 June 1950, the aim of the Bank is to support all private sector investments but mostly industrial sectors, to help domestic and foreign capital owners to finance the new firms and to help the improvement of Turkish capital markets. The Bank is succeeding its aims by financing, consulting, giving technical support and financial intermediary services. The Bank, which operates as a non-deposit accepting bank, played a major role on manufacturing and finance sectors in every phase of the economic development of Turkey. The Bank started its journey in 1950 financing the private sector investments in Turkey and today it provides loans and project finance with the goal of sustainable development to corporations in different fields. As a leader in meeting the long term financing needs of the private sector, the Bank also continues to offer solutions with respect to the newest needs and client demands.

The Bank has opened two branches in Izmir and Ankara in April 2006 to enhance marketing and valuation operations.

VI. Differences between the Communiqué on Preparation of Consolidated Financial Statements of Banks and Turkish Accounting Standards and short explanation about the institution subject to line-by-line method or proportional consolidation and institutions which are deducted from equity or not included in these three methods

Due to differences between the Communiqué on Preparation of Consolidated Financial Statements of Banks and Turkish Account Standards (TAS), the non-financial subsidiaries and associates, TSKB Gayrimenkul Değerleme A.Ş., TSKB Sürdürülebilirlik Danışmanlığı A.Ş., Terme Metal Sanayi ve Ticaret A.Ş. and Ege Tarım Ürünleri Lisanslı Depoculuk A.Ş. are not consolidated since they are not in scope of financial institutions according to related Communiqué.

The Bank and its financial institutions, Yatırım Finansman Menkul Değerler A.Ş., TSKB Gayrimenkul Yatırım Ortaklığı A.Ş. are included in the accompanying consolidated financial statements line by line consolidation method; İş Finansal Kiralama A.Ş., İş Girişim Sermayesi Yatırım Ortaklığı A.Ş. and İş Faktoring A.Ş. are included in the accompanying consolidated financial statements by equity method.

Financial institutions included in the consolidation are determined in accordance with "Communiqué on Preparation of Consolidated Financial Statements of Banks" published in the Official Gazette dated 8 November 2006 numbered 26340. The Bank has no partnership share on banks and financial institutions, with shareholding of more than 10% and deducted from capital.

Yatırım Finansman Menkul Değerler A.Ş. :

Yatırım Finansman Menkul Değerler A.Ş. ("YF") was established in 15 October 1976. The Company's purpose is to perform capital market operations specified in the Company's articles of association in accordance with the CMB and the related legislation. The Company was merged with TSKB Menkul Değerler A.Ş. on 29 December 2006. The share of Türkiye Sınai Kalkınma Bankası A.Ş. is 95,78%. The company's headquarters is located at Istanbul/Turkey.

UNCONSOLIDATED STATEMENT OF CASH FLOWS
FOR THE INTERIM PERIOD 1 JANUARY - 30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE

ACCOUNTING POLICIES

I. Basis of Presentation

I.a Presentation of financial statements:

As prescribed in the Article 37 of the Banking Act No. 5411, the Bank prepares its financial statements and underlying documents in accordance with the “Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks” and other regulations, explanations and circulars on accounting and financial reporting principles announced by the Banking Regulation and Supervision Agency (“BRSA”) and Turkish Accounting Standards (“TAS”) published by Public Oversight Accounting and Auditing Standards Authority (“POA”) except for matters regulated by BRSA legislation. TAS consists of Turkish Accounting Standards, Turkish Financial Reporting Standards and related appendices and interpretations.

The unconsolidated financial statements have been prepared in TL, under the historical cost convention except for the financial asset, liabilities and buildings revaluation model which are carried at fair value.

The format and content of the accompanying unconsolidated financial statements and footnotes have been prepared in accordance with the “Communique’ on Publicly Announced Financial Statements Explanations and notes to the Financial Statements” and “Communique on Disclosures About Risk Management to be Announced to Public by Banks.”

The amendments of TAS and TFRS, effectiveness date is 1 January 2018, have no material impact on the Bank’s accounting policies, financial position and performance. The amendments of TAS and TFRS, except TFRS 9 Financial Instruments will have no impact on the accounting policies, financial condition and performance of the Bank. The Bank assesses the impact of TFRS 9 Financial Instruments standard.

Amounts in the unconsolidated financial statements, the underlying explanations and disclosures are expressed in Thousands of Turkish Lira unless otherwise stated.

Additional paragraph for convenience translation to English

The effects of differences between accounting principles and standards set out by regulations in conformity with BRSA Accounting and Reporting Legislation and Turkish Accounting Standard 34” Interim Financial reporting” except for the matters regulated by BRSA Legislation accounting principles generally accepted in countries in which the accompanying unconsolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in the accompanying unconsolidated financial statements. Accordingly, the accompanying unconsolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

I.b The valuation principles used in the preparation of the financial statements

The accounting rules and the valuation principles used in the preparation of the financial statements were implemented as stated in the Turkish Accounting Standards and related regulations, explanations and circulars on accounting and financial reporting principles announced by the BRSA. These accounting policies and valuation principles are explained in the below notes through II to XXII.

I.c The accounting policies for the correct understanding of the financial statements

The following accounting policies that applied according to BRSA regulations and TAS for the correct understanding of the financial statements and valuation principles used in preparation of the financial statements are presented in more detail below.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

II. Explanations on usage strategy of financial assets and foreign currency transactions

The main sources of the funds of the Bank have variable interest rates. The financial balances are monitored frequently and fixed and floating interest rate placements are undertaken according to the return on the alternative financial instruments. The macro goals related to balance sheet amounts are set during budgeting process and positions are taken accordingly.

Due to the fact that the great majority of the loans extended by the Bank have a flexibility of reflecting changes in the market interest rates to the customers, the interest rate risk is kept at minimum level. Moreover, the highly profitable Eurobond and the foreign currency government indebtness securities portfolio have the attribute of eliminating the risks of interest rate volatility.

The fixed rate Eurobond and Greenbond issued by the Bank and a portion of fixed rate funds borrowed are subject to fair value hedge accounting. The Bank enters into interest rate swap agreements in order to hedge the change in fair values of its fixed rate financial liabilities. The changes in the fair value of the hedged fixed rate financial liabilities and hedging interest rate swaps are recognised under the statement of profit/loss.

In the beginning and later period of the hedging transaction, the aforementioned hedging transactions are expected to offset changes occurred in the relevant period of the hedging transaction and hedged risk (attributable to hedging risk) and effectiveness tests are performed in this regard.

The Bank performs effectiveness test at the beginning of the hedge accounting period and at each reporting period. The effectiveness tests are carried out using the “Dollar off-set model” and the hedge accounting is applied as long as the test results are between the range of 80%-125% of effectiveness.

The hedge accounting is discontinued when the hedging instrument expires, is exercised, sold or no longer effective. When discontinuing fair value hedge accounting, the cumulative fair value changes in carrying value of the hedged item arising from the hedged risk are amortised and recognized in income statement over the life of the hedged item from that date of the hedge accounting is discontinued.

The Bank liquidity is regularly monitored. Moreover, the need of liquidity in foreign currencies is safeguarded by currency swaps.

Commercial placements are managed with high return and low risk assets considering the international and domestic economic expectations, market conditions, creditors’ expectations and their tendencies, interest-liquidity and other similar factors. Prudence principle is adopted in the placement decisions. The long term placements are made under project finance. A credit policy is implemented such a way that harmonizing the profitability of the projects, the collateral and the value add introduced by the Bank.

The movements of foreign exchange rates in the market, interest rates and prices are monitored instantaneously. While taking positions, the Bank’s unique operating and control limits are watched effectively besides statutory limits. Limit overs are not allowed.

The Bank’s strategy of hedging interest rate and foreign currency risks arising from fixed and variable interest rate funds and foreign currency available for sale securities:

A great majority of foreign currency available for sale securities are financed with foreign currency resources. Accordingly, the anticipated possible depreciation of local currency against other currencies is eliminated. A foreign currency basket is formulated in terms of the indicated foreign currency to eliminate the risk exposure of changes in cross currency parity.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

II. Explanations on usage strategy of financial assets and foreign currency transactions (Continued)

Interest rate risk is mitigated by constituting a balanced asset composition in compliance with the structure of fixed and floating rate of funding resources.

The hedging strategies for other foreign exchange risk exposures:

A stable foreign exchange position strategy is implemented and to be secured from cross currency risk, the current foreign exchange position is monitored by considering a currency basket in specific foreign currencies.

The foreign exchange gains and losses on foreign currency transactions are accounted for in the period of the transaction. Foreign exchange assets and liabilities are translated to Turkish Lira using foreign exchange bid rate as of the reporting date, and the resulting gains and losses are recorded in foreign exchange gains or losses.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

III. Explanations on forward and option contracts and derivative instruments

The Bank is exposed to financial risk which depend on changes in foreign exchange rates and interest rates due to activities and as part of banking activities uses derivative instruments to manage financial risk that especially associated with fluctuations in foreign exchange and interest rate. Mainly derivative instruments used by the Bank are foreign currency forwards, swaps and option agreements.

The derivative financial instruments are accounted for at their fair values as of the date of the agreements entered into and subsequently valued at fair value. The derivatives instruments including both economic hedges and derivatives specified as hedging items are classified as either “trading purposes” or “hedging purposes” as per the Turkish Accounting Standards (“TAS 39”) “Financial Instruments: Recognition and Measurement”.

When a derivative financial instrument, is originally designed as a hedge by the Bank, the relationship between the Bank's financial risk from hedged item and the hedging instrument, the risk management objectives and strategy of hedging transaction and the methods that will be used in the measurement of effectiveness, describe in written. The bank, at the beginning of the aforementioned engagement and during the ongoing process, evaluates whether the hedging instruments are effective on changes in the fair values or actual results of hedging are within the range of 80% - 125%.

IV. Explanations on interest income and expenses

Interest income and expenses are recognized in the income statement for all interest bearing instruments on an accrual basis using the effective interest method (the rate that equalizes the future cash flows of financial assets and liabilities to the current net book value).

In accordance with the related regulation, realized and unrealized interest accruals of the non-performing loans are reversed and interest income related to these loans are recorded as interest income only when collected.

V. Explanations on fees and commission income and expenses

Fees and commissions received from loans, that are not an integral part of the effective interest rate, and fees for various banking services are recorded as income when collected. Fees and commissions paid for the funds borrowed, which are not integral parts of the effective interest rate of the funds borrowed, are recorded as expense on the date of the payment. The fees and commission income and expenses obtained from cash and non-cash loans are recorded under income and expense accounts in the related period by discounting with effective interest method according to matching principle.

VI. Explanations on financial assets

Financial instruments comprise financial assets, financial liabilities and derivative instruments. Financial instruments constitute the both of the Bank's trading activities and operations. Risks related with these instruments constitutes majority of total risks. Financial instruments affect liquidity, market, and credit risks on the Bank's balance sheet in all respects. The Bank trades these instruments on behalf of its customers and on its own behalf.

Basically, financial assets create the majority of the commercial activities and operations of the Bank. These instruments expose, affect and diminish the liquidity, credit and interest risks in the financial statements.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VI. Explanations on financial assets (Continued)

All regular way purchases and sales of financial assets are recognized on the settlement date i.e. the date that the asset is delivered to or by the Bank. Settlement date accounting requires (a) accounting of the asset when acquired by the institution, and (b) disposing of the asset out of the balance sheet on the date settled by the institution; and accounting of gain or loss on disposal. In case of application of settlement date accounting, the entity accounts for the changes that occur in the fair value of the asset in the period between commercial transaction date and settlement date as in the assets that the entity settles.

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Changes in fair value of assets to be received during the period between the trade date and the settlement date are accounted for in the same way as the acquired assets.

Fair value differences are not accounted for assets presented at cost or amortized cost; gain or loss of financial assets at fair value through profit and loss are reflected in the income statement, gain or loss of available for sale assets are accounted for under the shareholders' equity.

The methods and assumptions used in determining the reasonable estimated values of all of the financial instruments are explained below.

Cash, Banks and Other Financial Institutions:

Cash and cash equivalents comprise cash in vault and foreign currency cash. Foreign currency cash and foreign currency deposits are reflected to balance sheet in TL which is translated in accordance with prevalent exchange rate on reporting date. The book values of these assets approximate to their fair values.

Marketable Securities:

The Bank classifies its marketable securities in 3 groups:

Financial assets at fair value through profit and loss: These transactions are classified in two categories. (i) Trading securities for the purposes of short term profit taking through sale or buying back in a near future. (ii) The financial assets classified at the inception as financial assets at fair value through profit or loss by the Bank.

The Bank uses such classification above when permitted or for the purposes of providing a more proper disclosure.

In this category, trading securities are initially recognized at cost and measured at fair value on the financial statements. Fair values of securities that are traded in an active market are determined based on quoted prices or current market prices.

Gains or losses resulting from such valuation are recorded in the profit and loss accounts. As per the explanations of the Uniform Code of Accounts (UCA), any positive difference between the historical cost and amortized cost of financial assets are booked under the "Interest Income" account, and in case the fair value of the asset is over the amortized cost, the positive difference is booked under the "Gains on Securities Trading" account. If the fair value is under the amortized cost, the negative difference is booked under the "Losses on Securities Trading" account. Any profit or loss resulting from the disposal of those assets before their maturity date is recognized within the framework of the same principles.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VI. Explanations on financial assets (continued)

Available for sale financial assets are initially recognized at cost including the transaction costs. The interest income related to securities with fixed and variable interest under available for sale financial assets are recorded in interest income. After the initial recognition, available for sale securities are measured at fair value and the unrealized gain/loss originating from the difference between the amortized cost and the fair value is recorded in “Marketable Securities Value Increase Fund” under the equity. All unquoted available for sale stocks are recorded by considering impairment, since respective fair values cannot be reliably measured. At the disposal of available for sale financial assets, value increases/decreases that are recorded in the securities value increase fund under equity are transferred to income statement.

Investments held to maturity include securities with fixed or determinable payments and fixed maturity where there is an intention of holding till maturity and the relevant conditions for fulfilment of such intention, including the funding ability. This portfolio excludes loans and receivables. After initial recognition held to maturity investments are measured at amortized cost by using internal rate of return less impairment losses, if any. Interest income earned from held-to-maturity investments is recognized as interest income on income statement.

The Bank considered expected inflation index of future cash flows prevailing at the reporting date while calculating internal rate of return of the CPI indexed marketable securities. The effect of this application is accounted as interest received from marketable securities in the unconsolidated financial statements.

Explanations on investments in associates and subsidiaries

Investments in associates and subsidiaries are recognized within the scope of “TAS 27-Separate Financial Statements”. Investments in subsidiaries, whose shares are traded in an active market (stock market), are shown in the financial statements with their fair values by taking into account their prices recorded in the related market (stock market). Investments in subsidiaries and associates, whose shares are not traded in an active market (stock market) and fair value is not determined reliably, are followed at their cost of acquisition and these assets are shown in the financial statements with their cost values after the deduction of, if any, impairment losses.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VI. Explanations on financial assets (continued)

Loans:

Loans are financial assets which have fixed payment terms and are not traded.

Loans are initially recognized at cost and measured at amortized cost by using effective interest rate. The duties, charges and other expenses paid for the collaterals obtained against loans are accepted as part of transaction costs and reflected to customers.

Turkish Lira ("TL") cash loans are composed of foreign currency indexed loans and working capital loans; foreign currency ("FC") cash loans are composed of investment loans, export financing loans and working capital loans.

Foreign currency indexed loans are converted into TL from the foreign currency rate as of the opening date and followed in TL accounts. Repayments are measured with the foreign currency rate at the payment date, the foreign currency gains and losses are reflected to the income statement.

Provision is set for the loans that may be doubtful and the amount is charged in the current period income statement as well as their classification to non-performing loans as per the related regulations. The collections made related to loans including those on non-performing loans for which provision is made in the current period are recorded in "Provision for Loans and Other Receivables (including received from Loans and receivables with doubtful collectability)" and "Interest Received from Non-performing Loans" account.

Releases of loan loss provisions are recorded by reversing the provisions booked during the year and the collections made related to loan losses previously accounted for are recorded to collections related to the prior period expenses.

VII. Explanations on impairment on financial assets

At each reporting date, the Bank evaluates the carrying amounts of its financial asset or a group of financial assets to determine whether there is an objective indication that those assets have suffered an impairment loss. If any such indication exists, the Bank determines the related impairment.

A financial asset or a financial asset group incurs impairment loss only if there is an objective evidence related to the occurrence of one or more than one event ("loss event") after the first recognition of that asset; and such loss event (or events) causes, an impairment as a result of the effect on the reliable estimate of the expected future cash flows of the related financial asset and asset group. Irrespective of high probability the expected losses for future events are not recognized.

Loans are classified and followed in line with the provisions of the "Regulation on Identification of Loans and Other Receivables and Provisioning against Them", published on the Official Gazette No: 26333 dated 1 November 2006. Specific provision is allocated for the total amount of loans and other receivables, which is deemed non-performing, without being restricted by the minimum legal requirements stated in the related regulation, and such specific provisions are recognized in the income statement. The provisions, which are released within the same year, are credited to the "Provision Expenses" account and the released parts of the provisions from the previous years are transferred to and recognized in the "Other Operating Income" account.

Other than specific provisions, the Bank provides general provision for loans and other receivables classified in accordance with the Regulation on Identification of and Provision against Non-Performing Loans and Other Receivables.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VIII. Explanations on offsetting of financial assets and liabilities

Financial assets and liabilities are offset when the Bank has a legally enforceable right to set off, and when the Bank has the intention of collecting or paying the net amount of related assets and liabilities or when the Bank has the right to offset the assets and liabilities simultaneously. Otherwise, there is not any offsetting transaction about financial assets and liabilities.

IX. Explanations on sales and repurchase agreements and lending of securities

Funds provided under repurchase agreements are accounted under “Funds Provided under Repurchase Agreements-TL” and “Funds Provided under Repurchase Agreements-FC” accounts.

The repurchase agreements of the Bank are based on the Eurobonds and government bonds issued by Republic of Turkey Undersecretariat of Treasury. Marketable securities subject to repurchase agreements are classified under fair value profit or loss available for sale or held to maturity financial asset with parallel to classifications of financial instruments. The income and expenses from these transactions are reflected to the interest income and interest expense accounts in the income statement. Receivables from reverse repurchase agreements are recorded in “Receivables from Reverse Repurchase Agreements” account in the balance sheet.

X. Explanations on assets held for sale and discontinued operations

Assets held for sale are measured at the lower of the assets’ carrying amount and fair value less costs to sell. Held for sale assets are not amortized and presented separately in the financial statements. In order to classify an asset as held for sale, only when the sale is highly probable, experienced quite often and the asset (or disposal group) is available for immediate sale in its present condition. Assets held for sale are measured at the lower of the assets’ carrying amount and fair value less costs to sell. Held for sale assets are not amortized and presented separately in the financial statements. In order to classify an asset as held for sale, only when the sale is highly probable, experienced quite often and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale. Highly saleable condition requires a plan by the management regarding the sale of the asset to be disposed (or else the group of assets), together with an active program for determination of buyers as well as for the completion of the plan. Also the asset (or else the group of assets) shall be actively marketed in conformity with its fair value. On the other hand, the sale is expected to be journalized as a completed sale within one year after the classification date; and the necessary transactions and procedures to complete the plan should demonstrate the fact that the possibility of making significant changes or cancelling the plan is low. Various circumstances and conditions could extend the completion period of the sale more than one year. If such delay arises from any events and conditions beyond the control of the entity and if there is sufficient evidence that the entity has an ongoing disposal plan for these assets, such assets (or else group of assets) are continued to be classified as assets held for sale (or else group of assets).

A discontinued operation is a division that is either disposed or held for sale. Results of discontinued operations are included separately in the income statement.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XI. Explanations on goodwill and other intangible assets

Goodwill arising on the acquisition of a subsidiary or a jointly controlled entity represents the excess of the cost of acquisition over the subsidiary or jointly controlled interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the subsidiary or jointly controlled entity recognized at the date of acquisition. Goodwill is initially recognized as an asset at cost and is subsequently measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill is allocated to each of the cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in a subsequent period. On disposal of a subsidiary or a jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

As of reporting date, The Bank has no goodwill on the unconsolidated financial statements.

Intangible assets that are acquired prior to 1 January 2005 are carried at restated historical cost as of 31 December 2004; and those acquired subsequently are carried at cost less accumulated amortization, and any impairment. Intangible assets are depreciated over their expected useful lives. Depreciation method and period are reviewed periodically at the end of each year. Intangible assets are mainly composed of rights and they are depreciated principally on a straight-line basis between 1-15 years.

XII. Explanations on tangible assets

Tangible assets rather than real estate, purchased before 1 January 2005, are accounted for at their restated costs as of 31 December 2004 and the assets purchased in the following periods are accounted for at acquisition cost less accumulated depreciation and reserve for impairment. Gain or loss resulting from disposals of the tangible assets is reflected to the income statement as the difference between the net proceeds and net book value. Normal maintenance and repair expenditures are recognized as expense.

As of the third quarter of 2015, the Bank changed its accounting policy and adopted revaluation method on annual basis under scope of Standard on Tangible Fixed Assets (TAS 16) with respect to valuation of immovable included in its building and lands. The amortization periods of real estates are specified in the appraisal's report. In case of the cost of tangible assets over the net realizable value estimated under the "Turkish accounting standards for impairment of assets" (TAS 36), the value of the asset is reduced to its "net realizable value" and are reserved impairment provision associated with expense accounts. The positive difference between appraisement value and net book value of the property is accounted under shareholder' equity.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XII. Explanations on tangible assets (continued)

There is no pledge, mortgage or any other lien on tangible assets. Tangible assets are depreciated with straight-line method and their useful lives are determined in accordance with the Turkish Accounting Standards. Depreciation rates and estimated useful lives of tangible assets are as follows.

Tangible Assets	Expected Useful Lives (Years)	Depreciation Rate (%)
Cashboxes	4-50	2-25
Vehicles	5	20
Other Tangible Assets	1-50	2-100

XIII. Explanations on leasing transactions

The Bank as Lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the Bank's net investment in the leases. The lease payments are allocated as principle and interest. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Bank's net investment outstanding in respect of the leases.

The Bank as Lessee

Assets held under finance leases are recognized as assets of the Bank at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are included in profit or loss in accordance with the Bank's general policy on borrowing costs. Tangible assets acquired by financial leases are amortized based on the useful lives of the assets.

XIV. Explanations on provisions and contingent liabilities

Provisions are recognized when there is a present obligation due to a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If aforesaid criteria did not form, the Bank discloses the issues mentioned in notes to financial statements. Provisions are determined by using the Bank's best expectation of expenses in fulfilling the obligation, and discounted to present value if material.

Explanations on contingent assets

Contingent assets consist of unplanned or other unexpected events that usually cause a possible inflow of economic benefits to the Bank. Since recognition of the contingent assets in the financial statements would result in the accounting of an income, which may never be generated, the related assets are not included in the financial statements; on the other hand, if the inflow of the economic benefits of these assets to the Bank is probable, an explanation is made thereon in the footnotes of the financial statements. Nevertheless, the developments related to the contingent assets are constantly evaluated and in case the inflow of the economic benefit to the Bank is almost certain, the related asset and the respective income are recognised in the financial statements of the period in which the change occurred.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XV. Explanations on liabilities regarding employee benefits

Under Turkish law and union agreements, lump sum payments are made to employees retiring or involuntarily leaving the Bank. In retirement and involuntarily leaving, the Bank records the present value of the defined benefit obligation. There is no indemnity obligations related to the employees who are employed with contract of limited duration exceeding 12 month period. Actuarial gains and losses are accounted under Shareholder's Equity since 1 January 2013 in accordance with the Revised TAS 19.

Employees of the Bank are members of “Türkiye Sınai Kalkınma Bankası Anonim Şirketi Memur ve Müstahdemleri Yardım ve Emekli Vakfı” and “Türkiye Sınai Kalkınma Bankası A.Ş. Mensupları Munzam Sosyal Güvenlik ve Yardımlaşma Vakfı” (“the Pension Fund”). Technical financial statements of those funds are subject to audit in accordance with the Insurance Law and provisions of “Regulations on Actuaries” issued based on the related law by an actuary registered in the Actuarial Registry.

Paragraph 1 of the provisional Article 23 of the Banking Act (“Banking Act”) No: 5411 published in the Official Gazette No: 25983 on 1 November 2005 requires the transfer of banking funds to the Social Security Institution within 3 years as of the enactment date of the Banking Act. Under the Banking Act, in order to account for obligations, actuarial calculations will be made considering the income and expenses of those funds by a commission consisting of representatives from various institutions. Such calculated obligation shall be settled in equal instalments in maximum 15 years. Nonetheless, the related Article of the Banking Law was annulled by the Constitutional Court’s decision No: E. 2005/39 and K. 2007/33 dated 22 March 2007 that were published in the Official Gazette No: 26479 on 31 March 2007 as of the release of the related decision, and the execution of this article was cancelled as of its publication of the decision and the underlying reasoning for the cancellation of the related article was published in the Official Gazette No: 26731 on 15 December 2007.

After the publication of the reasoning of the cancellation decision of the Constitutional Court, articles related with the transfer of banks pension fund participants to Social Security Institution based on Social Security Law numbered 5754 were accepted by the Grand National Assembly of Turkey on 17 April 2008 and published in the Official Gazette No: 26870 on 8 May 2008.

Present value for the liabilities of the transferees as of the transfer date would be calculated by a commission that involves representatives of Social Security Institution, Ministry of Finance, Turkish Treasury, State Planning Organization, BRSA, SDIF, banks and banks’ pension fund institutions and technical interest rate, used in actuarial account, would be 9,80%. If salaries and benefits paid by the pension fund of banks and income and expenses of the pension funds in respect of the insurance branches, stated in the Law, exceeds the salaries and benefits paid under the regulations of Social Security Institution, such differences would be considered while calculating the present value for the liabilities of the transferees and the transfers are completed within 3 years beginning from 1 January 2008.

According to the provisional Article 20 of 73th article of Law No. 5754 dated 17 April 2008, has become effective on 8 May 2008 and was published in the Official Gazette No: 26870, transfer of Pension Funds to Social Security Institution in three years has been anticipated. Related resolution of the Council of Ministers related to four-year extension was published in the Official Gazette No: 28227 dated 8 March 2012. It has been resolved that the transfer process has been extended two year with Council of Ministers’ Decree, has become effective on 9 April 2011 and was published in the Official Gazette No: 27900. The transfer had to be completed until 8 May 2013. Accordingly, it has been resolved that, one more year extension with Council of Minister Decree No: 2013/467, has become effective on 3 May 2013 and was published in the Official Gazette No: 28636 and transfer need to be completed until 8 May 2014. However, it has been decided to extend the time related to transfer by the decision of Council of Minister published in the Official Gazette No: 28987 dated 30 April 2014 for one more year due to not to realize the transfer process.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş.
NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XV. Explanations on liabilities regarding employee benefits (continued)

In accordance with the Health and Safety Law which became effective on 4 April 2015 and published in the Official Gazette No: 29335 and dated 23 April 2015 and together with some amendments and statutory decree, Council of Ministers authorized for the determination of transfer date to the Social Security institution and the transfer of Pension Fund was postponed to an unknown date. There is no decision taken by the Cabinet with regards to issue at the date of financial statements.

Unmet social benefits and payments of the pension fund participants and other employees that receive monthly income although they are within the scope of the related settlement deeds would be met by pension funds and the institutions employ these participants after the transfer of pension funds to the Social Security Institution.

The present value of the liabilities, subject to the transfer to the Social Security Institution, of the Pension Fund as of 31 December 2016 has been calculated by an independent actuary in accordance with the actuarial assumptions in the Law and as per actuarial report dated 13 January 2017, as of 31 December 2016, there is no technical or actual shortage requiring provision.

In addition, the Bank's management anticipates that any liability that may come out during the transfer period and after, in the context expressed above, would be financed by the assets of the Pension Fund and would not cause any extra burden on the Bank.

XVI. Explanations on taxation

The income tax charge is composed of the sum of current tax and deferred tax.

The current tax liability is calculated over taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible and it further excludes items that are never taxable or deductible. Liability for current tax is calculated using tax rates that have been enacted by the reporting date.

Deferred tax asset or liability is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and currently enacted tax rates are used to determine deferred tax on income. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax asset is not allocated over the amount of general provisions and provisions for other in accordance with the circular of BRSA dated 8 December 2004 no. BRSA.DZM.2/13/1-a-3.

Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date. Deferred tax is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized and reflected in the income statement as expense or income. Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is also associated directly with equity. Deferred tax assets and liabilities are also offset.

According to the second paragraph of the Article 53 of the Banking Act No. 5411 dated 19 October 2005, all specific reserves for loans and other receivables are considered as deductible expense for determining corporate tax base.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017
(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVI. Explanations on taxation (continued)

Transfer pricing

Transfer pricing is regulated through article 13 of Corporate Tax Law titled “Transfer Pricing through camouflage of earnings”. Detailed information for the practice regarding the subject is found in the “General Communiqué Regarding Camouflage of Earnings Through Transfer Pricing”. According to the aforementioned regulations, in the case of making purchase or sales of goods or services with relevant persons/corporations at a price that is determined against “arm’s length principle”, the gain is considered to be distributed implicitly through transfer pricing and such distribution of gains is not subject to deductions in means of corporate tax.

XVII. Additional explanations on borrowings

The Bank borrows funds from domestic and foreign institutions borrowing from money market and issues marketable securities in domestic and foreign markets when needed.

The funds borrowed are recorded at their purchase costs and valued at amortised costs using the effective interest method. Some of the funds issued by the Bank and resources used with fixed interest rates are subject to fair value hedge accounting

While the credit risk and rediscounted accumulated interest on hedging liabilities are recorded in the income statement under the interest expense, the credit risk and net amount excluding accumulated interest results from hedge accounting are monitored in the income statement under the derivative financial instruments gains/losses by fair value.

All other borrowing costs are recorded to the income statement at the period they are incurred.

XVIII. Explanations on share certificates issued

In the meeting of the General Assembly held on 23 March 2017, it has been resolved that, paid-in capital of the Bank will be increased from TL 2.050.000 to TL 2.400.000 by adding TL 350.000. In respect of the resolution of the General Assembly, all of this increase will be incorporated from the profit of the year 2016. The increase in paid-in capital was approved by the BRSA on 27 April 2017 and disclosed in the dated 12 June 2017 and numbered 9345 Turkish Trade Registry Gazette.

In the meeting of the General Assembly held on 24 March 2016, it has been resolved that, paid-in capital of the Bank will be increased from TL 1.750.000 to TL 2.050.000 by adding TL 300.000. In respect of the resolution of the General Assembly, all of this increase will be incorporated from the profit of the year 2015. The increase in paid-in capital was approved by the BRSA on 6 May 2016 and disclosed in the dated 4 July 2016 and numbered 9110 Turkish Trade Registry Gazette.

XIX. Explanations on acceptances

Acceptances are realized simultaneously with the payment dates of the customers and they are presented as commitments in the off-balance sheet accounts.

XX. Explanations on government incentives

The Bank does not use government incentives.

Details on Subordinated Liabilities:

Issuer	Türkiye Sınai Kalkınma Bankası A.Ş.
Unique identifier (eg CUSIP, ISIN etc.)	XS1584113184
Governing law(s) of the instrument	BRSA, Cominque on Subordinated Liabilities of CMB numbered CMB-II-31.1, SEC, Turkish Law
Regulatory treatment	
Transitional Basel III rules	No
Eligible at stand-alone / consolidated	Stand-alone - Consolidated
Instrument type (Types to be specified by each jurisdiction)	Secondary subordinated loan which is categorized in subordinated loans equalling bill of exchanges
Amount recognised in regulatory capital (Currency in mil, as of most recent reporting date – Million USD)	300
Par value of instrument (Million USD)	300
Accounting classification	347011 (Liability) - Subordinated Loans
Original date of issuance	28 March 2017
Perpetual or dated	Dated
Original starting and maturity date	28 March 2017 - 29 March 2027 (10 years)
Issuer call subject to prior supervisory approval	Yes
Optional call date, contingent call dates and redemption amount	After 5th year
Subsequent call dates, if applicable	After 5th year only for once
Fixed or floating dividend/coupon	Fixed
Coupon rate and any related index	%7,625
Existence of a dividend stopper	None
Fully discretionary, partially discretionary or mandatory	None
Existence of step up or other incentive to redeem	None
Noncumulative or cumulative	Noncumulative
Convertible or non-convertible	
If convertible, conversion trigger (s)	None
If convertible, fully or partially	None
If convertible, conversion rate	None
If convertible, mandatory or optional conversion	None
If convertible, specify instrument type convertible into	None
If convertible, specify issuer of instrument it converts into	None
Write-down feature	
If write-down, write-down trigger(s)	According to number 5411 article, 71th article of Law of Banking and number 6102 article of Turkish Code of Commerce, if BRSA has seem in case of default.
If write-down, full or partial	Full or Partial
If write-down, permanent or temporary	Permanent
If temporary write-down, description of write-up mechanism	None
Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	After the senior creditors, before the TIER 1 subdebt, same with TIER 2.
In compliance with article number 7 and 8 of "Own fund regulation"	Based on the conditions written on 8th article.
Details of incompliances with article number 7 and 8 of "Own fund regulation"	Not based on the conditions written on 7th article.

SECTION FOUR (Continued)

INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

II. Explanations related to currency risk

No long or short position is taken due to the uncertainties and changes in the markets therefore; no exposure to foreign currency risk is expected. However, possible foreign currency risks are calculated on a monthly basis under the standard method in the foreign currency risk table and their results are reported to the official authorities and the Bank's top management. Thus, foreign currency risk is closely monitored. Foreign currency risk, as a part of general market risk, is also taken into consideration in the calculation of Capital Adequacy Standard Ratio.

No short position is taken regarding foreign currency risk, whereas, counter position is taken for any foreign currency risks arising from customer transactions as to avoid foreign currency risk.

Announced current foreign exchange buying rates of the Bank as at reporting date and the previous five working days in US Dollar and Euro are as follows:

	1 US Dollar	1 Euro
The Bank's "Foreign Exchange Valuation Rate"		
30 September 2017	3,5375	4,1651
Prior Five Workdays:		
29 September 2017	3,5375	4,1651
28 September 2017	3,5650	4,1785
27 September 2017	3,5200	4,1455
26 September 2017	3,5175	4,1455
25 September 2017	3,4725	4,1430

Simple arithmetic thirty-day averages of the US Dollar and Euro buying rates of the Bank before the reporting date are full TL 3,4422 and 4,1023; respectively.

(5) Marketable securities valuation increase fund amounting to TL 19.066 and exchange rate differences arising from derivative transactions amounting to TL 56.308 have not been included in "Other Liabilities". Borrower funds amounting TL 24.654 based on foreign currencies have been included in "Other Liabilities".

(6) In balance sheet, secondary subordinated loan which is categorized in subordinated loans equalling bill of exchanges are contained.

(7) Has no effect on net off-balance sheet position.

SECTION FOUR (Continued)

INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

III. Explanations related to interest rate risk

Interest rate sensitivity of the assets, liabilities and off-balance sheet items are measured by the Bank. General and specific interest rate risk tables in the standard method, by including assets and liabilities, are taken into account in determination of Capital Adequacy Standard Ratio and to calculate the overall interest rate risk of the Bank.

Forecast results, which have been formed using estimation-simulation reports are prepared and then the effects of fluctuations in interest rates are evaluated with sensitivity and scenario analysis. Cash requirement for every maturity period are determined based on maturity distribution analysis (Gap). In addition, a positive spread between the yield on assets and the cost of liabilities is kept while determining interest rates.

The amount of local borrowings is very low considering the total liabilities of the Bank. As the Bank is a development and investment bank, it obtains most of the funding from abroad.

The fluctuations in interest rates are controlled with interest rate risk tables, gap analysis, scenario analysis and stress tests, its effect in assets and liabilities and the probable changes in cash flows are being screened. The Bank screens many risk control ratios including the markets risk ratio to the sum of risk weighted assets and the ratio of the value at risk calculated as per the internal model to the equity.

Under the scope of risk policies, continuous controls are made to prevent assets or shareholders' equity from adverse effects because of fluctuations in interest rates or liquidity difficulties and top management, the Board of Directors and the Audit Committee are informed of these risks.

SECTION FOUR (Continued)**INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)****IV. Explanations related to stock position risk**

The Bank is exposed to equity shares risk arising from investments on firms traded in Borsa Istanbul (BIST). Share certificate investments are almost used for trading purpose. However, these investments are not actively bought/sold by the Bank. The Bank classified its share certificate investments both as available for sale and as trading securities and net profit/loss of the Bank is not affected unless the Bank sell share certificates in portfolio of available for sale.

Equity shares risk due from banking book

Below is the comparison table of the Bank's share certificate instruments' book value, fair value and market value.

Current Period	Comparison		
Share Certificate Investments	Book Value	Fair Value	Market Value
Investment in Shares-Grade A	279.485	-	279.485
Quoted	279.485	-	279.485
Investment in Shares-Grade B	87.243	-	87.243
Quoted	87.243	-	87.243

Prior Period	Comparison		
Share Certificate Investments	Book Value	Fair Value	Market Value
Investment in Shares-Grade A	224.536	-	224.536
Quoted	224.536	-	224.536
Investment in Shares-Grade B	69.496	-	69.496
Quoted	69.496	-	69.496

On the basis of the following table, private equity investments in sufficiently diversified portfolios, type and amount of other risks, cumulative realized gains and losses arising from selling and liquidation in the current period, total unrealized gains and losses, total revaluation increases of trading positions on stock market and their amount that included to core capital and supplementary capital are shown.

V. Explanations related to the liquidity risk management and liquidity coverage ratio

The Bank's future cash flows and current positions are taken into consideration for managing the market and liquidity risks. The Bank does not invest into illiquid markets and instruments. The liquidity ratios are followed up and the maturity match and the coverage of liquidity need are targeted in the context of asset-liability management. Although the Bank started to perform tests to calculate liquidity risk with internal models, the risk is still followed up basically by arranging the risks with respect to (holding period) data.

For the purpose of meeting the liquidity requirement, the Bank chooses one of the four or more of the following; disposing liquid assets, increasing short-term borrowing, decreasing illiquid assets or increasing capital. The Bank's liquidity management is implemented by meeting all the obligations on time considering the Bank's reputation. The cash flow projections and the fund requirement predictions are made by using adverse scenarios to determine liquidity risk under urgent and unexpected circumstances.

The difference in interest rates of assets and liabilities are on behalf of assets as can be seen from the table of interest rate risk. The inconsistency positively affects the profitability and is controlled by the management with regular reports. The Bank meets its short term liquidity requirements with repurchase agreements and inter-bank money market operations. The Bank may also use its available for sale portfolio for urgent liquidity requirement. The Bank meets its long term liquidity needs from the international institutions through borrowings. The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Bank. For the purposes of monitoring and assessing the liquidity position of the Bank's assets and liabilities, the liquidity rate is weekly calculated.

SECTION FOUR (Continued)

INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

V. Explanations related to the liquidity risk management and liquidity coverage ratio (continued)

I. Explanations related to the unconsolidated liquidity risk

1.a Information about the governance of unconsolidated liquidity risk management, including: risk tolerance; structure and responsibilities for unconsolidated liquidity risk management; internal unconsolidated liquidity reporting; and communication of unconsolidated liquidity risk strategy, policies and practices across business lines and with the board of director

Bank's risk capacity for liquidity risk is determined by Bank's internal limits and the regulations on liquidity coverage ratio and liquidity adequacy. As per The Regulation on The Calculation of Liquidity Coverage Ratio, minimum limits of 100% and 80% are assigned on consolidated and unconsolidated basis respectively for total and foreign currency limits while the implementation process is identified by BRSA as setting the limits respectively as 60% and 40% for 2015 and increasing 10 pts per year until 2019 whereas applying this limit as zero per cent for development and investment banks until January 1, 2018.

As per the regulation on liquidity adequacy, development and investment banks, including TSKB, are subject to maintaining the liquidity adequacy ratios above 100% and 80% respectively for total and foreign currency limits both on weekly and monthly basis. In addition, the calculated daily over stock values regardless of maturity ratios' basic arithmetic mean includes 14 days may not be less than 7%.

Regarding it's risk appetite, in addition to legal limits, Bank also applies internal limits for monitoring and controlling the liquidity risk. In this context, it is limited by minimum 25% for the ratio of cash inflow to cash outflow, and by minimum 20% for the ratio of the difference between total inflow and total outflow to total asset within three months' term. It is determined the base limit as 15% for Liquidity ratio (Liquid Asset/ Total Asset). Also for liquidity adequacy ratios on weekly and monthly basis, the capacity risk rating is set as 110%, that is 10% above legal limit, the level of risk appetite as 115% and the risk limit as 120%. Regarding the total liquidity coverage ratio, at the same level as the legal limit, it is determined the capacity risk as 0%, the risk appetite as 40% and the risk limit as 50%.

Internal limits are applied on concentrations basis for single currency, single security and single instrument for the Bank's Treasury placements within Treasury Risk Limits, in purpose of decreasing the liquidity risk related to concentration risk.

Liquidity risk management is conducted by Treasury department in line with the strategies set by Asset and Liability Committee within The Risk Management Policies approved by Board of Directors, and is monitored through reportings from Risk Management, Budget Planning and Financial Control Departments to Audit Committee, Board of Directors, Senior Management and relevant departments.

Asset and Liability Committee has the responsibility of taking the relevant decisions regarding optimal balance sheet management, monitoring the implementations and functions under The General Instruction of Asset and Liability Committee Duties and Responsibilities. The committee that constitutes of Chief Executive Officer, Executive Vice Presidents of Corporate Banking, Treasury, Budget Planning and Department Heads of Corporate Banking, Project Finance, Treasury, Development Finance Institutions, Financial Institutions and Budget Planning and Investor Relations evaluates the market, regulations, cash flow and asset and liability management on monthly basis. Budget Planning and Investor Relations Department is responsible for consolidating the reports to be submitted to Committee, organizing, having signed and archiving the Committee moments and informing the Committee members.

SECTION FOUR (Continued)

INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

V. Explanations related to the liquidity risk management and liquidity coverage ratio (continued)

I. Explanations related to the unconsolidated liquidity risk (continued)

1.a Informations about the governance of unconsolidated liquidity risk management, including: risk tolerance; structure and responsibilities for unconsolidated liquidity risk management; internal unconsolidated liquidity reporting; and communication of unconsolidated liquidity risk strategy, policies and practices across business lines and with the board of director (continued)

Bank cash management process connotes, within the precedence of fulfilling the future financial obligations and subsequent to credit, placement and borrowing activities, the utilization of the cash position with the highest return in line with the Bank policies and during the liquidity shortfall periods providing funding from the market with the most convenient and low-cost product. Treasury Department carries out this responsibility within the scope of Bank policies, decisions taken in Asset Liability Committees and the limits supplied by Board of Directors. In liquidity shortfall periods, Treasury Department is entitled to provide funding through money market transactions, secured lending or repo transactions. In case of funding except with those products, borrowing transactions are executed with the cooperation of Treasury and Financial Institutions Departments.

Risk Management Department reports to Board of Directors and Asset and Liability Committee on monthly basis regarding the liquidity gap, the legal limits and the internal limits assigned by Board of Directors. Also liquidity stress tests are performed based on various scenarios and reported with their impact on legal limit utilization. Committee evaluates the Bank's one year-term cash position under several assumptions and loan facility projections on monthly basis, it determines strategy for fulfilling it's financial obligations timely and utilizing the idle funds efficiently.

MIS reportings for Treasury Department are conducted by Treasury Control Unit under Budget Planning and Investor Relations Department. Within this scope Treasury Control Unit shares liquidity projections by taking into consideration liquidity position of bank for following week's and three months' cashflows on weekly basis. On monthly basis, cashflow projections on local currency and foreign currency are reported to Asset Liability Committee.

1.b Information on the centralization degree of unconsolidated liquidity management and funding strategy and the functioning between the Bank and the Bank's subsidiaries

There is no liquidity management structure requiring centralization between the Bank and it's subsidiaries.

1.c Information on the Bank's funding strategy including the policies on funding types and variety of maturities

Among the main funding sources of the Parent Bank there are investment bank loans, capital market transactions, syndication loans, DFIs, repo transactions and money market transactions and for minimizing the liquidity risk, diversification on maximum scale with those products within the market conditions is pursued. The funding planning based on those loans is performed long term such as a minimum of one year and the performance is monitored by Asset Liability Committee.

1.ç Information on liquidity management on the basis of currencies constituting a minimum of five percent of the Bank's total liabilities:

Within the scope of the Bank's balance sheet management, local currency and foreign currency cashflows are monitored diversely. On principal, open position risk is managed actively as a part of liquidity risk management and in context of this strategy required hedging transactions are executed by Treasury Department.

SECTION FOUR (Continued)

INFORMATION ON FINANCIAL STRUCTURE AND RISK MANAGEMENT (Continued)

V. Explanations related to the liquidity risk management and liquidity coverage ratio (continued)

I. Explanations related to the unconsolidated liquidity risk (continued)

1.d Information on unconsolidated liquidity risk mitigation techniques

Unconsolidated Liquidity limits are defined for the purpose of monitoring and keeping the risk under predefined boundaries. The Bank monitors those limits' utilization and informs Board of Directors, Bank Senior Management and relevant departments regularly. Pursuant to that, the ratio of cash inflows to cash outflows within three months' term is limited to at least 25% whereas for the same term the ratio of the difference between total inflows and total outflows to total assets is limited to at most 20%. The base limit for Liquidity Ratio (Liquid Assets/Total Assets) is defined as 15%. Within those limits, Treasury Department performs the required transactions with the relevant cost and term composition under market conditions from the sources previously defined in Article C. Adequate limits to be utilized in a contingent case remains at the disposal before legal authority.

1.e Information on the use of stress tests

As part of unconsolidated liquidity stress tests, the Bank's compatibility with the legal limits under stress conditions is subject to probe. The legal limits assigned for liquidity risk management consists of five ratios derived from The Regulation on Liquidity Adequacy Ratio and liquidity coverage ratio derived from The Regulation on Liquidity Coverage Ratio. Stress tests are performed over those ratios' calculations by practicing liquidity shocks while assuming that the nonshocked components are held constant. Among liquidity stress tests, the risks arising from funding, intraday liquidity, marketable securities and concentration are addressed. Subject to those, the scenarios of possible funding shortage in Interbank Money Market, liquidity shortage that may arise in private sector and the risk originating from the Bank's loan portfolio due to the concentration risk are applied separately on overall portfolio of the Bank.

1.f General information on urgent and unexpected unconsolidated liquidity situation plans

There is a Contingency Funding Plan for the contingent periods that arises beyond the Bank's control. In a potential liquidity shortfall, Treasury Department is responsible from assessment, taking relevant actions and informing Asset and Liability Committee. In contingent cases, to identify the liquidity risk arising, cashflow projections and funding requirement estimations are exercised based on various scenarios. To assess the stress scenarios, cashflow in terms of local currency is monitored regularly by Treasury Department. Scenario analysis on the Bank's unencumbered sources are conducted daily. Transaction limits for organized markets are monitored timely and essential collateral amount to trade in those markets is withheld at hand. Repo transactions and/or available for sale portfolio securities in local and foreign currency that are major funding sources in shortfall periods for the Bank are monitored consistently. In contingent periods outflows due to the irrevocable commitments, contingencies and derivative transactions can be deferred temporarily in a way that won't hurt the Bank's reputation. TSKB has the optionality of choosing one or more of the following for meeting it's liquidity requirement that are selling liquid assets off, increasing short term borrowing, decreasing illiquid assets, increasing capital.

3. Minimum explanations related to the liquidity coverage ratio by Banks

3.a The major components affecting liquidity coverage ratio and the change in the contributing elements in time

Borrowing Securities that mainly comprised of government securities and Required Reserves are major components of High Quality Liquid Assets that affect unconsolidated Liquidity Coverage Ratio essentially. Regulation on the Amendment of "the Regulation on the Amendment of the Regulation on the Calculation of the Liquidity Covered Rate of Banks" published in the Official Gazette dated 15/08/2017 and numbered 30155 and the rate of consideration applied to the "Required Reserves" held in the Central Bank of the Republic of Turkey is increased from 50% to 100%. In line with market conditions and the decisions of the Bank's Treasury Department, the weight of TL and FC Borrowing Instruments items in Borrowing Instruments can change periodically.

3.b Information on the components of High Quality Liquid Assets

High Quality Liquid Assets mainly comprises of exposure to Central Bank, that is Required Reserves and Borrowing Securities, that are government securities.

3.c The components of funding and their proportion in overall

Main funding source of the Bank is long term loans attained from international financial institutions. The ratio of those loans in total funding is around 64% while 86% of it is provided under the guarantee of The Undersecretariat of Treasury of Turkish Republic. The average tenor of long term loans is 11 years. The total ratio of the securities issued in purpose of funding diversification and loans attained through syndication loans in overall borrowing is 24% and alternative funding sources such as repo and syndication loans are also available.

3.ç Cash outflows generating derivative transactions and informations about transactions are liable to warrant completing

The Bank's derivative transactions are mainly executed with the counterparties having ISDA and CSA agreements due to the client transactions and position hedging within Bank's balance sheet management. Those transactions are monitored through market valuation of the transactions with each of the counterparties. Collateralization with counterparties is executed on daily basis.

3.d Counterparty and product-based funding sources and collateral concentration limits on

The funding sources of the Bank, that's main business area is development banking, are international development banks and financial institutions in general. On counterparty and product basis there is no concentration limit.

3.e Taking into account the legal and operational liquidity transfer inhibiting factors, the needed funds and the unconsolidated liquidity risk exposure based on Banks itself, the branches in foreign countries and unconsolidated partnerships

None.

3.f Taken in the calculation of unconsolidated liquidity coverage ratio but not included in the disclosure template in the second paragraph and the information regarding the other cash inflows and cash outflows items which are thought to be related to the Bank's unconsolidated liquidity profile

None.

Total	32.051	874.808	161.276	616.771

(*) Deposits at Central Bank of Turkey held as reserve requirement.

As per the Communiqué numbered 2005/1 “Reserve Deposits” of the CBRT, banks keep reserve deposits at the CBRT for their TL and FC liabilities mentioned in the communiqué. Reserves are calculated and set aside every two weeks on Fridays for 14 days periods. The CBRT has started to pay interest to the Required Reserves held in Turkish Lira according to regulation released at 5 November 2014.

In accordance with the regulation issued at 27 January 2015, CBRT has began to collect monthly commissions over daily balances of Two Days Notice Deposit Accounts and Required Reserves held in the foreign currencies, to be valid from 1 February 2015. The CBRT Required reserves of 2 May 2015 has started to pay interest to the Required reserves, reserve options and unrestricted account held in US dollars according to regulation released at 5 May 2015.

As per the “Communiqué on Amendments to be Made on Communiqué on Required Reserves” of Central Bank of Turkey, numbered 2011/11 and 2011/13, required reserves for Turkish Lira and Foreign currency liabilities are set at Central Bank of Turkey based on rates mentioned below. Reserve rates prevailing at 30 September 2017 are presented in table below:

Reserve Rates for Turkish Lira Liabilities (%)	
Original Maturity	Reserve Ratio
Other liabilities until 1 year maturity (1 year included)	10,5
Other liabilities until 3 year maturity (3 year included)	7
Other liabilities more than 5 year maturity	4

Reserve Rates for FC Liabilities (%)		
Original Maturity	Reserve Ratio	Reserve Ratio
	If the fund borrowed Before 28.08.2015	If the fund borrowed After 28.08.2015
Other liabilities until 1 year maturity (1 year included)	19	24
Other liabilities until 2 year maturity (2 year included)	13	19
Other liabilities until 3 year maturity (3 year included)	7	14
Other liabilities until 5 year maturity (5 year included)	6	6
Other liabilities more than 5 year maturity	5	4

Options	-	34.064	-	125.627
Other	-	-	-	-
Total	166.089	121.771	125.819	249.626

Bank has entered into extinguishing cross-currency interest rate swaps as part of its strategy to hedge TL denominated fixed rate assets. These swap arrangements provide that, on the occurrence of certain credit-related events in relation to the company (such as failure to make a payment), the swap arrangements may immediately terminate with no further payments due and payable by either party. As of 30 September 2017, the fair value of such swaps is TL 84.956 with a total outstanding notional amount of USD 200 million. The average maturity of such swaps range between 2020 and 2022 years.

Capital	-	-
Net Available Capital	63.855	198.156

(*) The information is obtained from financial statements subject to consolidation as of 31 December 2016.

Paid in capital has been indicated as Turkish Lira in articles of incorporation and registered in trade registry. Effect of inflation adjustments on paid in capital is the difference caused by the inflation adjustment on shareholders' equity items. Extraordinary reserves are the status reserves which have been transferred with the General Assembly decision after distributable profit have been transferred to legal reserves. Legal reserves are the status reserves which have been transferred from distributable profit in accordance with the Article 519 of the Turkish Commercial Code numbered 6102.

The Bank's internal capital adequacy assessment process is made annually on a consolidated basis. Consolidated associates and subsidiaries are included in the operation.

Tax Audit Committee inspectors made an investigation for the years 2008-2011 about the payments made by the Bank and employees to “Türkiye Sınai Kalkınma Bankası A.Ş. Mensupları Munzam Sosyal Güvenlik ve Yardımlaşma Vakfı” (Foundation) established in accordance with the decisions of Turkish Commercial Law and Civil Law as made to all Foundations in the sector. According to this investigation it has been communicated that the amount Bank is obliged to pay is a benefit in the nature of fee for the members of Foundation worked at the time of payment, the amount Foundation members are obliged to pay should not been deducted from the basis of fee; accordingly tax audit report was issued with the claim that it should be taken penalized income tax surcharge / penalized stamp duty deducted from allowance and total amount of TL 17.325 tax penalty notice relating to period in question to Bank relying on this report.

The Bank assesses that the Bank’s practice is in compliance with the legislation and there is no legal basis for the tax administration’s suspended assessments, therefore, lawsuits have been filed against the subjected assessments in various tax courts in İstanbul, Ankara and İzmir. Some of the lawsuits are decided favourable, remaining of lawsuits are decided unfavourable by the tax courts of first instance. On the other hand, appeal and objection have been requested by the Bank against the decision of the Court with respect to the Bank and by the administration against the decision of the Court with respect to the administration and completion of appeal process is waited. The tax and penalty notices related to the decision of the tax court of first instance against the Bank are accrued by administration depending on legal process and as of 31 July 2014 the Bank has made total payments amounting to TL 22.091.

A similar case has been submitted to the Constitutional Court (AYM) in the form of individual remedies by the main shareholder of the parent Bank in relation to the parent Bank’s liabilities to pay, the Constitutional Court gave the decision with court file number 2014/6192. According to court decision published in the Official Gazette dated 21 February 2015 and numbered 29274, the assessments against the parent Bank was contrary to the principle of legality and the Bank’s property rights has been violated. This decision is considered to be a precedent for the Bank and an amount of TL 12.750 corresponding to the portion that the parent Bank was obliged to pay for the related period is recognised as income in the prior period.

According to Law Department of the Bank, other cases which are to the detriment of the bank has no significant effect on the financial statements.

5. Custodian and intermediary services:

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT (Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ASSESSMENTS OF THE BOARD CHAIRMAN FOR THE PERIOD

In the third quarter of the year, the global economic recovery driven by both developed and developing countries continued its pace. During the period, the tapering signals of the central banks of developed countries and emerging geopolitical risks led to short-term market fluctuations. However, improving growth outlook continue to support inflows to developing countries including Turkey. The US agenda is mainly occupied with the Fed's plans to shrink its balance sheet shortly, the interest rate hike and the long-expected tax reforms. In the European Union (EU), Euro has stood strong against the US Dollar despite the political elections reshaping the balance of power, the Brexit issue and the recent uncertainties such as the Catalanian referendum in Spain.

On the domestic front, the recently-announced economic growth data and leading macroeconomic indicators, coupled with the contribution from the Credit Guarantee Fund (CGF), point out to a reinvigorated domestic demand. The expected leading factors pertaining to the third quarter growth will be the strong domestic demand and the increased share of exports in growth following the recovery in foreign demand. Furthermore, the contribution of construction investments to growth is also on the rise. Considering the composition of growth, it is critically important that the share of manufacturing investments specifically for export purposes should increase to attain a sustainable and healthy growth in the upcoming period.

During the third quarter in which the Central Bank of the Republic of Turkey (TCMB) retained its firm stance in line with the course of inflation, the banking sector continued its successful operations. Loan growth started to decelerate in June after a majority of the CGF funds had been extended and reached 12% in the first nine months on a currency-adjusted basis. ROE in the sector stood at around 14%. Considering that the sector adds most of its profits to its equity and re-convert into loans, it is required for banks to ensure a certain level of ROE in order to create a healthy lending capacity.

Financial sector operations also serve to improve social welfare. Adding social issues such as women's employment as well as occupational health and safety to the range of its lending themes in 2017, TSKB lent USD 2 billion in the first nine months to maintain and increase its support to development. As it has been the case since its establishment, the Bank will continue to assume key roles in development and investment banking.

Sincerely,

Chairman of the Board
H. Ersin Özince

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT (Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ASSESSMENTS OF THE CHIEF EXECUTIVE OFFICER FOR THE PERIOD

The optimistic mood, which started to weigh on the global arena including Turkey, prevailed during the third quarter. The CGF introduced a reinvigorating momentum both in economy and in the banking sector. Macroeconomic indicators for September such as the capacity utilization rate and private sector confidence index point out to a more positive outlook in terms of production and investments in the upcoming period.

Banking sector continued its uninterrupted support to the economy and attained highly successful operational results with regard to growth and profitability in the first nine months. The sector not only attained a high growth in loans but also maintained its asset quality. It increased its interest revenues through the rising loan volume and sustained its control over the operating expenses, thus ensuring a net profit increase of 25% on an annual basis. We estimate that the banking sector will maintain its robust performance in the upcoming period. As we head towards 2018, we expect the sector will sustain its healthy loan growth next year and focus on investment loans in lending operations while maintaining a capital adequacy ratio around 17%.

At TSKB, we extended loans worth more than USD 2 billion to private sector investments in the first nine months. This marked a 13% year-to-date growth in our loan portfolio on an FX-adjusted basis. Furthermore, we expanded our customer portfolio by 20%. New loans extended in the first nine months mainly focused on renewable energy, environment, energy and resource efficiency projects, organized industrial zone investments and LEED-certified commercial buildings as well as SME finance. Moreover, investors displayed much interest in women's employment and occupational health and safety themes which were introduced by the funding agreement we signed with AFD at the end of last year.

We had a record loan-to-asset ratio at 76%, and our leverage ratio stood at 8 times. Our assets grew by 13.4% year-to-date. We have prudently maintained our asset quality in the same period. Our shareholders' equity rose by 18% year-on-year to reach TL 3.4 billion. As of September 30, 2017, our net profit for the period increased by an annual 23% and stood at TL 452.3 million. In addition, our capital adequacy ratio remains as high as 17.5%.

In corporate governance, we have continued our stable operational and financial performance. In October, SAHA revised TSKB's corporate governance rating from 9.53 over 10 to 9.54 on October 20, 2017. This ensured that our Bank retained its position among the leading institutions with the highest ratings. At TSKB, we will build on our success in the upcoming period, as it has been the case so far, to provide further added value to our stakeholders.

Sincerely,

CEO and Board Member
Suat İnce

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT (Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ECONOMIC DEVELOPMENTS DURING THE INTERIM PERIOD

Economic Developments in the First 9 Months of 2017

In the second quarter of 2017, Turkish economy grew by 5.1% on a year-on-year basis. On expenditures side, the fixed capital formation supported by the 25% increase in construction investments grew by 9.5% in the second quarter and emerged as a key driver for growth. Data adjusted for seasonal and calendar effects indicated that the GDP increased by 2.1% in the second quarter of 2017 when compared to the previous quarter. As of the end of June 2017, the size of Turkish economy stood at TL 2.8 trillion (USD 834 billion).

Inflation data by Turkstat revealed that annual inflation based on consumer prices was 11.20% as of September 2017. As of 2016 year-end, the inflation rate rose to 8.53%. The delayed impact of FX rate increase and the hike in food prices and global commodity prices in the last quarter of last year all contributed to the rising inflation.

Turkstat data indicates that industrial production rose on an annual basis in the first eight months of the year, excluding two months. The average increase rate stood at 1.7% in the first quarter and at 2.1% in the second quarter but accelerated and increased to an average of 4.8% for the first eight months of the year under the impact of a sharp increase as high as 25.6% brought along by the base effect in July.

The strong growth in iron and steel, energy and automotive exports and the decrease in textiles and gold exports in the first eight months of the year led to an increase of 10.8% in total exports which stood at USD 103 billion. During the period, energy imports rose by 34% and gold imports surged by 296%, causing the total imports to increase by 13.8% and reach USD 149 billion. This led the foreign trade deficit to rise to USD 45.7 billion with an increase of 21.1%. In the first eight months, the rate of exports meeting imports stood at 69.4%.

Current accounts deficit increased by 19% year-on-year to reach USD 27.2 billion in the first eight months of 2017. The annual deficit was USD 32.6 billion in 2016, which constituted 3.8% of the GDP, and increased to USD 36.9 billion by the end of August 2017, corresponding to 4.4% of the GDP.

Ministry of Finance data showed that the central administration budget had a TL 25.2 billion deficit in the first eight months of 2017. The budget previously had a TL 4.9 billion surplus during the same period of the previous year. In the first eight months, tax revenues increased by 15.2% to reach TL 343 billion and primary expenditures rose by 20% to stand at TL 395 billion. Primary surplus, on the other hand, fell by 68% to TL 13 billion year-on-year in the first eight months of 2017.

Markets

During the first nine months of the year, markets were led by expectations on the economic policies of the new administration in the U.S., the elections in the Netherlands, France and Germany, and the statements by the central banks of developed countries. The Fed implemented tightening measures in monetary policy despite the failure to put into effect the expected tax reform and investment plans to support growth in the U.S., and the scale-down in growth expectations due to the negative impact of large storms. The Fed hiked interest rates twice, one in March and the other in June, and declared that it would start implementing measures to shrink its USD 4.5 trillion-balance sheet in the last quarter of the year. The U.S. Dollar depreciated in global markets due to the facts that the Fed hiked interest rates by issuing signals in advance in an effort not to disrupt market dynamics, economic data proved to be poor and the incentives to reinvigorate growth failed to come to life. On the other hand, the Euro appreciated as growth indicators in the Eurozone recovered and the elections in the Netherlands, France and Germany produced results that mitigated political risks in the European Union. This appreciation was supported by the faintly-emphasized signal from the European Central Bank that it could introduce changes to its ultra-loose monetary policy.

**INFORMATION ON INTERIM ACTIVITY REPORT
FOR THE INTERIM PERIOD 1 JANUARY-30 SEPTEMBER 2017**

(Amounts are expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT (Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ECONOMIC DEVELOPMENTS DURING THE INTERIM PERIOD (Continued)

Economic Developments in the First 9 Months of 2017 (Continued)

EUR/USD parity started the year at 1.03 and rose to 1.18 at the end of September. Following the Fed, the Bank of Canada hiked the policy interest rate once while the Bank of England signaled for a strong interest rate hike since the depreciation in GBP during the Brexit process led to an increase in inflation.

In developing countries, on the other hand, the improvement in growth indicators led by Russia and Brazil, coupled with the declining inflation rates, made room for loosening monetary policies. Since the start of the year, Russia reduced interest rates by 150 basis points while Brazil and India followed by a decrease of 550 basis points and 25 basis points respectively. A sustained and ample global liquidity in addition to improved macroeconomic indicators increased capital flows into developing countries. The currencies of developing countries appreciated and the stock exchanges rose.

In developed countries, the recovery in inflation indicators and the signals for a tightening in monetary policies triggered an increase in global bond interest rates. Following economic recovery, the upside trend in commodity prices observed since the second half of 2016 decelerated in the first half of 2017. In the aftermath of the November 2016 OPEC meeting when OPEC made a decision to cut down on production, the price of Brent Crude rose to USD 55 in January and has since remained within the range of USD 45 to 60 under the impact of geopolitical developments. It has most recently stood at above USD 55 following the announcement of production cuts by Saudi Arabia.

In the first nine months of the year, the Emerging Markets Index (MSCI EM), the European exchanges (Stoxx600) and the U.S. exchange (S&P500) rose by 25%, 7% and 12% respectively. The U.S. 10-year interest started an upward trend in September 2016 at 1.55% to reach 2.63% in mid-March before going down to 2.34 by the end of period. The IIF data shows that developing countries received a capital inflow worth USD 286 billion in the first nine months of 2017. This marks a significant increase compared to previous year's USD 64 billion on a year-on-year basis.

ECONOMIC DEVELOPMENTS DURING THE INTERIM PERIOD (Continued)

Economic Developments in the First 9 Months of 2017 (Continued)

Turkey, on the other hand, had a very busy agenda in the first three quarters of the year including items such as the referendum on Constitutional amendments, the Government's incentives programs to support growth, employment and investments, the establishment of the Sovereign Wealth Fund of Turkey, the upside impact on loan volume as created by the fact that the limit of the CGF is increased to TL 250 billion and the negative geopolitical developments. In order to control inflation and reduce volatility in FX rates, the Central Bank shifted the funding facility for markets from the quotation method to the late liquidity window, the rate for which is taken to 12.75%, thus raising the weighted average cost of funding to 12.0% from 8.3%. Stocks presented a positive outlook mainly due to capital inflow into emerging markets while the global developments, rising inflation and tightening steps by the Central Bank increased the interest rates for bonds. Starting the year at 3.52, the USD/TL rate oscillated within the range of 3.40 to 3.94 during the period under the impact of the tightening measures by the Central Bank, the inflow of foreign capital and geopolitical developments before completing the period at 3.55. The two-year benchmark bond interest started the first three quarters at 10.63% and finished it at 11.89%. BIST-100 completed the quarter at 102,908 with an increase of 32%.

Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)****ECONOMIC DEVELOPMENTS DURING THE INTERIM PERIOD (Continued)****Economic Developments in the First 9 Months of 2017 (Continued)****Banking Sector**

In the first nine months of 2017, total loans grew by 15% on a nominal basis, and by 12% on an FX-adjusted basis as driven by the increase in TL loans. The CGF loans accelerated specifically from mid-March on but partly slowed down in the third quarter, with the share of SMEs in total loans reducing. Total TL loans increased by 21.1% year-to-date while the FX loans remained more or less horizontal. The growth in TL loans were mainly driven by the 26.6% increase in corporate TL loans and 12.7% increase in personal TL loans. The impact of the CGF in corporate TL loans was most evident in commercial TL loans on installment which recorded a year-to-date increase of 65.1%. However, the impact of installment commercial loans in the loan increase has started to fade. The share of the increased commercial TL loans on installment in the growth of corporate TL loans was 76% by the end of June but fell to 68% by the end of September since the loans extended to non-SME organizations among the CGF loans started to increase. The growth in personal loans was chiefly influenced by the 14.6% increase in general purpose loans and the 13.9% increase in housing loans.

Year-to-date, the deposits in the banking sector grew by 11.6% on a nominal basis, and by 8.8% on an FX-adjusted basis as of the end of September. The increase in both TL deposits and FX deposits contributed to the overall increase in deposits. Total TL deposits increased by 8% on a year-to-date basis while the FX deposits rose by 9.8% on a currency-adjusted basis. The loan-to-deposit ratio in the sector stood at 117.4% at 2016 year-end but increased to 120.7% by the end of September. A breakdown of TL and FX deposits indicates that the TL-denominated loan-to-deposit ratio climbed over the peak level observed in 2015 and went beyond 150% under the impact of the increase in the TL loans extended specifically through the CGF support.

Change YTD	TL Terms	FX-Adjusted Basis
Loans	15.0%	12.0%
Deposits	11.6%	8.8%

HIGHLIGHTS FROM THE BANK'S OPERATIONS DURING THE INTERIM PERIOD

Fitch Ratings, the international credit rating agency, affirmed all current credit ratings and outlooks of our Bank on October 4, 2017. Fitch also assigned our Bank a Financial Capacity Rating (bb), since the current operations and credibility of our Bank are sufficiently independent.

Developments Regarding the Bank's Corporate Governance Operations

During the Ordinary General Assembly Meeting of our Bank, it is resolved in relation to cash dividends that a gross TL 82,000,000, which corresponds to 4% of the paid-in capital, out of TL 432,000,000, the total of primary and secondary dividends, be distributed to shareholders in cash, and TL 350,000,000, which corresponds to 17.07% thereof, be given as bonus share to be used in increasing the capital of our Bank to TL 2,400,000,000 from TL 2,050,000,000, and the distribution of the bonus share dividends start following the CMB approval for the issuance certificate regarding the said shares.

On March 27, 2017, dividends were distributed first to shareholders and then to Board Members and employees. In addition, required approvals were obtained from the BRSA and the CMB, and the capital increase transaction was completed on May 29, 2017.

During the Board meeting of June 7, 2017, the following decisions were issued in relation to Board Committees due to changes in the membership structure of the Board of Directors:

- Mr. Mehmet Şencan was elected as a member of the Audit Committee,
- Mr. Can Yücel was elected as a member of the Corporate Governance Committee,
- Mr. Mehmet Şencan was elected as a member of the Credit Revision Committee.

On June 19, 2017, our Bank renewed its contract with SAHA Kurumsal Yönetim ve Kredi Derecelendirme Hizmetleri A.Ş. (SAHA), which subsequently assessed the corporate governance rating of our Bank in October 2017. In its recent rating revision, SAHA updated our Bank's rating, which stood at 95.27 (9.53) over 100, to 95.37 (9.54) on October 20, 2017.

FINANCIAL DEVELOPMENTS DURING THE INTERIM PERIOD

The summary for the Bank's main financial indicators as of September 30, 2017 is provided below:
The total asset size grew by 19.0% on a year-on-year basis and by 13.4% compared to 2016 year-end to reach TL 27,225 million.

The total loan portfolio stood at TL 20,684 million, marking an increase of 34.7% on a year-on-year basis and 19.4% on a year-to-date basis. The FX-adjusted growth in loans stood at 13% on a year-to-date basis. The ratio of non-performing loans to total loans stayed at 0.3% in the third quarter. Shareholders' equity rose by 18.1% on a year-on-year basis and by 15.8% compared to 2016 year-end to reach TL 3,390 million. The capital adequacy ratio, which stood at 17.5% in the second quarter of 2017, maintained this level as of the end of September 2017.

As of September 30, 2017; net profit increased by 23.3% on an annual basis to reach TL 452,263 thousand.

Return on equity stood at 18.3% in September 2016, 17.6% at 2016 year-end, and 19.1% in September 2017.

G. FINANCIAL DEVELOPMENTS DURING THE INTERIM PERIOD (Continued)

Return on assets stood at 2.2% in September 2016, decreasing slightly to 2.1% at 2016 year-end before rising up to 2.4% in September 2017.

In the third quarter of 2017, total operating income increased by 25.0% on an annual basis to reach TL 709.9 million, while other operating expenses rose by 12.2% to TL 98.0 million. The cost-to-income ratio which stood at 15.4% in September 2016 slightly decreased to 15% at 2016 year-end and ended the third quarter of 2017 with 13.8%.

Forward-Looking Expectations

In the third quarter of 2017, there have been no changes in the macroeconomic assumptions of the Bank. Accordingly, the Bank's 2017 GDP forecast for the Turkish economy is 5%, while the annual estimated inflation rate is 9%. The estimated inflation figure to be considered for the appraisal of CPI-linkers is an annual 10%.

The total cash loans the Bank extended in the first three quarters reached USD 2 billion including cash loans worth USD 1.5 billion. Investments supporting sustainable development such as renewable energy projects as well as environmental projects, energy and resource efficiency projects, organized industrial zone investments, commercial real estate projects having green certificates, public-private partnership projects and SME financing are the main focus in the Bank's efforts to extend new loans. Furthermore, projects on women's employment, occupational health and safety are among the top items on the Bank's agenda.

H. RISK MANAGEMENT

TSKB Risk Management policies and code of conduct regarding such policies are the written standards set out by the Board of Directors and implemented by the senior Bank management.

Within the scope of the TSKB Risk Management Policies, the basic risks that the Bank is exposed to are the loan risks, assets-liabilities management risks (market risk, structural interest rate risks, liquidity risks) and operational risks, and a Risk Management Department has been established within the Bank to for the management of the Bank's risks pursuant to said policies, as well as for the compliance with the aforementioned risk policies and the relevant code of conduct.

TSKB Risk Management Department actively undertakes efforts in all processes related to risk management, and regularly reports to the Board of Directors, Audit Committee, senior management and relevant departments of the Bank. Its functions, responsibilities and structure are set out by the bylaws of the Risk Management Department.

I. FURTHER INFORMATION

Statements regarding the developments that have a significant impact on the Bank's operations are given above. For further information, please kindly visit the following website for the annual report of 2016:
