INTERIM REVIEW REPORT

To the Board of Directors of Türkiye Sınai Kalkınma Bankası A.Ş.

Introduction

We have reviewed the consolidated statement of financial position of Türkiye Sınai Kalkınma Bankası A.Ş. (“the Bank”) and its consolidated financial subsidiaries (together will be referred as “the Group”) at 30 September 2020 and the related consolidated statement of profit or loss, consolidated statement of profit or loss and other comprehensive income, consolidated statement of shareholders’ equity, consolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the consolidated financial statements for the nine-month period then ended. The Bank Management is responsible for the preparation and fair presentation of interim financial statements in accordance with the “Regulation on Accounting Applications for Banks and Safeguarding of Documents” published in the Official Gazette No.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by Banking Regulation and Supervision Authority and Turkish Accounting Standard 34 “Interim Financial Reporting” for those matters not regulated by BRSA Legislation (together referred as “BRSA Accounting and Financial Reporting Legislation”). Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, “Limited Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an opinion.

**Building a better
working world**

Basis for Qualified Conclusion

As explained in Note 7 of the Explanations and Disclosures related to the Liabilities, the accompanying consolidated financial statements as at 30 September 2020 include a free provision amounting to TL 220.000 thousands which were provided within 2018 and before out of which TL 20.000 thousands was provided and reversed as at 31 March 2019 and 31 December 2019 respectively by the Bank management, for the possible effects of the negative circumstances which may arise in the economy or market conditions. Since the above mentioned provisions do not meet the accounting requirements of TAS 37, the "Prior Years' Profit/Loss" as of 30 September 2020 and "net income" of 30 September 2019 are understated by TL 220.000 thousands TL 20.000 thousands respectively.

Qualified Conclusion

Based on our review, except for the effects of the matter on the consolidated financial statements described in the basis for qualified conclusion paragraph, nothing has come to our attention that causes us to believe that the accompanying consolidated financial information do not present fairly in all material respects the financial position of Türkiye Sınai Kalkınma Bankası A.Ş. and its consolidated financial subsidiaries at 30 September 2020 and the results of its operations and its cash flows for the nine-month period then ended in accordance with the BRSA Accounting and Financial Reporting Legislation.

Report on other regulatory requirements arising from legislation

Based on our review, nothing has come to our attention that causes us to believe that the financial information provided in the accompanying interim activity report in Section Seven, are not consistent with the consolidated financial statements and disclosures in all material respects.

Additional paragraph for convenience translation to English

As explained in detail in Note I of Section Three, the effects of differences between accounting principles and standards set out by regulations in conformity with "BRSA Accounting and Financial Reporting Legislation" and the accounting principles generally accepted in countries in which the accompanying consolidated financial statements are to be distributed and International Financial Reporting Standards ("IFRS") have not been quantified in the accompanying consolidated financial statements. Accordingly, the accompanying consolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

GENERAL INFORMATION (Continued)

IV. Information about the persons and institutions that have qualified shares in the Parent Bank

Explanation about the people and institutions that have qualified shares control the Parent Bank's capital directly or indirectly are described in General Information Section II.

V. Summary on the Parent Bank's functions and areas of activity

Türkiye Sınai Kalkınma Bankası A.Ş. is the first private development and investment bank which was established by the Council of Ministers resolution number of 3/11203 established in 1950 with the support of World Bank, Government of Republic of Turkey, Central Bank of Republic of Turkey and commercial banks. As per the articles of association published in the Official Gazette on 2 June 1950, the aim of the Parent Bank is to support all private sector investments but mostly industrial sectors, to help domestic and foreign capital owners to finance the new firms and to help the improvement of Turkish capital markets. The Parent Bank is succeeding its aims by financing, consulting, giving technical support and financial intermediary services. The Parent Bank, which operates as a non-deposit accepting bank, played a major role on manufacturing and finance sectors in every phase of the economic development of Turkey. The Parent Bank started its journey in 1950 financing the private sector investments in Turkey and today it provides loans and project finance with the goal of sustainable development to corporations in different fields. As a leader in meeting the long term financing needs of the private sector, the Parent Bank also continues to offer solutions with respect to the newest needs and client demands.

VI. Differences between the Communiqué on Preparation of Consolidated Financial Statements of Banks and Turkish Accounting Standards and short explanation about the institution subject to line-by-line method or proportional consolidation and institutions which are deducted from equity or not included in these three methods

Due to differences between the Communiqué on Preparation of Consolidated Financial Statements of Banks and Turkish Account Standards (TAS), the non-financial subsidiaries and associates, TSKB Gayrimenkul Değerleme A.Ş., Terme Metal Sanayi ve Ticaret A.Ş., Ege Tarım Ürünleri Lisanslı Depoculuk A.Ş., TSKB Sürdürülebilirlik Danışmanlığı A.Ş. and Anavarza Otelcilik Anonim Şirketi are not consolidated since they are not in scope of financial institutions according to related Communiqué. These non-financial investment in associates and subsidiaries are accounted by the equity method in the consolidated financial statements

Türkiye Sınai Kalkınma Bankası A.Ş. and its financial institutions, Yatırım Finansman Menkul Değerler A.Ş., TSKB Gayrimenkul Yatırım Ortaklığı A.Ş. and Yatırım Varlık Kiralama A.Ş. are included in the accompanying consolidated financial statements by line by line consolidation method; İş Finansal Kiralama A.Ş., İş Girişim Sermayesi Yatırım Ortaklığı A.Ş. and İş Faktoring A.Ş. are included in the accompanying consolidated financial statements by equity method.

Financial institutions included in the consolidation are determined in accordance with "Communiqué on Preparation of Consolidated Financial Statements of Banks" published in the Official Gazette dated 8 November 2006 numbered 26340.

SECTION THREE

ACCOUNTING POLICIES

I. Basis of presentation

I.a Preparation of the financial statements and the accompanying footnotes in accordance with Turkish Accounting Standards and Regulation on Principles Related to Banks' Accounting Applications and Maintaining the Documents

The consolidated financial statements are prepared its financial statements in accordance with the BRSA Accounting and Reporting Regulation” which includes the regulation on “The Procedures and Principles Regarding Banks’ Accounting Practices and Maintaining Documents” published in the Official Gazette dated 1 November 2006 with No. 26333, and other regulations on accounting records of banks published by the Banking Regulation and Supervision Board and circulars and pronouncements published by the BRSA and Turkish Accounting Standards published by the Public Oversight Accounting and Auditing Standards Authority for the matters not regulated by the aforementioned legislations and the amendments dated 1 February 2019 to the Communiqué on the Financial Statements and Related Disclosures and Footnotes to announced to public dated 28 June 2012 and with No. 28337 “Communiqué’ on Publicly Announced Financial Statements Explanations and notes to the Financial Statements”.

The consolidated financial statements have been prepared in TL, under the historical cost convention except for the financial asset, liabilities and buildings revaluation model which are carried at fair value.

Accounting policies and valuation principles used in the preparation of the financial statements are determined and applied, in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency (“BRSA”).

The accounting policies and valuation principles used in the 2020 period of Group are presented in the accompanying notes and the accounting policies and valuation principles are explained in Notes II to XXIII below.

The format and content of the accompanying consolidated financial statements and footnotes have been prepared in accordance with the “Communiqué’ on Publicly Announced Financial Statements Explanations and notes to the Financial Statements” and “Communiqué on Disclosures About Risk Management to be Announced to Public by Banks.”

Additional paragraph for convenience translation to English

The effects of differences between accounting principles and standards set out by regulations in conformity with BRSA Accounting and Reporting Legislation and Turkish Accounting Standard 34” Interim Financial reporting” except for the matters regulated by BRSA Legislation accounting principles generally accepted in countries in which the accompanying unconsolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in the accompanying consolidated financial statements. Accordingly, the accompanying unconsolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

I.b The valuation principles used in the preparation of the financial statements

The accounting rules and the valuation principles used in the preparation of the financial statements were implemented as stated in the Turkish Accounting Standards and related regulations, explanations and circulars on accounting and financial reporting principles announced by the BRSA. These accounting policies and valuation principles are explained in the below notes through II to XXIII.

Coronavirus epidemic spread to various countries around the world, causing potentially fatal respiratory infections, affects both regional and global economic conditions negatively, as well as causing malfunctions in operations, especially in countries exposed to the epidemic. As a result of the spread of COVID-19 throughout the world, various measures have been taken in our country as well as in the world and still continue to be taken in order to prevent the transmission of the virus. In addition to these measures, economic measures are also taken to minimize the economic impact of the virus outbreak on individuals and businesses in our country and worldwide.

The Parent Bank / The Group began to apply principal and interest translation to its customers who demanded for support and convenience in the sectors whose cash flows deteriorated since was affected by the COVID-19 epidemic and the protection measures taken in this context.

As it is intended to update the financial information contained in the latest annual financial statements in the interim financial statements prepared as of 30 September 2020 and considering the magnitude of the economic changes occurred due to COVID-19, the Bank made estimates in the calculation of expected credit losses and disclosed these in footnote IX “Disclosures on impairment of financial assets”. In the coming periods, the Bank will update its relevant assumptions according to necessary extents and review the realizations of past estimates.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş. AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

I.c The items which have different accounting policies applied in the preparation of the consolidated financial statements and their ratios to the total of the related items in the consolidated financial statements

Different accounting policies are not applied in the preparation of consolidated financial statements.

II. Explanations on usage strategy of financial assets and foreign currency transactions

The main sources of the funds of the Group have variable interest rates. The financial balances are monitored frequently and fixed and floating interest rate placements are undertaken according to the return on the alternative financial instruments. The macro goals related to balance sheet amounts are set during budgeting process and positions are taken accordingly.

Due to the fact that the great majority of the loans extended by the the Group have a flexibility of reflecting changes in the market interest rates to the customers, the interest rate risk is kept at minimum level. Moreover, the highly profitable Eurobond and the foreign currency government indebtness securities portfolio have the attribute of eliminating the risks of interest rate volatility. The fixed rate Subordinated bond, Eurobond and Greenbond issued by the Group and a portion of fixed rate funds borrowed are subject to fair value hedge accounting. The Bank enters into interest rate swap agreements in order to hedge the change in fair values of its fixed rate financial liabilities. The changes in the fair value of the hedged fixed rate financial liabilities and hedging interest rate swaps are recognized under the statement of profit/loss.

In the beginning and later period of the hedging transaction, the aforementioned hedging transactions are expected to offset changes occurred in the relevant period of the hedging transaction and hedged risk (attributable to hedging risk) and effectiveness tests are performed in this regard.

The Group performs effectiveness test at the beginning of the hedge accounting and at each reporting period. The effectiveness tests are carried out using the “Dollar off-set model” and the hedge accounting is applied as long as the test results are between the range of 80%-125% of effectiveness.

The hedge accounting is discontinued when the hedging instrument expires, is exercised, sold or no longer effective. When discontinuing fair value hedge accounting, the cumulative fair value changes in carrying value of the hedged item arising from the hedged risk are amortized and recognized in income statement over the life of the hedged item from that date of the hedge accounting is discontinued.

TFRS 9 provides the option of deferring the adoption of TFRS 9 hedge accounting and the option to continue to apply the provisions of TAS 39 hedge accounting in the selection of accounting policies. In this context, the Parent Bank continues to apply the provisions of TAS 39 hedge accounting.

The Group liquidity is regularly monitored. Moreover, the need of liquidity in foreign currencies is safeguarded by currency swaps.

Commercial placements are managed with high return and low risk assets considering the international and domestic economic expectations, market conditions, creditors’ expectations and their tendencies, interest-liquidity and other similar factors. Prudence principle is adopted in the placement decisions. The long term placements are made under project finance. A credit policy is implemented such a way that harmonizing the profitability of the projects, the collateral and the value add introduced by the Parent Bank.

The movements of foreign exchange rates in the market, interest rates and prices are monitored instantaneously. While taking positions, the Group’s unique operating and control limits are watched effectively besides statutory limits. Limit overs are not allowed. The Parent Bank’s strategy of hedging interest rate and foreign currency risks arising from fixed and variable interest rate funds and foreign currency fair value through other comprehensive income securities:

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

II. Explanations on usage strategy of financial assets and foreign currency transactions (continued)

A great majority of foreign currency fair value through other comprehensive income securities are financed with foreign currency resources. Accordingly, the anticipated possible depreciation of local currency against other currencies is eliminated. A foreign currency basket is formulated in terms of the indicated foreign currency to eliminate the risk exposure of changes in cross currency parity. Interest rate risk is mitigated by constituting a balanced asset composition in compliance with the structure of fixed and floating rate of funding resources.

The hedging strategies for other foreign exchange risk exposures: A stable foreign exchange position strategy is implemented and to be secured from cross currency risk, the current foreign exchange position is monitored by considering a currency basket in specific foreign currencies.

The foreign exchange gains and losses on foreign currency transactions are accounted for in the period of the transaction. Foreign exchange assets and liabilities are translated to Turkish Lira using foreign exchange bid rate as of the reporting date, and the resulting gains and losses are recorded in foreign exchange gains or losses.

III. Explanations on associates and subsidiaries

Explanations about the Parent Bank and its subsidiaries and associates subject to consolidation are described in General Information Section V.

IV. Explanations on forward and option contracts and derivative instruments

The Parent Bank is exposed to financial risk which depends on changes in foreign exchange rates and interest rates due to activities and as part of banking activities uses derivative instruments to manage financial risk that especially associated with fluctuations in foreign exchange and interest rate. Mainly derivative instruments used by the Group are foreign currency forwards, swaps and option agreements.

The derivative financial instruments are accounted for at their fair values as of the date of the agreements entered into and subsequently valued at fair value. Derivative financial instruments of the Group are classified under "TFRS 9 Financial Instruments" ("TFRS 9"), "Derivative Financial Assets Designated at Fair Value Through Profit or Loss" or "Derivative Financial Assets Designated at Fair Value Through Other Comprehensive Income". Payables and receivables arising from the derivative instruments are recorded in the off-balance sheet accounts at their contractual values. Derivative transactions are valued at their fair values subsequent to their acquisition. In accordance with the classification of derivative financial instruments, if the fair value is positive, the amount is classified as "Derivative Financial Assets Designated at Fair Value Through Profit or Loss" or "Derivative Financial Assets Designated at Fair Value Through Other Comprehensive Income", if the fair value is negative, the amount is classified as "Derivative Financial Liabilities Designated at Fair Value Through Profit or Loss" or "Derivative Financial Liabilities Designated at Fair Value Through Other Comprehensive Income". The fair value differences of derivative financial instruments are recognized in the income statement under trading profit/loss line in profit/loss from derivative financial transaction

V. Explanations on associates and subsidiaries

The Parent Bank's financial subsidiaries' are reflected the consolidated financial statements according to the equity method in accordance with TAS 28 - Investment in Associates and Joint Ventures Related to the Turkish Accounting Standards. Unconsolidated and non financial subsidiaries and associates are presented in the financial statements in accordance with the "TAS 27-Separate Financial Statements" standard with their cost values after the deduction of, if any, impairment losses.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VI. Explanations on interest income and expenses

Interest income is recorded according to the effective interest rate method (rate equal to net present value of future cash flows or financial assets and liabilities) defined in the TFRS 9 “Financial Instruments” standard by applying an accrual basis using the effective interest rate to the gross carrying amount of a financial asset except for: purchased or originated credit-impaired financial assets or financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets.

If the financial asset is impaired and classified as a non-performing receivable, the Bank applies the effective interest rate on the amortized cost of the asset for subsequent reporting periods. Such interest income calculation is made on an individual contract basis for all financial assets subject to impairment calculation. It is used effective interest rate during calculation of loss given default rate in expected creditloss models and accordingly, the calculation of expected credit losses includes an interest amount. Therefore, a reclassification is made between the accounts of “Expected Credit Losses” and “Interest Income From Loans” for calculated amount. If the credit risk of the financial instrument improves to the extent that the financial asset is no longer considered as impaired and the improvement can be attributed to an incident that eventually takes place (such as an increase in the loan's credit rating), interest income at subsequent reporting periods are calculated by applying the effective interest rate to the gross amount.

VII. Explanations on fees and commission income and expenses

Except for fees and commissions that are integral part of the effective interest rates of financial instruments measured at amortized costs, the fees and commissions are accounted for in accordance with TFRS 15 Revenue from Contracts with Customers. Except for certain fees related with certain banking transactions and recognized when the related service is given, fees and commissions received or paid, and other fees and commissions paid to financial institutions are accounted under accrual basis of accounting throughout the service period. Income from asset purchases to a third party or by natural or legal persons contracts are recognized in the period they occur.

VIII. Explanations on financial assets

Initial recognition of financial instruments

Initial recognition of financial instruments the Bank shall recognize a financial asset or a financial liability in its statement of financial position when, and only when, the entity becomes party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets shall be recognized and derecognized, as applicable, using trade date accounting or settlement date accounting. Purchase and sale transactions of securities are accounted at the settlement date.

Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on the contractual conditions and the relevant business model. Except for the assets in the scope of TFRS 15 Revenue from contracts with customers, at initial recognition, the Bank measures financial asset or financial liabilities at fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit/loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Classification of financial instruments

On which category a financial instruments shall be classified at initial recognition depends on both the business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VIII. Explanations on financial assets (continued)

Assessment of business model

As per TFRS 9, the Parent Bank's business model is determined at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The business model does not depend on the intent of the management on an individual financial intermediary, so the condition is not a classification approach on the basis of a financial instrument but an evaluation by combining the financial assets. When the business model used for the management of financial assets is being evaluated, all evidence is taken into account. Such evidence includes the following:

- How the performance of financial assets held by the business model and business model is reported by the key executive personnel,
- Risks affecting the performance of the business model (financial assets held within the business model) and, in particular type of management,
- How the additional payments to the managers are determined (for example, whether additional payments are determined according to the fair value of the assets being managed or on the contractual cash flows collected).

Business model evaluation is not based on scenarios in which the operator is not expected to be at a reasonable level, such as the "worst case" or "pressure case" scenarios. The same business model does not require a change in the classification of other financial assets as long as the cash flows are realized differently from the expected future date when the business model is assessed, the error correction is made in the financial statements or all relevant information available at the time of the valuation of the business model is taken into account. However, when evaluating the business model for newly created or newly acquired financial assets, information about how past cash flows have been taken into account along with other relevant information is also taken into account. The business models that comprise the bet are composed of three categories. These categories are as follows:

- Business model aimed to hold assets in order to collect contractual cash flows: This is a model whose objective is to hold assets in order to collect contractual cash flows are managed to realise cash flows by collecting contractual payments over the life of the instrument. The financial assets that are held within the scope of this business model are measured at amortized cost when the contractual terms of the financial asset meet the condition of giving rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- Business model whose objective is to hold assets in order to collect contractual cash flows: The Parent Bank may hold financial assets in this business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

Fair value change of the financial assets that are held within the scope of this business model are accounted under other comprehensive income when the contractual terms of the financial asset meet the condition of giving rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Other Business Model: Financial assets are measured at fair value through profit or loss if they are not held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VIII. Explanations on financial assets (continued)

The contractual cash flows including solely principle and interest on principle

As per TFRS 9, the Parent Bank classifies a financial asset on the basis of its contractual cash flow characteristics if the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets. In a basic lending agreement, the time value of money and the consideration of credit risk are often the most important element of interest. In order to assess whether the element provides consideration for only the passage of time, an entity applies judgement and considers relevant factors such as the currency in which the financial asset is denominated and the period for which the interest rate is set. When the contractual conditions are exposed to the risks which are not consistent with the basic lending arrangement or variability of cash flows, the relevant financial asset is measured at fair value through profit or loss.

Measurement categories of financial assets and liabilities

Financial assets are classified compliance with TFRS 9 in three main categories as listed below:

- Financial assets measured at fair value through profit/loss
- Financial assets measured at fair value through other comprehensive income and
- Financial assets measured at amortized cost

a. Financial assets at the fair value through profit or loss:

Financial assets at fair value through profit/loss are financial assets other than the ones that are managed with business model that aimed to hold to collect contractual cash flows or business model that aims to collect both the contractual cash flows and cash flows arising from the sale of the assets; and in case of the contractual terms of the financial asset do not lead to cash flows representing solely payments of principal and interest at certain date; that are either acquired for generating a profit from shortterm fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit making.

The Parent Bank classifies certain loans and securities issued at their origination dates, as financial assets/liabilities at fair value through profit/ loss, irrevocably in order to eliminate any accounting mismatch in compliance with TFRS 9.

Financial assets at the fair value through profit or loss are initially recognized at fair value and measured at their fair value after recognition. All gains and losses arising from these valuations are reflected in the income statement.

According to uniform chart of accounts explanations interest income earned on financial asset and the difference between their acquisition costs and amortized costs are recorded as “interest income” in the statement of profit or loss. The differences between the amortized costs and the fair values of such assets are recorded under “trading account income/losses” in the statement of profit or loss. In cases where such assets are sold before their maturities, the gains/losses on such sales are recorded under “trading account income/losses”.

ACCOUNTING POLICIES (Continued)

VIII. Explanations on financial assets (continued)

Measurement categories of financial assets and liabilities (continued)

a. Financial assets at the fair value through profit or loss (continued)

Syndicated loans extended to Ojer Telekomünikasyon A.Ş. (OTAŞ) in the previous periods were restructured. Within this scope, in order to form the collateral of these loans, taking over process of 192.500.000.000 A Group shares which constitute 55% of Turk Telekom's issued capital, pledged in favor of the creditors, were completed on 21 December 2018, by LYY Telekomünikasyon A.Ş. (formerly known as Levent Yapılandırma Yonetimi A.Ş.) which was established as a privately-owned company and all creditors are direct or indirect shareholders. The Parent Bank has a share of 1,617% in LYY Telekomünikasyon A.Ş., which is the share of OTAŞ receivables.

Later, at the Ordinary General Assembly Meeting of LYY Telekomünikasyon A.Ş. dated September 23, 2019, it was decided to convert some of the loan to capital and add it to the capital of LYY Telekomünikasyon A.Ş. The nominal value of shares increased from TL 0,8 to TL 64.403. This amount is presented under "Property and Equipment Held for Sale and Related to Discontinued Operations" in the financial statements. As of 30 September 2020, the portion which is followed accounted under credit loan is TL 263.097 and classified under "Other Financial Assets" under "Financial Assets at Fair Value through Profit or Loss" in the financial statements". The total fair value decrease recognized for loans and equity amounted to TL 109.597 and the total amount is classified under "Financial Assets at Fair Value Through Profit and Loss".

Total assets amounting to TL 327.500 are measured at fair value under TFRS 9 Financial Instruments Standard and TFRS 5 Assets Held for Sale and Discontinued Operations. The determination of this value is based on the results of an independent appraisal firm. In the valuation study, fair value is determined by considering the average of different methods (discounted cash flows, similar market multipliers, similar transaction multipliers in the same sector, market value and analyst reports).

The main objective of the lending banks is to transfer Türk Telekom shares to an expert investor by providing the necessary conditions as quickly as possible. 55% of LYY Telekomünikasyon A.Ş. was authorized as an international investment bank sales consultant on 19 September 2019 for the sale of its shares. In this context, necessary studies related to sales and negotiations with potential investors initiated.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VIII. Explanations on financial assets (continued)

b. Financial Assets at Fair Value Through Other Comprehensive Income:

In addition to Financial assets within a business model that aims to hold to collect contractual cash flows and aims to hold to sell, financial asset with contractual terms that lead to cash flows are solely payments of principal and interest at certain dates, they are classified as fair value through other comprehensive income.

Financial assets at fair value through other comprehensive income are recognized by adding transaction cost to acquisition cost reflecting the fair value of the financial asset. After the recognition, financial assets at fair value through other comprehensive income are measured at fair value. Interest income calculated with effective interest rate method arising from financial assets at fair value through other comprehensive income and dividend income from equity securities are recorded to income statement.

“Unrealized gains and losses” arising from the difference between the amortized cost and the fair value of financial assets at fair value through other comprehensive income are not reflected in the income statement of the period until the acquisition of the asset, sale of the asset, the disposal of the asset, and impairment of the asset and they are accounted under the “Accumulated Other Comprehensive Income or Loss Reclassified Through Profit or Loss” under shareholders’ equity. Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

During initial recognition an entity can choose in a irrevocable was to record the changes of the fair value of the investment in an equity instrument that is not held for trading purposes in the other comprehensive income. In the case of this preference, the dividend from the investment is taken into the financial statements as profit or loss.

c. Financial Assets Measured at Amortized Cost:

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are classified as financial assets measured at amortized cost. Financial assets measured at amortized cost are initially recognized at acquisition cost including the transaction costs which reflect the fair value of those instruments and subsequently recognized at amortized cost by using effective interest rate method. Interest income obtained from financial assets measured at amortized cost is accounted in income statement.

In the “Fair value through other comprehensive income” and “measured at amortized cost” securities portfolio of the Parent Bank, there are Consumer Price Indexed (CPI) Bonds.

FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

VIII. Explanations on financial assets (continued)

c. Financial Assets Measured at Amortized Cost (continued) :

The Parent Bank considered expected inflation index of future cash flows prevailing at the reporting date while calculating internal rate of return of the Consumer Price Indexed (CPI) marketable securities. The effect of this application is accounted as interest received from marketable securities in the consolidated financial statements. These securities are valued and accounted according to the effective interest method based on the real coupon rates and the reference inflation index at the issue date and the estimated inflation rate. As stated in the Investor's Guide of CPI Government Bonds by Republic of Turkey Undersecretariat of Treasury the reference indices used to calculate the actual coupon payment amounts of these securities are based on the previous two months CPI's. The Parent Bank determines the estimated inflation rate accordingly. The inflation rate is estimated by considering the expectancies of the Central Bank and the Bank which are updated as needed within the year.

d. Loans

Loans are financial assets that have fixed or determinable payments terms and are not quoted in an active market. Loans are initially recognized at acquisition cost plus transaction costs presenting their fair value and thereafter measured at amortized cost using the "Effective Interest Rate (internal rate of return) Method". Duties paid, transaction costs and other similar expenses on assets received against such risks are considered as a part of transaction cost and charged to customers. Turkish Lira ("TL") cash loans are composed of foreign currency indexed loans and working capital loans; foreign currency ("FC") cash loans are composed of investment loans, export financing loans and working capital loans.

All loans of the Parent Bank has classified under Measured at Amortized Cost, after loan portfolio passed the test of ". All cash flows from contracts are made only by interest and principal" during the transition period.

Foreign currency indexed loans are converted into TL from the foreign currency rate as of the opening date and followed in TL accounts. Repayments are measured with the foreign currency rate at the payment date, the foreign currency gains and losses are reflected to the income statement.

IX. Explanations on impairment of financial assets

As of 1 January 2018, loss allowance for expected credit losses is recognised on financial assets and loans measured at amortized cost, financial assests measured at fair value through other comprehensive income, loan commitments and financial guarantee contracts not measured at fair value through profit or loss based on TFRS 9 and regulation published in the Official Gazette no. 29750 dated 22 June 2016 in connection with "Procedures and Principals regarding Classification of Loans and Allowances Allocated for Such Loans". TFRS 9 impairment requirements are not eligible for equity instruments.

At each reporting date, it shall be assessed whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, it shall be used the change in the risk of a default occuring for the financial instrument.

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on impairment of financial assets (continued)

Calculation of expected credit losses

The expected credit loss estimates are required to be unbiased, probability-weighted and include supportable information about past events, current conditions, and forecasts of future economic conditions.

Risk parameters used in TFRS 9 calculations are included in the future macroeconomic information. While macroeconomic information is included, macroeconomic forecasting models and multiple scenarios used in the Internal Capital Assessment Process (“ICAAP”) are considered.

Within the scope of TFRS 9, the probability of default (PD), Loss given default (LGD) and Exposure at default (EAD) models have been developed. The models developed under TFRS 9 are based on the following segmentation elements:

- Loan portfolio (corporate /specilization)
- Product type
- Credit risk rating notes (ratings)
- Collateral type
- Duration since origination of a loan
- Remaining time to maturity
- Exposure at default

Probability of Default (PD): PD refers to the likelihood that a loan will default within a specified time horizon given certain characteristics. Based on TFRS 9, two different PDs are used in order to calculate expected credit losses:

- 12-month PD: as the estimated probability of default occurring within the next 12 months following the balance sheet date.
- Lifetime PD: as the estimated probability of default occurring over the remaining life of the financial instrument.

The Parent Bank uses internal rating systems for loan portfolio. The internal rating models used include customer financial information and knowledge of survey responses based on expert judgement. Probability of default calculation has been carried out based on past information, current conditions and forward looking macroeconomic parameters.

Loss Given Default (LGD): If a loan default occurs, it represents the economic loss incurred on the loan. It is expressed as a percentage.

Exposure at Default (EAD): For cash loans, it corresponds to the amount of loan granted as of the reporting date. For non-cash loans and commitments, it is the value calculated through using credit conversion factors. Credit conversion factor corresponds to the factor which adjusts the potential increase of the exposure between the current date and the default date.

Financial assets are divided into three categories depending on the increase in credit risk observed since their initial recognition:

Stage 1:

For the financial assets at initial recognition or that do not have a significant increase in credit risk since initial recognition. Impairment for credit risk is recorded in the amount of 12-month expected credit losses. 12-month expected credit loss is calculated based on a probability of default realized within 12 months after the reporting date. Such expected 12-month probability of default is applied on an expected exposure at default, multiplied with loss given default rate and discounted with the original effective interest rate.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş. AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on impairment of financial assets (continued)

Calculation of expected credit losses (continued)

Stage 2:

In the event of a significant increase in credit risk since initial recognition, the financial asset is transferred to Stage 2. Impairment for credit risk is determined on the basis of the instrument's lifetime expected credit losses. Calculation of expected credit losses is similar to descriptions above, but probability of default and loss given default rates are estimated through the life of the instrument.

Classification method is applied according to BRSA's decision dated 27 March 2020 and numbered 8970.

Stage 3:

Stage 3 includes financial assets that have objective evidence of impairment at the reporting date. For these assets, lifetime expected credit losses are recognized and interest revenue is calculated on the net carrying amount. The probability of default is taken into account as 100%.

The default assessment of the Parent Bank is made according to the following conditions:

1. Objective Default Definition: It means debt having past due more than 90 days. Current definition of default in the Parent Bank and its consolidated financial subsidiaries is based on a more than 90 days past due definition.

2. Subjective Default Definition: It means a debt is considered is unlikely to be paid. Whenever an obligor is considered is unlikely to pay its credit obligations, it should be considered as defaulted regardless of the existence of any past-due amount or of the number of days past due.

Classification method is applied according to BRSA's decision dated 17 March 2020 and numbered 8948.

Debt instruments measured at fair value through other comprehensive income

According to TFRS 9 the impairment requirements are applied for the recognition and measurement of a loss allowance for financial assets that are measured at fair value through other comprehensive income. However, the loss allowance shall be recognised in other comprehensive income and shall not reduce the carrying amount of the financial asset in the statement of financial position. The expected credit loss is reflected in other comprehensive income and the accumulated amount is recycled to statement of profit/loss following the derecognition of related financial asset.

Significant increase in credit risk

As of the reporting date, if the credit risk on a financial instrument has not increased significantly since initial recognition, the loss allowance for that financial instrument is measured at an amount equal to 12-month expected credit losses. However, if there is a significant increase in credit risk of a financial instrument since initial recognition, the Bank measures loss allowance regarding such instrument at an amount equal to lifetime expected credit losses.

The Parent Bank makes qualitative and quantitative assessments regarding assessment of significant increase in credit risk of financial assets to be classified as stage 2 (Significant Increase in Credit Risk). Credit risk is based on a comparison of the probability of default calculated at the origination of the loan and the probability of default assigned for the same loan as of the reporting date.

If there is a significant deterioration in PD , it is considered that there is a significant increase in credit risk and the financial asset is classified as stage 2. In this context, the Bank has calculated thresholds at which point the relative change is a significant deterioration.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş. AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

IX. Explanations on impairment of financial assets (continued)

Significant increase in credit risk (continued)

When determining the significant increase in the parent bank credit risk, The Parent Bank also assessed the absolute change in the PD date on the transaction date and on the reporting date. If the absolute change in the PD ratio is above the threshold values, the related financial asset is classified as stage 2.

The Parent Bank classifies the financial asset as Stage 2 (Significant Increase in Credit Risk) where any of the following conditions are satisfied as a result of a qualitative assessment:

- Loans overdue more than 30 days as of the reporting date
- Loans classified as watchlist
- When there is a change in the payment plan due to restructuring

Based on the decision of BRSA numbered 8948 dated 17 March 2020, 90 days delay for the classification of non-performing loans in the scope of the forth and fifth articles of Procedures and Principals regarding Classification of Loans and Allowances Allocated for Such Loans can be applied for 180 days until 31 December 2020 for loans that classified in stage 1 and stage 2 within the board of decision as of 17 March 2020 due to disruptions in economic and commercial activities resulting from the COVID-19. In this context;

- . Temporarily, the receivables cannot be collect up to 180 days can be classified in Stage 2.
- . For the customers who do not want to be delayed in overdue installments, the practice of being able to postpone installments within the scope of these periods has been started without breaking the existing restructuring contracts.
- . In the process of completing the “Garame banks protocols”, it was formed as a result of extending the time to be given to time-consuming operations with a mutual agreement.

Ultimately, it was concluded that the expected credit losses to be calculated for such receivables will continue according to their own risk models used by banks in accordance with TFRS 9.

In the decision of the BRSA dated 27 March 2020 and numbered 8970, it was decided to apply the 30-day delay period for the classification of loans in the stage 2 can used 90 days until 31 December 2020 due to the COVID-19 outbreak, and continue to calculate Expected credit losses in accordance with TFRS 9.

In the future expectations, 3 scenarios are used to as base, bad and good. Final provisions are calculated by weighing on the possibilities given to the scenarios. As of 30 September 2020, within the scope of the ECL effects of Covid-19, the weight of the base scenario was decreased of 3 scenarios, and weights of the bad and very bad scenarios was increased. Also for possible effects the Bank has established additional provisions for the sector and customers, which are considered to have a high impact on the expected credit loss calculations by making individual assessments for the risks that cannot be captured through the models.

This approach, which is preferred in expected credit losses calculations for the last quarter of 2020, will be revised in the following reporting periods, taking into account the impact of the pandemic, portfolio and future expectations.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

X. Explanations on offsetting, derecognition and restructuring of financial instruments

a. Offsetting of financial instruments

Financial assets and liabilities are offset when a legally enforceable right to set off or when the Parent Bank has the intention of collecting or paying the net amount of related assets and liabilities, and they are shown in the financial statements with their net amounts. Otherwise, there is not any offsetting transaction about financial assets and liabilities.

b. Derecognition of financial instruments

Derecognition of financial assets due to change in contractual terms

Based on TFRS 9, the renegotiation or modification of the contractual cash flows of a financial asset can lead to the derecognition of the existing financial asset. When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a ‘new’ financial asset. When the Parent Bank assesses the characteristics of the new contractual terms of the financial asset, it evaluates the contractual cash flows including foreign currency rate changes, conversion to equity, counterparty changes and solely principal and interest on principle. When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, it is recalculated the gross carrying amount of the financial asset and recognized a modification gain or loss in profit or loss.

Where all risks and rewards of ownership of the asset have not been transferred to another party and the Bank retains control of the asset, the Bank continues to recognize the remaining portion of the asset and liabilities arising from such asset. When the Parent Bank retains substantially all the risks and rewards of ownership of the transferred asset, the transferred asset continues to be recognized in its entirety and the consideration received is recognized as a liability.

Derecognition of financial assets without any change in contractual terms

The asset is derecognized if the contractual rights to cash flows from the financial asset are expired or the related financial asset and all risks and rewards of ownership of the asset are transferred to another party. Except for equity instruments measured at fair value through other comprehensive income, the total amount consisting of the gain or loss arising from the difference between the book value and the amount obtained and any accumulated gain directly accounted in equity shall be recognized in profit/loss.

Derecognition of financial liabilities

It shall be removed a financial liability (or a part of a financial liability) from the statement of financial position when, and only when, it is extinguished when the obligation specified in the contract is discharged or cancelled or expires.

c. Reclassification of financial instruments

Based on TFRS 9, the Parent Bank shall reclassify all affected financial assets at amortised cost to financial assets measured at fair value through other comprehensive income and fair value through profit or loss in the subsequent accounting when, and only when, it changes its business model for managing financial assets.

The Parent Bank has fulfilled the requirements of reclassification during transition to TFRS 9 and such reclassification details are presented in Section 3, Note VIII.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

X. Explanations on offsetting, derecognition and restructuring of financial instruments (continued)

d. Restructuring and refinancing of financial instruments

The Parent Bank may change the original contractual terms of a loan (maturity, repayment structure, guarantees and sureties) which were previously signed, in case the loan cannot be repaid or if a potential payment difficulty is encountered based on the new financing power and structure of the borrower.

Restructuring is to change the financial terms of existing loans in order to facilitate the payment of debt. Refinancing is granting a new loan by the Parent Bank which will cover either the principal or the interest payment in whole or in part of one or a few existing loans due to the anticipated financial difficulty which the customer or group encounter currently or will encounter in the future. Changes in the original terms of a credit risk can be made in the current contract or through a new contract.

Restruered Loans can be classified in standart loans unless the firm has difficulty in payment. Companies which have been restructured and refinanced can be removed from the watchlist when the following conditions are met:

- Subsequent to the through review of company's financial data and its owners' equity position, at circumstances when it is not anticipated that the owner of the company will face financial difficulties; and it is assessed that the restructured debt will be paid on time (starting from the date when the debt is restructured all due principal and interest payments are made on time).
- At least 2 years should pass over the date of restructuring (or if it is later), the date of removal from non-performing loan category, at least 10% (or the ratio specified in the legislation) of the total principal amount at the time restructuring /refinancing shall be paid and no overdue amount (principal and interest) shall remain at the date of restructuring / refinancing.

In order for the restructured non-performing loans to be classified to the watchlist category, the following conditions must be met:

- Recovery in debt service.
- At least one year should pass over the date of restructuring
- Payment of all accrued and overdue amounts by debtor (interest and principal) since the date of restructuring /refinancing or the date when the debtor is classified as nonperforming (earlier date to be considered) and fulfillment of the payment condition of all overdue amounts as of the date of restructuring /refinancing
- Collection of all overdue amounts, disappearance of the reasons for classification as nonperforming receivable (based on the conditions mentioned above) and having no overdue more than 30 days as of the date of reclassification

During the follow-up period of at least two years following the date of restructuring / refinancing, if there is a new restructuring / refinancing or a delay of more than 30 days, the transactions which were non-performing at the beginning of the follow-up period are classified as non-performing loans again.

FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XI. Explanations on sales and repurchase agreements and lending of securities

Funds provided under repurchase agreements are accounted under “Funds Provided under Repurchase Agreements-TL” and “Funds Provided under Repurchase Agreements-FC” accounts.

The repurchase agreements of the Group are based on the Eurobonds and government bonds issued by Republic of Turkey Undersecretariat of Treasury. Marketable securities subject to repurchase agreements are classified under assets at fair value through profit or loss, assets at fair value through other comprehensive income or assets at measured at amortized costs with parallel to classifications of financial instruments. The income and expenses from these transactions are reflected to the interest income and interest expense accounts in the income statement. Receivables from reverse repurchase agreements are recorded in “Receivables from Reverse Repurchase Agreements” account in the balance sheet.

XII. Explanations on assets held for sale and discontinued operations

Assets held for sale are measured at the lower of the assets’ carrying amount and fair value less costs to sell. This assets are not amortized and presented separately in the financial statements. In order to classify a tangible fixed asset as held for sale, the asset (or the disposal group) should be available for an immediate sale in its present condition subject to the terms of any regular sales of such asset (or such disposal groups) and the sale should be highly probable. For a highly probable sale, the appropriate level of management must be committed to a plan to sell the asset (or the disposal groups) , and an active programme to complete should be initiated to locate a customer. Also the asset (or the disposal group) should have an active market sale value, which is a reasonable value in relation to its current fair value. Also, the sale is expected to be accounted as a completed sale beginning from one year after the classification date; and the essential procedures to complete the plan should indicate the possibility of making significant changes on the plan or lower probability of cancelling. Events or circumstances may extend the completion of the sale more than one year. Such assets are still classified as held for sale if there is sufficient evidence that the delay in the sale process is due to the events and circumstances occurred beyond the control of the entity or the entity remains committed to its plan to sell the asset (or disposal group). Gains or losses relating to discontinued operations are presented separately in the income statement. A discontinued operation is a component of a bank that either has been disposed of , or is classified as held for sale. Gains or losses relating to discontinued operations are presented separately in the income statement.

XIII. Explanations on goodwill and other intangible assets

Goodwill arising on the acquisition of a subsidiary or a jointly controlled entity represents the excess of the cost of acquisition over the subsidiary or jointly controlled interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the subsidiary or jointly controlled entity recognized at the date of acquisition. Goodwill is initially recognized as an asset at cost and is subsequently measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill is allocated to each of the cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired.

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş. AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XIII. Explanations on goodwill and other intangible assets

If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in a subsequent period. On disposal of a subsidiary or a jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss on disposal. Intangible assets that are acquired prior to 1 January 2005 are carried at restated historical cost as of 31 December 2004; and those acquired subsequently are carried at cost less accumulated amortization, and any impairment. Intangible assets are depreciated on a straight line basis over their expected useful lives. Depreciation method and period are reviewed periodically at the end of each year. Intangible assets are mainly composed of rights and they are depreciated principally on a straight-line basis between 1-15 years.

XIV. Explanations on tangible assets

Tangible assets rather than real estate, purchased before 1 January 2005, are accounted for at their restated costs as of 31 December 2004 and the assets purchased in the following periods are accounted for at acquisition cost less accumulated depreciation and reserve for impairment. Gain or loss resulting from disposals of the tangible assets is reflected to the income statement as the difference between the net proceeds and net book value.

As of the third quarter of 2015, the Group changed its accounting policy and adopted revaluation method on annual basis under scope of Standard on Tangible Fixed Assets (TAS 16) with respect to valuation of immovable included in its building and lands. The amortization periods of real estates are specified in the appraisal's report. In case of the cost of tangible assets over the net realizable value estimated under the "Turkish accounting standards for impairment of assets" (TAS 36), the value of the asset is reduced to its "net realizable value" and are reserved impairment provision associated with expense accounts.

The positive difference between appraisement value and net book value of the property is accounted under shareholder' equity. Related valuation models such as cost model, market value and discounted cash flow projections approaches are used in valuation of real estates. There is no pledge, mortgage or any other lien on tangible assets. Tangible assets are depreciated with straight-line method and their useful lives are determined in accordance with the Turkish Accounting Standards.

Tangible Assets	Expected Useful Lives (Years)	Depreciation Rate (%)
Cashvault	4-50	2-25
Vehicles	5	20
Buildings	50	2
Other Tangible Assets	1-50	2-100

Investment Properties

Investment properties are real estate held to earn rent income, gain in value or both. An investment property is recognized as an asset if it is probable that future economic benefits related to the property will be available to operate and the cost of the investment property can be reliably measured. The fair value model has been chosen for valuation of investment properties. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XV. Explanations on leasing transactions

TFRS 16 Leases

TFRS 16 Leasing standard abolishes the dual accounting model currently applied for lessees through recognizing finance leases in the balance sheet whereas not recognizing operational lease. Instead, it is set forth a single model similar to the accounting of financial leases (on balance sheet). For lessors, the accounting stays almost the same. The Bank has started to apply “TFRS 16 Leases” Standard starting from 1 January 2019. The Bank has applied TFRS 16 with a simplified retrospective approach. The new accounting policies of the Bank regarding to application TFRS 16 are stated below.

Right-of-use assets

The Bank recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes

- (a) the amount of lease liabilities recognised,
- (b) lease payments made at or before the commencement date less any lease incentives received.
- (c) initial direct costs incurred,

Unless the Bank is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Lease Liabilities

At the commencement date of the lease, the Bank recognises lease liabilities measured at the present value of lease payments to be made over the lease term.

The lease payments include

- a) fixed payments (including in-substance fixed payments) less any lease incentives receivable,
- b) variable lease payments that depend on an index or a rate,
- c) amounts expected to be paid under residual value guarantees.
- d) if the lease term reflects the Company / the Group exercising the option to terminate.
- e) the exercise price of a purchase option reasonably certain to be exercised by the Company / the Group and payments of penalties for terminating a lease.

FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XV. Explanations on leasing transactions (continued)

TFRS 16 Leases (continued)

The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs. In calculating the present value of lease payments, the Company / the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable.

After the effective date of the lease, the Bank measures the lease obligation as follows:

- a) The book value is increased to reflect the accretion of interest of lease liabilities
- b) The book value is reduced to reflect the lease payments made

In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Parent Bank applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

The Group as Lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the Group's net investment in the leases. The lease payments are allocated as principle and interest. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

The Group as Lessee

Assets held under finance leases are recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are included in profit or loss in accordance with the Group's general policy on borrowing costs. Tangible assets acquired by financial leases are amortized based on the useful lives of the assets.

In accordance with TFRS 16, the lessee, at the effective date of the lease, measures the leasing liability on the present value of the lease payments that were not paid at that date (leasing liability) and depreciates the existence of the right of use related to the same date. The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the lessee shall use their incremental borrowing rate. The interest expense on the lease liability and the depreciation expense on right of use are recorded separately.

On 5 June 2020, Public Oversight Accounting and Auditing Standards Authority ("POA") has changed to TFRS 16 "Leases" standard by publishing Privileges Granted in Lease Payments - "Amendments to TFRS 16 Leases" concerning Covid-19. With this change, tenants are exempted from whether there has been a change in the rental privileges in lease payments due to Covid-19. This change did not have a significant impact on the financial status or performance of the Parent Bank.

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVI. Explanations on provisions and contingent liabilities

Provisions are recognized when there is a present obligation due to a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If aforesaid criteria did not form, the Group discloses the issues mentioned in notes to financial statements. Provisions are determined by using the Parent Bank's best expectation of expenses in fulfilling the obligation, and discounted to present value if material. Contingent assets consist of unplanned or other unexpected events that usually cause a possible inflow of economic benefits to the Group.

Explanations on contingent assets

Since recognition of the contingent assets in the financial statements would result in the accounting of an income, which may never be generated, the related assets are not included in the financial statements; on the other hand, if the inflow of the economic benefits of these assets to the Parent Bank is probable, an explanation is made thereon in the footnotes of the financial statements. Nevertheless, the developments related to the contingent assets are constantly evaluated and in case the inflow of the economic benefit to the Parent Bank is almost certain, the related asset and the respective income are recognized in the financial statements of the period in which the change occurred.

XVII. Explanations on liabilities regarding employee benefits

Severance pay according to the current laws and collective bargaining agreements in Turkey, is paid in case of retirement or dismissal. The Group calculates a provision for severance pay to allocate that employees need to be paid upon retirement or involuntarily leaving by estimating the present value of probable amount. There is no indemnity obligations related to the employees who are employed with contract of limited duration exceeding 12 month period. Actuarial gains and losses are accounted under Shareholder's Equity since 1 January 2013 in accordance with the Revised TAS 19.

FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVII. Explanations on liabilities regarding employee benefits (continued)

Employees of the Parent Bank are members of “Türkiye Sınai Kalkınma Bankası Anonim Şirketi Memur ve Müstahdemleri Yardım ve Emekli Vakfı” and “Türkiye Sınai Kalkınma Bankası A.Ş. Mensupları Munzam Sosyal Güvenlik ve Yardımlaşma Vakfı” (“the Pension Fund”). Technical financial statements of those funds are subject to audit in accordance with the Insurance Law and provisions of “Regulations on Actuaries” issued based on the related law by an actuary registered in the Actuarial Registry.

Paragraph 1 of the provisional Article 23 of the Banking Act (“Banking Act”) No: 5411 published in the Official Gazette No: 25983 on 1 November 2005 requires the transfer of banking funds to the Social Security Institution within 3 years as of the enactment date of the Banking Act. Under the Banking Act, in order to account for obligations, actuarial calculations will be made considering the income and expenses of those funds by a commission consisting of representatives from various institutions. Such calculated obligation shall be settled in equal instalments in maximum 15 years. Nonetheless, the related Article of the Banking Law was annulled by the Constitutional Court’s decision No: E. 2005/39 and K. 2007/33 dated 22 March 2007 that were published in the Official Gazette No: 26479 on 31 March 2007 as of the release of the related decision, and the execution of this article was cancelled as of its publication of the decision and the underlying reasoning for the cancellation of the related article was published in the Official Gazette No: 26731 on 15 December 2007.

After the publication of the reasoning of the cancellation decision of the Constitutional Court, articles related with the transfer of banks pension fund participants to Social Security Institution based on Social Security Law numbered 5754 were accepted by the Grand National Assembly of Turkey on 17 April 2008 and published in the Official Gazette No: 26870 on 8 May 2008.

Present value for the liabilities of the transferees as of the transfer date would be calculated by a commission that involves representatives of Social Security Institution, Ministry of Finance, Turkish Treasury, State Planning Organization, BRSA, SDIF, banks and banks’ pension fund institutions and technical interest rate, used in actuarial account, would be 9,80%. If salaries and benefits paid by the pension fund of banks and income and expenses of the pension funds in respect of the insurance branches, stated in the Law, exceeds the salaries and benefits paid under the regulations of Social Security Institution, such differences would be considered while calculating the present value for the liabilities of the transferees and the transfers are completed within 3 years beginning from 1 January 2008.

According to the provisional Article 20 of 73th article of Law No. 5754 dated 17 April 2008, has become effective on 8 May 2008 and was published in the Official Gazette No: 26870, transfer of Pension Funds to Social Security Institution in three years has been anticipated. Related resolution of the Council of Ministers related to four-year extension was published in the Official Gazette No: 28227 and Law no 5510 dated 8 March 2012. It has been resolved that the transfer process has been extended two year with Council of Ministers’ Decree, has become effective on 9 April 2011 and was published in the Official Gazette No: 27900. The transfer had to be completed until 8 May 2013. Accordingly, it has been resolved that, one more year extension with Council of Minister Decree No: 2013/467, has become effective on 3 May 2013 and was published in the Official Gazette No: 28636 and transfer need to be completed until 8 May 2014. However, it has been decided to extend the time related to transfer by the decision of Council of Minister published in the Official Gazette No. 28987 dated 30 April 2014 for one more year due to not to realize the transfer process. In accordance with the Health and Safety Law which became effective on 4 April 2015 and published in the Official Gazette No: 29335 and law no 6645 and dated 23 April 2015 and together with some amendments and statutory decree, Council of Ministers authorized for the determination of transfer date to the Social Security institution and the transfer of Pension Fund was postponed to an unknown date. There is no decision taken by the Cabinet with regards to issue at the date of financial statements. Unmet social benefits and payments of the pension fund participants and other employees that receive monthly income although they are within the scope of the related settlement deeds would be met by pension funds and the institutions employ these participants after the transfer of pension funds to the Social Security Institution.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY- 30 SEPTEMBER 2020

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVII. Explanations on liabilities regarding employee benefits (continued)

The present value of the liabilities, subject to the transfer to the Social Security Institution, of the Pension Fund as of 31 December 2019 has been calculated by an independent actuary in accordance with the actuarial assumptions in the Law and as per actuarial report dated 17 January 2020. There is no need for technical or actual deficit to book provision as of 31 December 2019. In addition, the Parent Bank's management anticipates that any liability that may come out during the transfer period and after, in the context expressed above, would be financed by the assets of the Pension Fund and would not cause any extra burden on the Parent Bank.

XVIII. Explanations on taxation

The income tax charge is composed of the sum of current tax charge and deferred tax benefit or charge. The current tax liability is calculated over taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible and it further excludes items that are never taxable or deductible. 22% is used in the calculation of the corporate tax (31 December 2019: 22%). In accordance with the Temporary Article 10 added to the Corporate Tax Law, Corporate Tax applied as 22% for corporate earnings for the taxation periods of 2018, 2019 and 2020.

Deferred tax asset or liability is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and currently enacted tax rates are used to determine deferred tax on income. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. The carrying amount of deferred tax assets is reviewed at each reporting date. Deferred tax is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized and reflected in the income statement as expense or income.

Moreover, if the deferred tax is related with items directly recorded under the equity in the same or different period, deferred tax is also associated directly with equity. Deferred tax assets and liabilities are also offset. According to the second paragraph of the Article 53 of the Banking Act No 5411 dated 19 October 2005, all specific reserves for loans and other receivables are considered as deductible expense for determining corporate tax base.

The Parent Bank started calculating deferred tax for the expected credit losses for stage 1 and stage 2.

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION THREE (Continued)

ACCOUNTING POLICIES (Continued)

XVIII. Explanations on taxation (continued)

Transfer pricing

Transfer pricing is regulated through article 13 of Corporate Tax Law titled “Transfer Pricing Through Camouflage of Earnings”. Detailed information for the practice regarding the subject is found in the “General Communiqué Regarding Camouflage of Earnings Through Transfer Pricing”. According to the aforementioned regulations, in the case of making purchase or sales of goods or services with relevant persons/corporations at a price that is determined against “arm’s length principle”, the gain is considered to be distributed implicitly through transfer pricing and such distribution of gains is not subject to deductions in means of corporate tax.

XIX. Additional explanations on borrowings

The Parent Bank borrows funds from domestic and foreign institutions borrowing from money market and issues marketable securities in domestic and foreign markets when needed. The funds borrowed are recorded at their purchase costs and valued at amortized costs using the effective interest method. Some of the securities issued by the Parent Bank and resources used with fixed interest rates are subject to fair value hedge accounting. While the credit risk and rediscounted accumulated interest on hedging liabilities are recorded in the income statement under the interest expense, the credit risk and net amount excluding accumulated interest results from hedge accounting are accounted in the income statement under the derivative financial instruments gains/losses by fair value.

XX. Explanations on share certificates issued

In the meeting of the General Assembly held on 26 March 2020, it has been resolved that the Parent Bank has no capital increase.

Prior Period, in the meeting of the General Assembly held on 28 March 2019, it has been resolved that the Parent Bank has no capital increase.

XXI. Explanations on acceptances

Acceptances are realized simultaneously with the payment dates of the customers and they are presented as commitments in the off-balance sheet accounts.

XXII. Explanations on government incentives

The Parent Bank does not use government incentives.

XXIII. Explanations on segment reporting

In accordance with its mission, the Parent Bank mainly operates in corporate and investment banking segments. The corporate banking is serving financial solutions and banking services for its medium and large-scale corporate customers. Services given to corporate customers are; investment credits, project financing, TL and foreign exchange operating loans, letters of credit, letters of guarantees and foreign trade transaction services covering letters of guarantee with external guarantees.

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION FOUR

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT

I. Explanations related to consolidated shareholders' equity

Total capital and the Capital adequacy ratio have been calculated in accordance with the "Regulation on Equity of Banks" and "Regulation on Measurement and Assessment of Capital Adequacy of Banks" and in addition to regulations of BRSA numbered 3397 dated 23 March 2020. As of 30 September 2020 capital adequacy ratio of the Parent Bank has been calculated as 21,68% (31 December 2019: 17,39%).

Based on the announcement of BRSA as of 23 March 2020 banks are entitled to use the 2019 year-end exchange rates in calculating of the amount of subject to credit risk while calculation on amounts valued in accordance with TAS and the related specific provision except of monetary and non-monetary items in foreign currency measured in terms of the historical cost in accordance with Regulation on Measurement and Assessment of Capital Adequacy of and if the net valuation differences of the securities owned by the banks before 23 March 2020 in the portfolio of "Fair value through other comprehensive income" are negative, these negative differences may not be taken into account of calculation in accordance with the Regulation on Banks' Equity and used for capital adequacy ratio due to the fluctuations in the financial markets as a result of the COVID-19 epidemic.

In addition, according to BRSA 16 April 2020 judgment it was decided to apply 0% risk weight in the calculation of amount subject to credit risk of the banks receivables from Central Management of Republic of Turkey and issued in FX in accordance with Standard Approach within the scope of Regulation on Measurement and Evaluation of Banks' Capital Adequacy.

Details on Subordinated Liabilities

Issuer	Türkiye Sınai Kalkınma Bankası A.Ş.
Unique identifier (eg CUSIP, ISIN etc.)	XS1584113184
Governing law(s) of the instrument	BRSA, Cominiqué on Subordinated Liabilities of CMB numbered CMB-II-31.1
Regulatory treatment	
Subject to 10% deduction as of 1/1/2015	No
Eligible on unconsolidated and/or consolidated basis	Eligible on unconsolidated and consolidated
Instrument type	Secondary subordinated loan which is categorized in subordinated loans equalling bill of exchanges
Amount recognized in regulatory capital (Currency in mil, as of most recent reporting date – Million USD)	300
Par value of instrument (Million USD)	300
Accounting classification	347011 (Liability) – Subordinated Debt Instruments
Original date of issuance	28 March 2017
Perpetual or dated	Dated
Original starting and maturity date	28 March 2017 - 29 March 2027 (10 years)
Issuer call subject to prior supervisory approval	Yes
Optional call date, contingent call dates and redemption amount	There is an early repayment option on 29 March 2022 (After 5th year)
Subsequent call dates, if applicable	After 5th year only for once
Interest/dividend payments	
Fixed or floating dividend/coupon	Fixed / semiannually coupon payment, principal payment at the maturity
Coupon rate and any related index	7,625%
Existence of a dividend stopper	None
Fully discretionary, partially discretionary or mandatory	None
Existence of step up or other incentive to redeem	None
Noncumulative or cumulative	Noncumulative
Convertible or non-convertible	
If convertible, conversion trigger (s)	None
If convertible, fully or partially	None
If convertible, conversion rate	None
If convertible, mandatory or optional conversion	None
If convertible, specify instrument type convertible into	None
If convertible, specify issuer of instrument it converts into	None
Write-down feature	
If write-down, write-down trigger(s)	According to number 5411 article, 71th article of Law of Banking and number 6102 article of Turkish Code of Commerce, if BRSA has seen in case of default.
If write-down, full or partial	Full or Partial
If write-down, permanent or temporary	Permanent
If temporary write-down, description of write-up mechanism	None
Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	After the senior creditors, before the TIER 1 subdebt, same with TIER 2.
In compliance with article number 7 and 8 of "Own fund regulation"	Based on the conditions written on 8th article.
Details of incompliance with article number 7 and 8 of "Own fund regulation"	Not based on the conditions written on 7th article.

II. Explanations related to consolidated currency risk

No long or short position is taken due to the uncertainties and changes in the markets therefore; no exposure to foreign currency risk is expected. However, possible foreign currency risks are calculated on monthly basis under the standard method in the foreign currency risk table and their results are reported to the official authorities and the Parent Bank's top management. Thus, foreign currency risk is closely monitored. Foreign currency risk, as a part of general market risk, is also taken into consideration in the calculation of Capital Adequacy Standard Ratio.

No short position is taken regarding foreign currency risk, whereas, counter position is taken for any foreign currency risks arising from customer transactions as to avoid foreign currency risk.

Announced current foreign exchange buying rates of the Parent Bank as at reporting date and the previous five working days in US Dollar and Euro are as follows:

	1 US Dollar	1 Euro
The Parent Bank's "Foreign Exchange Valuation Rate"		
30 September 2020	7,7450	9,0849
<u>Prior Five Workdays:</u>		
29 September 2020	7,7600	9,0559
28 September 2020	7,6190	8,8643
25 September 2020	7,5750	8,8404
24 September 2020	7,6460	8,9110
23 September 2020	7,6200	8,9029

Simple arithmetic thirty-day averages of the US Dollar and Euro buying rates of the Parent Bank before the reporting date are full TL 7,4854 and 8,8293 respectively.

III. Explanations related to consolidated interest rate risk

Interest rate sensitivity of the assets, liabilities and off-balance sheet items are measured by the Parent Bank. General and specific interest rate risk tables in the standard method, by including assets and liabilities, are taken into account in determination of the Capital Adequacy Standard Ratio and to calculate the overall interest rate risk of the Parent Bank.

Forecast results which have been formed using estimation-simulation reports are prepared and then the effects of fluctuations in interest rates are evaluated with sensitivity and scenario analysis. Cash requirement for every maturity period are determined based on maturity distribution analysis (Gap). In addition, a positive spread between the yield on assets and the cost of liabilities is kept while determining interest rates.

The amount of local borrowings is very low considering the total liabilities of the Parent Bank. As the Parent Bank is a development and investment bank, it obtains most of the funding from abroad.

The fluctuations in interest rates are controlled with interest rate risk tables, gap analysis, scenario analysis and stress tests, its effect in assets and liabilities and the probable changes in cash flows are being screened. The Parent Bank screens many risk control ratio including the markets risk ratio to the sum of risk weighted assets and the ratio of the value at risk calculated as per the internal model to the equity.

Under the scope of risk policies, continuous controls are made to prevent assets or shareholders' equity from adverse effects because of fluctuations in interest rates or liquidity difficulties and top management, the Board of Directors and the Audit Committee are informed of these risks.

IV. Explanations related to consolidated stock position risk

The Group is exposed to equity shares risk arising from investments on firms traded in Borsa Istanbul (BIST). The Group classifies its share certificate investments both as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income and net profit/loss of the Group is not affected unless the Group sells share certificates in financial assets at fair value through profit or loss portfolio.

Equity shares risk due from banking book

The table below is the comparison table of the Group's share certificate instruments' book value, fair value and market value.

Current Period	Comparison		
Share Certificate Investments	Book Value	Fair Value	Market Value
Investment in Shares-Grade A	491.740	-	947.798
Quoted	491.740	-	947.798

SECTION FOUR (Continued)

**INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT
(Continued)**

V. Consolidated liquidity risk management and coverage ratio

1. Explanations related to the consolidated liquidity risk:

1.a Information about the governance of consolidated liquidity risk management, including: risk tolerance; structure and responsibilities for consolidated liquidity risk management; internal consolidated liquidity reporting; and communication of consolidated liquidity risk strategy, policies and practices across business lines and with the board of directors

Liquidity risk management is conducted by Treasury Department in line with the strategies set by Asset and Liability Committee within the limits and policies approved by Board of Directors, and is monitored and controlled through reportings from Risk Management, Budget Planning and Financial Control Departments to Audit Committee, Board of Directors, Senior Management and relevant departments.

The Parent Bank's liquidity risk capacity is determined by the Parent Bank's internal limits and the regulations on liquidity coverage ratio and liquidity adequacy. Regarding its risk appetite, in addition to legal limits, the Parent Bank also applies internal limits for monitoring and controlling the liquidity risk.

Considering the Parent Bank's strategies and competitive conditions, Asset and Liability Committee has the responsibility of taking the relevant decisions regarding optimal balance sheet management of the Parent Bank, and monitoring the implementations. Treasury Department performs cash position management within the framework of the decisions taken at Asset and Liability Committee meetings.

The Risk Management Department reports to the Board of Directors and the Asset and Liability Committee regarding liquidity risk within the scope of internal limits and legal regulations. Additionally, liquidity stress tests are performed based on various scenarios and reported with their impact on legal limit utilization. Treasury Control Unit under the Budget Planning and Investor Relations Department also makes cash flow projection reportings to the Treasury Department and the Asset Liability Committee at certain periods and when needed.

As a result of the financial uncertainty caused by the coronavirus outbreak, liquidity management has been one of the top priorities of the Parent Bank. The Parent Bank continues to manage LCR within the framework of risk appetite by keeping its high quality liquid assets at a sufficient level.

1.b Information on the centralization degree of consolidated liquidity management and funding strategy and the functioning between the Parent Bank and the Parent Bank's subsidiaries

Within the scope of consolidation, liquidity management is not centralized and each subsidiary is responsible for its own liquidity management. However, the Parent Bank monitors the liquidity risk of each subsidiary within the defined limits.

1.c Information on the Parent Bank's funding strategy including the policies on funding types and variety of maturities

Among the main funding sources of the Bank, there are development bank credits, capital market transactions, syndicated loans, bilateral contractual resources, repo transactions and money market transactions and these sources are diversified to minimize the liquidity risk within the terms of market conditions. The funding planning based on those loans is performed long term such as a minimum of one year and the performance is monitored by the Asset and Liability Committee.

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

SECTION FOUR (Continued)

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT
(Continued)

V. Consolidated liquidity risk management and coverage ratio (continued)

1. Explanations related to the consolidated liquidity risk (continued)

1.ç Information on liquidity management on the basis of currencies constituting a minimum of five percent of the Parent Bank's total liabilities:

The Parent Bank's obligations consist of Turkish Lira (TRY), US Dollar (USD) and Euro (EUR) currency types. Turkish Lira obligations mainly consist of equity and repurchase agreements, whereas foreign currency obligations consist of foreign currency credits, securities issued and repurchase agreements. All loans provided from foreign sources are in foreign currencies. For this reason, foreign resources can be used in TL funding by currency swap transactions when necessary.

1.d Information on consolidated liquidity risk mitigation techniques:

Liquidity limits are defined for the purpose of monitoring and keeping the risk under certain levels. The Parent Bank monitors those limits' utilization and informs the Board of Directors, the Parent Bank Senior Management and the relevant departments regularly. Regarding those limits, the Treasury Department performs the required transactions with the relevant cost and term composition in accordance with market conditions from the sources previously defined in Article c. The Parent Bank minimizes the liquidity risk by holding high quality liquid assets and diversification of funds.

1.e Information on the use of stress tests

Within the scope of liquidity stress tests, the deteriorations that may occur in the cash flow structure of the Bank are assessed by the Parent Bank's scenarios. The results are analyzed by taking into account the risk appetite and capacity of the Parent Bank and reported to the senior management by the Risk Management Department ensuring the necessary actions are taken.

1.f General information on urgent and unexpected consolidated liquidity situation plans:

There is a Contingency Funding Plan for the contingent periods that arises beyond the Parent Bank's control. In a potential liquidity shortfall, Treasury Department is responsible from assessment, taking relevant actions and informing Parent Bank's Asset and Liability Committee. In contingent cases, to identify the liquidity risk arising, cash flow projections and funding requirement estimations are exercised based on various scenarios. To assess the stress scenarios, cash flow in terms of local currency is monitored regularly by Treasury Department. Scenario analysis on the Parent Bank's unencumbered sources are conducted daily. Transaction limits for organized markets are monitored timely and essential collateral amount to trade in those markets is withheld at hand. Repo transactions and/or available for sale portfolio securities in local and foreign currency that are major funding sources in shortfall periods for the Parent Bank are monitored consistently. In contingent periods outflows due to the irrevocable commitments, contingencies and derivative transactions can be deferred temporarily in a way that won't hurt the Bank's reputation. TSKB has the optionality of choosing one or more of the following for meeting its liquidity requirement that are selling liquid assets off, increasing short term borrowing, decreasing illiquid assets, increasing capital.

SECTION FOUR (Continued)

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT
(Continued)

V. Consolidated liquidity risk management and coverage ratio (continued)

3. Minimum explanations related to the liquidity coverage ratio by Banks:

As per The Regulation on The Calculation of Liquidity Coverage Ratio, Liquidity Coverage Ratio is the ratio of high quality liquid assets to net cash outflows. Total and foreign currency limits 100% and 80% are assigned on consolidated and unconsolidated basis respectively. For the development and investment banks, Banking Regulations and Supervision Agency decided to apply zero percent to the total and foreign currency consolidated and unconsolidated liquidity coverage ratios unless stated otherwise.

Due to the coronavirus outbreak, according to the regulation published by the BRSA on 26 March 2020, for deposit banks; It was decided to provide flexibility in compliance with the minimum ratios of the Liquidity Coverage Ratio (LCR) and for development and investment banks ; in order to reduce the operational burden, it was decided to exempt the Liquidity Coverage Ratio (LCR) from the reporting obligations to the Agency until 31 December 2020.

In the Liquidity Coverage Ratio calculation, the items with the highest impact are high quality liquid assets, foreign funds and money market transactions. High quality liquid assets mainly consist of the required reserves held in the Central Bank of the Republic of Turkey and unencumbered securities issued by the Treasury.

Main funding source of the Parent Bank is long term loans attained from international financial institutions. The ratio of those loans in total funding is around 67%. The total ratio of the securities issued in purpose of funding diversification and loans attained through syndication loans in overall borrowing is 29%. 5% of the Parent Bank's total funding is provided from repurchase agreements.

30-day cash flows arising from derivative transactions are included in the calculation in accordance with the Regulation. The Parent Bank also takes into consideration the liabilities depending on the possibility of changing the fair values of the derivative transactions in accordance with the Regulation.

VI. Explanations related to consolidated leverage ratio

a) Information about the consolidated leverage ratio between current and prior periods

The table related to calculation of leverage ratio in accordance with the principles of the “Regulation on Measurement and Evaluation of Banks’ Leverage Level” which is published on the Official Gazette no.28812 dated 5 November 2013 is given below.

Leverage ratio of the Bank calculated from the arithmetic average of the three months is 9,58% (31 December 2019: 10,56%). Total balance sheet assets increased by 25,79% compare to prior period.

b) Comparison table of total assets and total risk amounts in the financial statements prepared in accordance with TAS

		Current Period	Prior Period
1	Total Amount of Asset and Risk Situated in The Consolidated Financial Statements Prepared in Accordance with TAS (2)	48.808.928	38.615.495
2	The difference between Total Amount of Asset in the Consolidated Financial Statements Prepared in Accordance with TAS and the Communiqué on Preparation of Consolidated Financial Statements of Banks (2)	(4.690.814)	38.615.495
3	The difference between total amount and total risk amount of derivative financial instruments with credit derivative in the Communiqué on Preparation of Consolidated Financial Statements of Banks (1)	(145.651)	(1.370.332)
4	The difference between total amount and total risk amount of risk investment securities or commodity collateral financing transactions in the Communiqué on Preparation of Consolidated Financial Statements of Banks (1)	1.143.316	1.238.940
5	The difference between total amount and total risk amount of off-balance sheet transactions in the Communiqué on Preparation of Consolidated Financial Statements of Banks (1)	(4.212.159)	(2.804.361)
6	The other differences between amount of assets and risk in the Communiqué on Preparation of Consolidated Financial Statements of Banks (1)	-	-
7	Total Exposures (1)	59.835.305	47.826.907

(1) The arithmetic average of the last 3 months in the related periods.

(2) The consolidated financial statements prepared in accordance with the sixth paragraph of the Article 5 in the communiqué on preparation of consolidated financial statements of the Banks. Consolidated financial statements prepared in accordance with TAS are not audited as of 30 June 2020 and 31 December 2019 figures are used for prior period.

c) Consolidated Leverage Ratio

		Current Period (1)	Prior Period (1)
	Balance sheet Assets		
1	Balance sheet assets (excluding derivative financial assets and credit derivatives, including collaterals)	50.398.754	40.114.358

VII. Explanations related to risk management

Linkages between financial statements and risk amounts

The footnotes prepared in accordance with the "Regulation on Calculation Risk Management Disclosures", which was published in the Official Gazette No. 29511 of 23 October 2015 and entered into force as of 31 March 2016, and the disclosures pertaining thereto are provided in this section.

As the standard approach is utilized for the calculation of the capital adequacy of the Parent Bank, no statement has been included as regards the methods based on internal models as per the relevant communiqué.

Disclosures on the Risk management approach and risk-weighted amount

Risk management approach of the Bank allows for ensuring the establishment of a common risk culture covering the entire institution within the scope of the policies and codes of practice designated by the Board of Directors, for identifying risks in harmony with international arrangements and for performing the activities of measurement, analysis, monitoring and reporting accordingly.

Risk Management Department has been organized within the Parent Bank so as to ensure compliance with the relevant policies, codes of practice and processes and to manage, in parallel with these policies, the risks the Parent Bank is exposed to. Risk Management Department, the duties and responsibilities of which are designated through the regulations approved by the Board of Directors, carries out its activities through the Executive Vice President for Internal Systems under the Audit Committee who serves independently from executive activities and executive units.

Risk Management Department develops the systems required within the process of risk management and carries out the relevant activities, monitors the compliance of risks with policies, standards, limits of the Parent Bank and its risk appetite indicators and performs activities aimed at harmonization with the relevant legislation and the Basel criteria. Risk measurements are performed through the standard approaches for legal reporting and the advanced approaches are utilized internally.

Risk Management Department submits its detailed risk management reports prepared on monthly and quarterly basis to the Board of Directors via the Audit Committee. These reports cover measurements regarding main risks, stress tests and scenario analyses and the status of compliance with the identified limit levels and risk appetite indicators.

Prospective risk assessments are carried out by conducting periodical stress tests on loan, market and interest risks and the impact of results on the overall financial power of the Bank is evaluated. The relevant results are notified to the Audit Committee and contribute to the assessment of the financial structure of the Bank at the moment of stress. Stress test scenarios are determined by evaluating the impacts posed by previous economic crises on macroeconomic indicators and expectations from the upcoming period. By estimating the risks and capital position of the Bank within the upcoming period, various analyses are performed in terms of legal and internal capital adequacy ratios, and the ICAAP (Internal Capital Adequacy Assessment Process) report is submitted to the BRSA.

SECTION FIVE

EXPLANATIONS AND DISCLOSURES ON CONSOLIDATED FINANCIAL STATEMENTS

I. Explanations and disclosures related to the consolidated assets

1.a Information on cash and balances with the Central Bank of Turkey:

	Current Period		Prior Period	
	TL	FC	TL	FC
Cash in TL/Foreign Currency	20	-	29	-
Balances with the Central Bank of Turkey	3.113	1.081.898	484	803.528
Other	-	-	-	-
Total	3.133	1.081.898	513	803.528

	Current Period(1)		Prior Period	
	TL	FC	TL	FC
Unrestricted demand deposits	3.113	10.217	484	7.461
Unrestricted time deposits	-	-	-	-
Restricted time deposits	-	-	-	-
Other (2)	-	1.071.681	-	796.067
Total	3.113	1.081.898	484	803.528

(1) Deposits at Central Bank of Turkey held as reserve requirement.

Expected credit loss amounting to TL 579 (31 December 2019: 429) is allocated in "Balances with the Central Bank of Turkey".

As per the Communiqué numbered 2005/1 "Reserve Deposits" of Central Bank of Republic of Turkey (CBRT), banks keep reserve deposits at the CBRT for their TL and FC liabilities mentioned in the communiqué. Reserves are calculated and set aside every two weeks on Fridays for 14-days periods.

The CBRT Required reserves of 2 May 2015 has started to pay interest to the Required reserves, reserve options and unrestricted account held in US dollars according to regulation released at 5 May 2015. Interest for the required reserves in Turkish Lira is paid since 21 September 2018.

The required reserves in Turkish lira is applied the following interest rates as of 10 July 2020:

- For banks that started operating with the permission of the Banking Regulation and Supervision Agency, 5 % for two years from the date of start-up
- Banks with annual real loan growth rate that are adapted Banks with annual real loan growth rate are above 15,00% (A) are below 15,00% (including 15,00) and Banks with annual real loan growth rate that are adapted Banks with annual real loan growth rate are below 15,00% (A) are above 5,00% (including 5,00) is 7%.
- 0 percent for other banks.

On 18 March 2020, Central Bank of the Republic of Turkey changed required reserves and TL reserve requirement ratios is associated with the annual growth rates of the total of Stage 1 Standard Cash Loans issued in Turkish Lira and Stage 2 Close monitoring Cash Loans except banks' FX indexed loans and loans extended to domestic and foreign financial institutions. According to this, TL reserve requirements ratios of the Banks with Annual real loan growth rate that are adapted Banks with annual real loan growth rate are above 15,00% (A) are below 15,00% (including 15,00) and Banks with Annual real loan growth rate that are adapted Banks with annual real loan growth rate are below 15,00% (A) are above 5,00% (including 5,00) maintain reserve requirements with differentiated reserve requirement ratios.

SECTION FIVE (Continued)

EXPLANATIONS AND DISCLOSURES ON CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

I. Explanations and disclosures related to the consolidated assets (continued)

2. Information on financial assets at fair value through profit and loss:

2.a. Information on financial assets designated at fair value through profit and loss given as collateral or blockage:

As of the reporting date, the Group has no financial assets designated at fair value through profit and loss given as collateral or blockage (31 December 2019: None).

2.b Information on financial assets designated at fair value through profit and loss given as repurchase agreements:

As of the reporting date, the Group has no financial assets designated at fair value through profit and loss subject to repurchase agreements (31 December 2019: None).

2.c Positive differences related to derivative financial assets:

Derivative Financial Assets (1)	Current Period		Prior Period	
	TL	FC	TL	FC
Forward Transactions	129.127	16.288	44.124	163
Swap Transactions	741.475	466.085	609.141	231.423
Futures Transactions	-	-	-	-
Options	-	4.587	-	9.596
Other	-	-	-	-
Total	870.602	486.960	653.265	241.182

(1) Derivative financial assets for hedging purposes amounting to TL 281.448 were presented at "Derivative Financial Assets" line (31 December 2019: 67.884).

The Parent Bank has entered into extinguishing cross-currency interest rate swaps as part of its strategy to hedge TL denominated fixed rate assets. These swap arrangements provide that, on the occurrence of certain credit-related events in relation to the company (such as failure to make a payment), the swap arrangements may immediately terminate with no further payments due and payable by either party. As of 30 September 2020, the fair value of such swaps is TL 469.577 income with a total outstanding notional amount of USD 145 million. The average maturity of such swaps range between 2021 and 2023 years.

2.d Loans measured at Fair Value through Profit/Loss:

Net Book Value	Current Period	Prior Period
Loans Measured at Fair Value through Profit/Loss	263.097	263.097

Include the loan granted to the special purpose entity as detailed in Section Five Note I.16. This loan is accounted under loans measured at fair value through profit/loss as per TFRS 9.

As of 30 September 2020, the Parent Bank re-evaluated the fair value of the loan in consideration of current market conditions and macroeconomic indicators, and did not change the fair value of the financial asset as of year-end.

Paid in capital has been indicated as Turkish Lira in articles of incorporation and registered in trade registry. Effect of inflation adjustments on paid in capital is the difference caused by the inflation adjustment on shareholders' equity items. Extraordinary reserves are the status reserves which have been transferred with the General Assembly decision after distributable profit have been transferred to legal reserves. Legal reserves are the status reserves which have been transferred from distributable profit in accordance with the Article of 519 of the Turkish Commercial Code No 6102. The Parent Bank's internal capital adequacy assessment process is made annually on a consolidated basis. Consolidated subsidiaries and associates are included in the assessment.

SECTION FIVE (Continued)

EXPLANATIONS AND DISCLOSURES ON CONSOLIDATED FINANCIAL STATEMENTS
(Continued)

III. Explanations related to the consolidated off-balance sheet items (continued)

4. Explanations on contingent liabilities and assets (continued):

Some of the lawsuits are decided favorable, remaining of lawsuits are decided unfavorable by the tax courts of first instance. On the other hand, appeal and objection have been requested by the Parent Bank against the decision of the Court with respect to the Parent Bank and by the administration against the decision of the Court with respect to the administration and completion of appeal process is waited. The tax and penalty notices related to the decision of the tax court of first instance against the Parent Bank are accrued by administration depending on legal process and as of 31 July 2014 the Parent Bank has made total payments amounting to TL 22.091.

A similar case has been submitted to the Constitutional Court in the form of individual remedies by the main shareholder of the parent Bank in relation to the parent Bank's liabilities to pay, the Constitutional Court gave the decision with court file number 2014/6192. According to court decision published in the Official Gazette dated 21 February 2015 and numbered 29274, the assessments against the Parent Bank was contrary to the principle of legality and the Parent Bank's property rights has been violated. This decision is considered to be a precedent for the Parent Bank and an amount of TL 12.750 corresponding to the portion that the Parent Bank was obliged to pay for the related period is recognized as income in the prior period.

There is a lawsuit for Pendorya Mall of TSKB GYO registered in Pendik, Doğu District, plot 105, map 865, parcel 64 against IBB and Karacan Yapı at Pendik 2nd Court of First Instance Pendorya Mall claiming the road intersects his own property and demanding compensation amounting to TL 7. TSKB GYO has been involved in the lawsuit as intervening party.

Relating to immovable property, subject of litigation discovery review and expert reports were submitted to the court file. Objections to the report and statement of TSKB GYO has been given. IBB Presidency has declared that expropriation proceedings related to the subject have been initiated. For this reason, lawsuit was removed from "Possessory Actions" and converted to the "Confiscating without expropriating" by the judge.

Accepting in the new case, the plaintiff claimed compensation from the Administration and in order to determine the amount of compensation the Court decided an expert examination since the information provided by the Land Registry and the Municipality was not deemed sufficient. Expert reports submitted to the Court on 30 May 2013 and the Court decided to add Pendik Municipality as a defendant in the case. At the latest hearing on 24 December 2013 it was decided to accept the expert reports and Pendik Municipality to pay the relevant amount (TL 645) to the plaintiff. The reasoned decision has been notified, the decision which has been appealed by the appellant and the respondent Pendik Municipality has turned deteriorate the Supreme Court decision was a request for the correction requested by the İstanbul Metropolitan Municipality (IMM). The decision has been requested adjustment by IMM and plaintiff Sağlam Satış ve Paz. A.Ş. (Malazlar A.Ş.). Breaking decision of the Supreme Court is expected to evaluate the requests for correction of decision. The Court decided to apply of Supreme Court's decision to dismiss. The notification of reasoned decision is expected.

III. Explanations related to the consolidated off-balance sheet items (continued)

4. Explanations on contingent liabilities and assets (continued):

Beyoğlu Municipality approved the reclaim of TSKB GYO for the Building II which has the location as 1486 map and 76 parcel in Fındıklı in Beyoğlu, Istanbul for the forfeiture because of zoning change. However, Municipality of Beyoğlu sued because of no approbation by Istanbul Metropolitan Municipality, in order to keep rights on the subject.

The court made a decision as no solution for the relevant claim due to Beyoğlu Municipality approved the reclaim. However, there has to be permission by Istanbul Metropolitan Municipality, and Cultural and Natural Heritage Preservation Board for the exact result. That's why, decision was appealed by the company. The Council of State reversed the judgement based on inappropriate zoning plan changes with the decision of 28 March 2014. In addition, a new implementation development plan covering the Fındıklı Building II, which has been canceled by the judicial authorities and which is owned by TSKB GYO, is being prepared by the Municipality of Beyoğlu on December 21, 2010, the 1/1000 Scaled Beyoğlu District Protected Urban Site Protected Development Plan. For this content, TSKB GYO's application were made in writing to the Beyoğlu Municipality on 28 October 2014 in order to plan by taking into account the 1/1000 Scale Implementation Plan which is being prepared by the Municipality of Beyoğlu and the Istanbul Metropolitan Municipality. The court requested the Municipality to ask the plan including the immovable subject to the decision of the Council of State is still in force as a result of the decision of dismissal and that the plan canceled by the court in the letter sent from the Municipality is still valid answered in the form. In the case which was started to discuss again in court; an expert opinion examination was made. The Court has ruled in favor of the Parent Bank by canceling the administrative proceeding. Against decision, within the legal period, Beyoğlu Municipality has applied for the appeal law and it is expected that the file will be sent to Istanbul Regional Administrative Court for examination and, if necessary, for re-trial.

A lawsuit was filed by one of the investors of TSKB GYO on the cancellation of the 5th, 7th and 9th articles decided at the Ordinary General Assembly meeting on 27 April 2018. Although the request for the case was demanded to stop the execution of the 5th and 7th articles, the request for interim injunction requested for the suspension of the execution was rejected and an appeal was filed by the plaintiff. The trial is ongoing.

According to Legal Department of the Bank, it is not expected that the other lawsuits against the Bank will have a significant impact on the financial statements.

5. Custodian and intermediary services

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (continued)

ASSESSMENTS OF THE CHAIRMAN OF THE BOARD FOR THE PERIOD

Partial recovery signs were observed at a global scale in the third quarter of the year as a result of the normalization steps taken by the countries and the reopening of the economies. As the uncertainties related to the trajectory of the pandemic and vaccine news continue to occupy the global agenda, the potential impact of such circumstances on the capital flow, foreign trade and financial conditions has supported the expansionary fiscal and financial policies of the central banks of developed and developing countries. Estimating a shrinkage of 5,2% in the global economy for 2020, the World Bank's 2020 World Economic Outlook report provides that this will be followed by a growth of 4,2% in 2021.

Turkey's economy shrank by 3,1% in the first half due to the impact of the pandemic. The macroeconomic data related to the third quarter observed as a result of strong measures taken and the strong acceleration in loans point to a revival in parallel with the global outlook. The announced purchasing managers index (PMI) and industrial production data also support this outlook. This fast recovery of the economy and the developments in financial markets bring about upside risks to inflation. In September, the inflation rate was recorded at 11,75% in annual terms. The tightening measures taken by the Turkish Central Bank starting from August with the aim of limiting these risks and supporting price stability were followed by an increase of 200 basis points made in the policy interest rate in September.

The banking sector maintained its role as a driving force for Turkish economy. The loan growth acceleration rate has reached its highest level in the third quarter. While this rate slowed down in August to an extent, the sector's FX-adjusted loan growth rate has been recorded at over 20% in annual terms. According to the disclosed BRSA data, the banking sector has maintained its strong financial performance in the first 8 months of the year despite loaded provisions.

TSKB has continued supporting the economy and employment in the third quarter with corporate banking, investment banking and consultancy products. It has provided cash funds of total USD 1,1 billion for the investments in the relevant areas which mainly focus on the themes of renewable energy, gender equality and the financing of investments in the developing regions. Continuing its resource diversification efforts successfully, our Bank has strengthened its activities on mitigating the impact of COVID-19 making use of the fund of USD 200 million obtained from the Asia Infrastructure and Investment Bank in August. The purpose of such fund is to meet the liquidity requirements of corporate companies negatively affected by COVID-19. TSKB will continue to add value for sustainable economic development and its stakeholders in the rest of the year in line with its mission and targets.

Yours Sincerely,

Chairman of the Board

H. Ersin Özince

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT(Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ASSESSMENTS OF THE CHIEF EXECUTIVE OFFICER FOR THE PERIOD(Continued)

While Covid-19 pandemic has maintained its impact in the third quarter of 2020, we continued at full speed supporting our clients in line with our development banking responsibility and in the light of our sustainable and inclusive banking principles. We kept focusing on maintaining communication and cooperation with all our stakeholders. As we at TSKB continue our efforts to mitigate the adverse impact of the pandemic, we will also continue to contribute to our economy in line with our approach focused on prioritizing Sustainable Development (SDGs).

Our Bank has executed a resourcing agreement worth USD 200 million with Asia Infrastructure and Investment Bank (AIIB) in order to meet the working capital and liquidity requirements of Turkish corporate companies which operate in the infrastructure and manufacturing industries and which are negatively affected by COVID-19. The fund obtained under the refund guarantee of the Ministry of Treasury and Finance of the Republic of Turkey will be extended to the companies operating in the fields of energy, transportation, water, sustainable infrastructure, health and communication technologies which are among the sectors prioritized by the Asian Infrastructure Investment Bank (AIIB), as well as companies engaged in other productive sectors that may support these sectors and the companies engaged in other manufacturing sectors.

In addition, our Bank's ESG (Environmental, Social, Governance) Score has been certified by Sustainalytics company, and TSKB ranked among the best global banks. With its distinctive performance in managing the ESG risk components, our Bank was included in the low-risk category with its ESG score of 16,7 and ranked in the second percentile globally, ranking 6th among 372 banks. We will continue our commitment to manage ESG risk components taking strength from our internal strategy and policies.

TSKB has opened up a new prospect across the entire sector for financing sustainability in this quarter. Within the scope of the new loan model focused on United Nations Sustainable Development Goals (SDGs), which has been developed by ESCARUS, an affiliate of our Bank, we identify the self-assessments of the companies on social, economic and governance aspects within the scope of SDGs and develop the necessary action plans. The first loan within the scope of this model, which will ensure an improvement of financing costs due to the positive impact created, has been extended to our client Altınmarka.

In the third quarter where uncertainties related to the global pandemic still persist, our bank's financial results were in line with our expectations. While the total asset size of our bank increased by 27% in the first three quarters reaching TL 53,5 billion, our total loan portfolio increased by 27% in the same period, reaching TL 40,6 billion. During the first three quarters, our Bank has supported its clients in meeting their operating capital requirements that have increased due to impact of the pandemic in addition to financing investments in mainly energy projects, as well as investments in different sectors focusing on the theme of inclusion.

While the profit before provisions and taxes we have derived in the first three quarters stood at TL 1,4 billion, our net profit has been recorded as TL 522,3 million in the same period. Our equity size has reached TL 5,7 billion with an increase of 10% compared to the beginning of the year.

At TSKB, we will continue adding value to our country economy via all our business segments in this period, where the investments to be made in social and governance practices will be of vital importance for sustainable development. We will continue our efforts with full dedication, focusing on our country's sustainable development priority.

Yours Sincerely,

CEO

Ece Börü

TÜRKİYE SİNAİ KALKINMA BANKASI A.Ş. AND ITS SUBSIDIARIES

SECTION SEVEN (Continued)

INFORMATION ON INTERIM ACTIVITY REPORT(Continued)

I. Interim period activity report included chairman of board of directors and CEO's assessments for the interim activities (Continued)

ECONOMIC DEVELOPMENTS IN THE INTERIM PERIOD

Economic Developments in the First 9 Months of 2020

While the measures taken in Turkey for restricting the spread of the COVID-19 outbreak were implemented at the end of the first quarter and in a significant part of the second quarter in line with the global trends, a significant shrinkage was observed in the economic operations. While the seasonally and calendar adjusted GDP grew by 11,0% in the second quarter of 2020 compared to the previous period, the calendar adjusted GDP growth rate decreased by 10,0% in annual terms. The annual GDP growth shrank by 9,9% according to non-adjusted data. According to these results, the GDP shrank by 3,1% in the first half of 2020 year-on-year. The total annual GDP, which was recorded as USD 758,1 billion in the first quarter of 2020, decreased to USD 737,0 billion in the second quarter.

The initial data indicate that the recovery trend observed starting from May still continues in the third quarter. The industrial production activities, which increased by 8,5% in July compared to the previous month, grew by 3,4% in August. While the figures in retail sales and revenue were in line with the industrial production in the same period, the initial data of September indicate a momentum loss to an extent. The manufacturing industry purchasing managers index, which has reached a record level of the recent years at 56,9 in July, decreased to 54,3 and 52,8 in August and September, respectively. The sector confidence indices indicate that the recovery, albeit slow, continues in the manufacturing industry and services and retail sectors, and point out to a slowdown in the construction industry in August and September.

The inflation rate, which increased in May and June because of the capacity limitations caused by the movements in foreign exchange rates and the normalization process, decreased to an extent in the third quarter. The annual general consumer prices index (CPI) inflation rate, which stood at 12,6% in June, fell to 11,8% in July and August, and then to 11,7% in September. On the other hand, moderate increases were recorded in the core inflation indicators in August and September with the delayed impact of the exchange rates. In addition, the annual domestic producer price inflation (DPPI) rate, which was recorded as 6,2% in June, increased to 14,3% in September with the cost pressure caused by the rising foreign exchange rates. The movements in foreign exchange rates and the deterioration in pricing behavior continue to affect the inflation outlook despite the low energy prices.

While the supporting liquidity measures taken in the pandemic process trigger a delayed demand, the deterioration in the external balance continued in the third quarter with the impact of the high gold import figures. Exports shrank by 2,4% in July-September period year-on-year, while imports increased by 10,8%. In line with these results, foreign trade deficit that was USD 7,3 billion in the third quarter of 2019 increased to USD 14,0 billion in the third quarter of 2020, and the foreign trade deficit that was USD 21,1 billion in the first three quarters of 2019 increased to USD 37,9 billion year-on-year. The current account deficit, which stood at USD 19,9 billion in the first half of 2020, increased as a result of the ongoing, albeit slow, shrinkage in tourism in July and August. The current balance, which produced an excess of USD 5,3 million in January-August of 2019 with these results, produced a deficit of USD 26,5 billion in the same period of 2020.

The deterioration in the financial balance slowed down in the third quarter with the recovery in tax revenue. The tax revenue that increased by 9,2% on annual terms in the first half increased by 19,3% in the January-September period thanks to the fast increases observed in the third quarter. On the other hand, the increase in total tax revenue stood at 11,6% as a result of the loss in tax-free income. While non-interest expenses increased by 15,8% on an annual basis in the first three quarters, the interest income and total expenses increased by 32,3% and 17,6%, respectively. Thus, the non-interest deficit, which stood at TL 4,3 billion in the January-September period of 2019, increased to TL 32,8 billion year-on-year. The budget deficit, which was recorded as TL 85,8 billion in this period, increased to TL 140,6 billion.

ECONOMIC DEVELOPMENTS IN THE INTERIM PERIOD (Continued)

Maintaining its monetary policy stance in July, the Turkish Central Bank started to withdraw gradually its support provided in the pandemic process starting from August in order to limit the risks surrounding the inflation. In this connection, the financing provided via additional liquidity resources was discontinued and the average financing interest of the Turkish Central Bank, which was around 7,5% in July, increased up to 10,15% at the end of August. Repo auctions using volume method were discontinued in this period, and financing was performed by means of traditional method for the first time after 2013. While the Turkish Central Bank increased the policy interest rate, which was 8,25%, by 200 base points in September, it continued its tight liquidity policy. While the financing continued with traditional method in this connection, the average financing interest increased to 11,12% at the end of September. The tight liquidity policy was maintained in the first half of October, and the average financing interest was increased up to 12,18%, which was beyond the marginal financing interest. The summary of the latest monetary policy committee meeting indicates that additional tightening measures could be taken by the Turkish Central Bank if needed. In addition, the Banking Regulation and Supervision Agency introduced relief regulations in the third quarter for the asset ratio and the access by non-residents to TL.

Mr. Berat Albayrak, Minister of Treasury and Finance (MTF), announced the New Economy Program ("NEP") for the 2021-2023 period in September. The NEP provides that in the main scenario where GDP will grow by 0,3% in 2020, the growth rate will increase to 5,8% in 2021 and gain stability at the level of 5%. The inflation rate, which was 11,8% at the end of 2019, is expected to stand at 10,5% at the end of this year. Then, it is expected to stand at 8,0%, 6,0% and 4,9% in the upcoming years, respectively. The current balance is expected to produce a deficit of 3,5% in 2020 compared to the GDP, and then to improve gradually reaching an excess level of 0,1% at the end of 2023. While the ratio of the budget deficit to the GDP is estimated to increase to 4,9% in 2020, the ratio of the budget deficit to the GDP is targeted to gradually decrease during the term of the program and reach 3,5% at the end of the period.

Markets

In the third quarter of 2020, the financial markets were guided by the course of the outbreak and the macroeconomic data disclosed globally. While the supporting economy policies are maintained in developed economies, the announced data indicate that the recovery trend continues in the global economy. However, the new case numbers of the COVID-19 outbreak continue to rise all over the world, increasing the demand for safe harbors. In addition, geopolitical developments, uncertainties related to the elections in the US and the delay in the provision of the financial support pack in the US were key components that had a negative impact on the economic outlook and the optimism in financial markets.

Although international corporations, which mainly include the International Monetary Fund (IMF), have improved their expectations for the global outlook to an extent, they still underline the high level of uncertainty. The IMF revised its expected 2020 shrinkage rate, which was 5,2% in June, decreasing it to 4,4%, and downgraded its 2021 growth rate expectation from 5,4% to 5,2%, stating that it expects a slower recovery.

While the uncertainties in the global economic environment continue, Borsa Istanbul 100 and 30 indices fell by 1,7% and 4,7% in the third quarter, respectively. The banking sector index experienced a decrease of 13,4% in the same period. While the increase in the foreign exchange rates continued, USD/TL and EUR/TL rates increased by 14,1% and 18,4%, respectively, compared to the end of the second quarter. The compound interest rate of the 2-year benchmark bond increased from 9,38%, which was recorded at the end of the second quarter, to 13,4% at the end of the third quarter.

Banking Sector

In the banking sector, the nominal loan growth rate in TL stood at 32,8% in the first three quarters of 2020, while the FX-adjusted increase was 20,7%. While the loan growth is caused by the growth of loans in TL, which was recorded as 38,9%, the loans in FX decreased by 7,4% in FX-adjusted terms. In the banking sector affected by the monetary policy adopted with the aim of limiting the negative economic impact of the pandemic and by the arrangements made by the public authorities, the loans in TL increased from 9,4% to 17% in the second quarter, and decreased to 8,5% in the third quarter with the slowdown observed starting from the middle of August. While nearly 75% of the TL loan growth is caused by corporate loans in the first two quarters, corporate loans and personal loans were responsible for 40% and 60% of the TL loan growth recorded in the third quarter, respectively. In the first three quarters of 2020, Corporate loans in TL increased by 40,6%, housing loans by 39,7%, consumer loans 45,3% and the individual credit card debts increased by 15,9% with all of such debts resulting from the third quarter. While the annual increase rate of total gross loans of the industry including non-performing loans stood at 8,5% at the end of 2019, this rate increased to 24,7% as of 2 October 2020.

The deposits served as the sector's main non-equity financing source, and the total deposits increased by 33,6% in nominal terms and by 15,3% in FX-adjusted terms in the first three quarters of 2020. The TL deposits and FX deposits increased by 25,5% and 5,6%, respectively, in this period. 81% of the deposit increase is due to the TL deposits, whereas personal deposits, TL commercial deposits and TL deposits of public agencies and other institutions increased by 12,9%, 25,3% and 89%, respectively.

While the TL loan/deposit ratio of the sector increased from 137% to 147% in the first three quarters of 2020, the increase in this rate fell by nearly 2 points compared to the end of 2019 with the FX resources and investments included, and the loan/deposit ratio fell from 106% to 104%.

YTD Change	in TL basis	FX-adjusted
Loans	32,8%	20,7%
Deposits	33,6%	15,3%

HIGHLIGHTS FROM THE BANK'S OPERATIONS DURING THE INTERIM PERIOD (Continued)

On 25 June 2020, the Bank signed the "Declaration to Ensure Reliable Investment Environment" of the Integrated Reporting Turkey, which includes the bank as one of the members of its executive council. This declaration highlights that the non-financial performance of institutions is at least as important as their financial performance.

On 9 July 2020, TSKB obtained a syndicated loan worth 150 million USD with the participation of total 12 banks from 12 countries. The interest rate of the loan with a term of 367 days stood at annual Euribor / Libor + 1,75%, while its renewal rate was recorded as 85%.

In this period, TSKB has executed a resourcing agreement worth USD 200 million with Asia Infrastructure and Investment Bank (AIIB) in order to meet the working capital and liquidity requirements of Turkish corporate companies which operate in the infrastructure and manufacturing industries and which are negatively affected by COVID-19. The fund obtained under the refund guarantee of the Ministry of Treasury and Finance of the Republic of Turkey will be extended to the companies operating in the fields of energy, transportation, water, sustainable infrastructure, health and communication technologies which are among the sectors prioritized by the Asian Infrastructure Investment Bank (AIIB), as well as companies engaged in other productive sectors that may support these sectors and the companies engaged in other manufacturing sectors.

In addition, the ESG (Environmental, Social, Governance) Score of TSKB has been certified by Sustainalytics company, and TSKB ranked among the best global banks. With its risk of experiencing a significant financial impact due to its ESG performance being assessed low, TSKB was included in the low-risk category with its ESG score of 16.7 and ranked in the second percentile globally, ranking 6th among 372 banks.

The Bank has opened up a new prospect across the entire sector for financing sustainability in this quarter. Within the scope of the new loan model focused on United Nations Sustainable Development Goals (SDGs), which has been developed by ESCARUS, an affiliate of TSKB, the companies' social, economic and environmental self-assessments are performed on the basis of the 17 SDGs that were put into effect by the United Nations, and the necessary action plans related to SDGs are developed.

Developments Regarding the Bank's Corporate Governance Operations

The Bank's "Corporate Governance Compliance Report" and "Corporate Governance Information Forms" were published on the Public Disclosure Form on 2 March 2020. These reports are available at <https://www.kap.org.tr/en/Bildirim/823664> and <https://www.kap.org.tr/en/Bildirim/823667>.

FINANCIAL DEVELOPMENTS IN THE INTERIM PERIOD

The summary of the Bank's key financial indicators as of 30 September 2020 is as follows:

While the total asset size increased by 30,3% year-on-year, it increased by 26,6% compared to the end of 2019, reaching TL 53,5 billion.

The total loan portfolio reached TL 40,6 billion as of the end of September with an increase of 35,8% year-on-year and 27,1% compared to the year-end. The share of the loans in assets was 75,8%. The share of non-performing loans in total loans was 3,4% as of the end of September.

While shareholder's equity increased by 16,6% year-on-year, it increased by 10,2% compared to the end of 2019, reaching TL 5,7 billion. The capital adequacy ratio recorded as 17,4% at the end of 2019 stood at %15,8 by the end of September without taking into consideration the BRSA measures.

Net interest income fell by 0,5% in the first three quarters of 2020 year-on-year reaching TL 1.488,7 million, whereas fee and commission income increased by 101%, reaching TL 85,5 million. The income-expense ratio, which was recorded as 15,6% in 2019, fell to 13,6% in the same period of 2020.

The Bank's net profit fell by 8,9% in the first three quarters year-on-year, reaching TL 522,3 million.

The Return on Tangible Equity (excluding shares and stocks appraisals included in shareholder's equity), which was recorded as 15,7% in 2019, fell to 12,8% in the first three quarters of 2020.

The return on assets, which was recorded as 1,8% in 2019, fell to 1,5% in the first three quarters of 2020.

RISK MANAGEMENT

TSKB Risk Management Policies and implementation principles governing these policies comprise the written standards defined by the Board of Directors and enforced by the Bank's senior management.

In line with TSKB's Risk Management Policies, the main risks exposed by the Bank have been identified as credit risks, asset-liability management risk (market risk, structural interest rate risk, liquidity risk) and operational risk. A Risk Management Department has been established within the Bank to ensure compliance with said risk policies and the codes of practice pertaining thereto, and manage the risks the Bank is exposed to in accordance with these policies.

TSKB Risk Management Department actively participates in all processes related to the management of risks, and regularly reports to the Board of Directors, Audit Committee, senior management, and the relevant departments of the Bank. The roles, responsibilities and structure of the Department have been set forth in the Regulation on Risk Management Department.
