>> Risk Management Pillars

Credit Risk

- Monitoring the clients individually with analysing the financials
- Preparing monitoring reports for the clients at least once a year
- Keeping track of internal and external (if it is done) ratings of the customers, reviewing the internal ratings annually
- Actively managing the companies that are categorized in watch list (defined as loans that are 30 to 90 days delinquent)
- The value of the collateral taken is generally above the value of the loan
- Bank's lending is subject to the principles and internal limits set by the Board of Directors

Market Risk

- Matching policy of assets and liabilities with fixed and floating interest rates in different currencies. Close matching structure of loans and funding for interest and currency risks
- Utilising derivative instruments, such as currency and interest rate swaps, as well as forward, futures and options transactions, for general hedging purposes
- Monitoring market risk on the Bank's trading book on a monthly basis with standard method and on a daily basis with VaR which does not exceed 1% of core capital
- While the BRSA maximum ratio of Net foreign exchange position / (Tier I + Tier II Capital) is set at 10%, TSKB maintains a much more conservative ratio

Operational Risk

- Effective internal control systems to prevent, detect and manage the operational risks which results in a very low level of losses in connection with operational risk
- In compliance with the regulations, holding capital for operational risk equal to the average over the previous three years of a fixed percentage (15%) of positive annual gross income
- Setting maximum limit for the operational risk exposure calculated according to the Basic Indicator Approach, of 10% of the Bank's total risk weighted assets
- Risks identified are reported to the Audit Committee and Board of Directors and "Monitoring Action Plans" are prepared accordingly

Liquidity Risk

- Liquidity ratios above the minimum regulatory levels proscribed by BRSA are maintained
- A policy of close matching of loans and funding maturities is adhered to liquidity risk
- Projections of Turkish Lira and foreign currency cash flows are produced

**The minimum ratio set by the BRSA for development and investment banks is 0%. For deposit banks, the minimum ratio is 80% for foreign currency and 100% in total. Our bank's liquidity coverage ratios remain above the thresholds set for deposit banks.*

Strong Risk Management Perspective

Monitoring and Collateralization

- Loan concentration is prudently watched during loan allocation and monitoring processes, and is also limited by internal ratios through Risk Management.
- TSKB has a comprehensive monitoring process involving
 - Compliance rules.
 - Credit risk monitoring for borrower and its group,
 - Collateral package monitoring,
 - Sectoral and regional analysis,
 - NPL management
- Collateral package for project finance loans includes
 - pledges over the shares,
 - mortgages over immovable
 - commercial enterprise pledges
 - pledges over bank accounts
 - project completion guarantees
 - assignment of receivables.

>> Strong and resilient NII generation continues

Evolution of NIM Components (TL mn)

Annualized NIM

- ✓ **Strong and resilient NII generation continued on the back of relatively robust loan spreads and front-loaded loan growth as well as strategically managed security portfolio**
- ✓ **NII excluding CPI linker gains was up by 17% yoy and -9% qoq due to high base impact of 4Q driven by collections.**
- ✓ **Swap costs decreased substantially by %53 in 1Q26 given the lower utilization following the redemption of a Eurobond amounting to USD 350 mn.**
- ✓ **CPI-linker assumption was revised up to 25.7% from 24.1%, resulting to TL 120 mn of extra income for the whole year.**
